- 4) One filament section of each valve.
Filaments of both valves in parallel.
Une partie du filament de chaque tube. Les filaments des deux tubes connectés en parallèle.
Ein Glühfadenteil jeder Röhre.
Die Glühfäden beider Röhren parallelgeschaltet.
- 5) Four filament sections in parallel.
Les quatre parties des filaments connectées en parallèle
Vier Glühfadenteile parallelgeschaltet.
- 6) Two filament sections of each valve in series.
Filaments of both valves in parallel.
Deux parties du filament de chaque tube connectées en série. Filaments des deux tubes connectés en parallèle.
Zwei Glühfadenteile beider Röhren in Serie.
Die Glühfäden beider Röhren parallelgeschaltet.
- 15) R_k is taken up in the negative lead of the H.T. supply. It is assumed that an additional current of 5 mA from the valves preceding the push-pull stage also flows through R_k .
 R_k est connecté dans le conducteur négatif de l'alimentation haute tension. Il est supposé qu'un courant additionnel de 5 mA des tubes précédents l'étage finale traverse cette même résistance.
 R_k ist in der negativen Leitung der Hochspannungsspeisung geschaltet. Es wird angenommen dass ein zusätzlicher Strom von 5 mA der der Endstufe vorangehenden Röhren durch diesen Widerstand fließt.
