| k bei $U_{a\sim} = 8 V_{eff}$ | | | | 1,1 | 1,3 | 2,0 | 0,6 | 0,8 | 1,0 | % |

Mikrophonie

Die Röhre darf ohne spezielle Maßnahmen gegen Mikrophonie in Schaltungen verwendet werden, die für eine Eingangsspannung $U_{e\sim} \geq 10 \text{ mV}_{\text{eff}}$ bei 800 Hz bzw. $2 \text{ mV}_{\text{eff}}$ bei 50 Hz an der EABC 80 eine Ausgangsleistung an der Endröhre von 50 mW ergeben.

Microphonics

The tube may be used without any special precautions against microphonics in circuits delivering a power output of 50 mW for an input voltage on the EABC 80 of $U_{e\sim} \geq 10 \text{ mV rms}$ at 800 c/s resp. 2 mV rms at 50 c/s.
