# CHILDREN RECEIVING **INSTRUCTION BY AIR**

CALIFORNIA ADOPTS NEW SCIENCE FOR TEACHING

Feature State Geography and History by Novel Story Telling Method Interspersed With Music

OAKLAND, Cal.—Twenty thousand Callfornia school teachers scattered over the valleys and mountains of the state are now to be aided by Radio broadcasting. Theirs is the job every morning of getting over 600,000 children to be punctual in attendance at school.

Beginning Monday morning, November 3, at 9 o'clock, their job will be easier, when a series of weekly programs furnished by the State Board of Education and broadcast by KGO, are expected to be so interesting that children will want to be at school in time to hear them.

Schools Very Enthusiastic Schools throughout that state are reporting great enthusiasm for the new venture, according to Grace C. Stanley, Commissioner of Elementary schools, who will have charge of the work. It is not known at the present time how many pupils will actually listen in on the first program, but schools in isolated districts, who will be so greatly benefited are expected to be in the lead of those tuned in on the broadcasts.

It is planned to feature California history and geography in the lessons by Radio. Professors of the various universities and colleges of the state and other eminent educators and story tellers will contribute. No lesson will be more than twenty minutes long, and will begin with music and end with music. The story telling method of teaching will be used. That is, interesting stories will be told about the geographical and historical features of the state, aimed to entertain pupil listeners as well as educate them.

First Time Tried in State The problem of the country school teacher will in this manner not only be lessened, but teachers are enthusiastically reporting their belief that they themselves will receive benefit and instruction from speakers over the air.

This is said to be the first time that a state-wide plan to use Radio in public schools has ever been attempted. The idea is said to have originated in a conference this summer on rural education held in San Francisco when requests from delegates that some attempt to reach the schools in the rural sections of the state by Radio was made.

A committee consisting of Will C. Wood, state superintendent of public instruction, and Archibald Anderson, president of the San Francisco State Teachers' college, was appointed to take up the question. After carefully studying the problem the committee decided to work with Station KGO

#### WORLD SLIPPING CLAIM

(Continued from page 1) small a number for the exactitude that we decided necessary; so we are now simply trying to locate the proper sta tion to add to our list, and will not be ready to work before some time in the winter of 1925, at least."

The general pointed out that many of the smaller islands in mid-ocean were charted in such manner that there might well be a slight error. Then, too, he suggested that we may not yet be fully acquainted with the variations of the some "eccentricity" which would lead to a change of longitudinal points.

Shrinkage of Earth Cause? Whether or not the constant shrinkage of the crust of the earth can make a difference great enough to be detected, the general will not venture to say. According to reports from the Observatory Radio station at Zikawei (Shanghai), Honolulu seems to be irregular in time signals, varying often as much as three to five seconds from the European stations, which the observatory picks up with equal ease. It may at least be possible to correct these errors in various stations, whether or not anything is discovered regarding the alterations of the earth's crust.

Replying to a question as to whether the great number of earthquakes in the Pacific might have caused changes in the earth's longitude, General Ferrie sald that this among other questions would be studied carefully. The object of the whole investigation, he said, was "to study the question of variations and improve the precision of the world's longitudes."

#### Sunday Matinee Musicales Regular Feature at WGBS

NEW YORK .- Because of the success the first Sunday matinee musical met with last week, WGBS has decided to adopt this as a regular feature. Sunday afternoon at 2:30 the Russian Eagle orchestra will play for an hour, followed by an hour of music by the Vincent Rose Symphonic Dance orchestra.

#### WLW Incognito Night Brings Many Letters

Broadcasts Without Giving Call Letters for Two Hours

CINCINNATI.—An experiment of inestimable value was recently made by broadcasting an incognito program from the Crosley WLW station. The entire program was broadcast for over two hours without announcing the call letters, city or owner of the station. Numerous prizes were offered to those who wrote letters and postal cards from places outside of a radius of one hundred miles.

More than a thousand Radio fans from all parts of the country wrote to the WLW station. This proved the popularity of the station and the recognition of the voice of Fred Smith, studio director, who conceived the unique idea.

#### WBCN Has New Director

CHICAGO.—A change in the staff of WBCN, the Radio station being built on the south side by the Southtown Economist has just been announced. For the present William H. McDonnell, who, with John E. Foster, owns both WBCN and the Economist, will be the nominal director. Robert Northrop, who has been director, is no longer with the station.

detection, anticipating the crystal detector era), was the recipient recently of thousands of congratulatory messages on the occasion of his eightieth birthday.

Professor Branly is one of the hardest working men in France, devoting ten hours every day to experimental researches. He again came into prominence in 1921, when parliament voted a subvention of 20,000 francs to permit him to continue his researches in the laboratory of the Catholic institute. The value of his discovery was beyond discussion, and his scientific genius did not pale bofore that of Marconi. Despite his incomparable inin his own country as "the father dustry, M. Branly works practically in of Radio" (he invented the Branly poverty. A banquet in his honor took "coherer," one of the earliest forms of place November 6.

Mourse Its. Radio

For ease of tuning, selectivity and long distant reception, you can't beat a Crosley. Actual performances prove this day in and day out. Here are what a few of the happy Crosley

users say:

Apponnag, Rhode Island.

'I purchased my Crosley one tube No. 50 around the first of August and I think it is my duty to express my satisfaction of its performance during the warm spell. Have heard New York, Boston, Pittsburgh, Cincinnati, Chicago, Detroit, Ottawa, Canada, and many other stations."

Dailas, Texas.

"The aet, Modei 51, has already\_surpassed my greatest expectations. On the night of September 13th, Oakland, California, was received with sufficient volume to be clearly heard throughout seven rooms. Kansas City, Chicago and many other stations were received with respectively greater volume."

Chicago, Illinois.

"My Trirdyn has done all that you claimed for it.
The first slient night, Monday, September 22nd, using only two tubes, I pulled in twenty-eight stations. On the following night with most of the Chicago stations going full blast, using two tubes, I pulled in Memphis. Cincinnati, Dallas and Omaha."

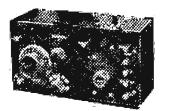

(Names upon request)

These are only a few of the thousands of unsolicited letters that come to us. You, too, can enjoy similar results with a Crosley. And the cost of any Crosley is remarkably low.

# COULD GUIDE ZR3 TO AMERICA CREWLESS

ITALIAN ENGINEER MAKES ASTONISHING CLAIM

Backed by Italian Government Signor Fiamma Visualizes Manless Freight Carrying Planes

By A. C. Blackall

LONDON.-Signor Fiamma, an Italian engineer and inventor of a ingenious device for directing and steering ships and aircraft at a distance by means of Radio waves, has just made the astonishing claim that it would have been possible with his apparatus to have guided ZR3 to America from any part of the world at any distance and, with equal ease, to have brought the dirigible back without a human being on board.

He is willing to take up a challenge at any time to prove his invention is all he claims for it, and has already given proof of its capabilities in the presence of an official commission, composed of Admiral Bellini and other distinguished naval officers, in Spezia.

The invention is being protected in every country and the Italian government is taking the greatest interest in it. Visualizes Crewless Freight Planes

Fiamma claims that with his apparatus it will soon be possible also to establish cross-Channel air transportation at all times and in any kind of weather by means of airoplanes without a person on board. These planes could be made to start from London punctually, at fixed hours, with mail or other matter for Paris, Brussels, Berlin, and other Continental cities without any crew aboard.

Their flight would be directed simply by someone in a London office, and the same machines at fixed hours would be commanded, to rise from the ground and return. In the same manner, he alleges, cross-Channel transport by ships, entirely covered in and proof against any storm, could be organized to carry goods or mail to Calais, Bolougne, Ostend, or any continental port, and return at schedule time without any personnel on board or risk

to lives.

#### MUSIC PLUS STEAM ATTRACTS BATHERS

Boston.—Why do people still go to Turkish baths when prohibition is in effect? Many have wondered. The staff at Station WEEI here have found the solution in a telegram from a well-known Back Bay steam parlor. The telegram said, "Have thirty-two men in the St. Botolph Turkish baths listening to Station WEEL." It was signed by the proprietor.

#### What Is The Matter With Canadian Fans?

Refusal to Send Applause Cards Hurts Station Officials

WINNIPEG, Can.—The absence of Canadian applause cards in their daily mail, have caused the Radio department of the Canadian National Railways to wonder what the trouble can be.

Either Canadian audiences are "cold," or else their enthusiasm for broadcasting does not carry them to the extent of sitting down to write and mail applause cards and letters, as their American cousins do, some of them with pleasing regularity.

"Less than 15 per cent of the total letters and cards received every week are from Canadians" declared one of the Radio department staff in western Canada. "Here, in four days which have passed since the last broadcast from the Fort Garry Hotel, we have over one hundred and fifty applause cards and letters addressed to the department. About 85 per cent of these come from people who, in a great many cases, have never seen Canada but are glad to welcome a Canadian station 'on the air.'"

Officials at Station CNRW, will be glad to hear from every Canadian who hear them, as well as the American fans who are interested in the welfare of the sta-

#### REALTORS ADAPT RECEIVER AS AID

Detroit Concern Induces Hundreds to Visit New Sub-Divisions for Inspection

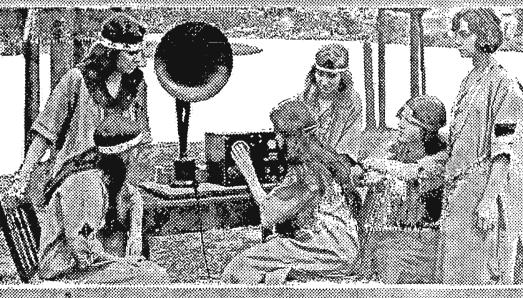

DETROIT.—Real estate men here are now turning to Radio to increase their

Featuring their subdivision in an outlying section one realty company has installed a Radio set with a ten-foot megaphone, with which visitors are attracted and entertained.

This Radio is said to have induced hundreds of persons to stop at the subdivision property, look it over and enjoy the program broadcast from Detroit and other stations. Many sales have resulted.

> Three of the young-sters at the Mooseheart home doing their best before the microphone of WJJD. For the first time in the history of broadcast-ing, these a rtists claimed that they were not "mike" shy.

west.

Jack Nelson, formerly program director and announcer at WDAP, is director-announcer of Station WJJD. He is a distinguished planist and singer, well liked by the invisible audience throughout the country. Listen in for him on 278 meters wave length.

#### TITANIA HOLDS COURT AT KHJ

Los Angeles, California, is a Tuesday evening feature. With her able assistants, Uncle John and the Sandman, is her father, who watches her career she has not missed a program since its beginning, September, 1923.

Each week is a story, read from manuscript. It is the realm of right living and actions. Radio children listeners are tion will be under the supervision of often taken across "Slumber Sea" into Uncle John of KHJ, and children who can-

the "Land of Ought to Be.'

had no clue to the identity of either the Queen or the Sandman. Uncle John they all knew, the beloved announcer-director of KHJ since its beginning. But who was "Queen Titania" and her faithful Sandman, who always helped her tell the Recently the secret of their identity program over the Radio in her honor.

THE Fairy of the Microphone," leaked out. The Queen is no other than Queen Titania of KHJ, The Times, the popular little movie actress of child pictures and is known in the film world by the same name. And the Sandman and (another secret) writes the original manuscript story for each Tuesday night Radiocast. These stories are about to be published in book form. Their distribunot afford to buy the book will in some For more than eight months, listeners way have it given to them.

Queen Titania is nearly nine years old and has been featured in child films for three years. An announcement of a series of twelve pictures starring the little queen will be made soon.

October 9 was the fairy queen's birthday and in celebration the Radio stars of Radio children the stories each Tuesday? KHJ gave a voluntary complimentary

#### Radio Becomes Messenger of Death: Locates Father

MEMPHIS, Tenn.-Radio became the messenger of death here recently when the baby son of Capt. J. H. Jones of Meridian, Miss., who traveling in Tennessee by automobile, died.

WMC, the Commercial Appeal, broadcast news of Capt. Jones' son's death and a description of Mr. Jones and his car. The Atlanta Journal station, WSB, did likewise.

A man in Trenton, Miss., heard WMC's message and identified Captain Jones by means of the Mississippi license plate on

#### WWJ Gives Michigan Games

DETROIT.—A newly added feature at WWJ, The Detroit News, is the play-by-play broadcasting of Michigan's football scores from Ferry field, Ann Arbor. The games played at home by Michigan since October 25 have been broadcast by WWJ.

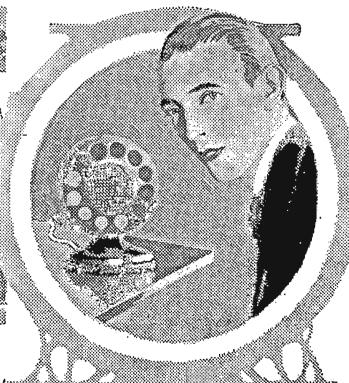

A special telephone wire connects the main broadcasting plant in Detroit with Ferry field at Ann Arbor, thirty-eight miles distant.

#### WHITE RADIO BILL FACES DOWNFALL

Changes in Situation Cause Officials to Revise Minds; Hoover Against

WASHINGTON, D. C .- Changes in the Radio situation have been so rapid during the past year that it is almost impossible for anyone to keep track of them and this situation has lead, it is believed, to the change in the attitude of the officials of the department of commerce relative to the White Radio bill, which will again be before Congress when it convenes on December 1.

Since Congress has adjourned, and even since the Third Radio conference, Mr. Hoover has changed his mind on the matter of legislation and it is understood that he is not now at all enthusiastic about any law, feeling that things are moving too fast. In other words if a law is passed it will be no time at all before it is almost obsolete.

Mooseheart camp-fire girls listening to some of their pals broadcast from their own station, WJJD. This station is located on the outskirts of Chicago and belongs to the L. O. O. M. The studio is on the buildings of the home for parentless children and a direct wire connection has been established to one of the promi-

nent hotels in Chicago for dance music.

# **BRITISH EX-PREMIER** RIVALS GEORGE HAY

THRILLED BY WONDERFUL VOICE; FANS JUBILATED

Stanley Baldwin Boosting Party Causes Spasms of Envy to Come From Professional Announcers

LONDON. — That Stanley Baldwin, former premier of Great Britain and leader of the Conservative party, would have rivaled George Dewey Hay (winner of Radio Digest Gold Cup for world's best program announcer) had be chosen program announcing as his profession is the opinion of British Radiophans.

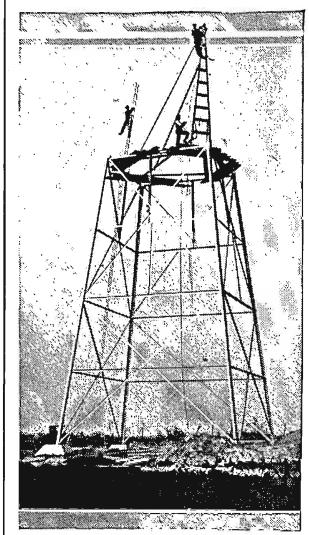

Enthusiasts who have listened to hundreds of Radiocast talks are unanimously of the opinion that they never heard a speaking voice so perfectly suited to the needs of the microphone as that of Mr. Baldwin when he broadcast from 2LO recently. His excellent enunclation and perfect modulation caused every word to come through with such delightful purity and clarity as to cause spasms of envy to shoot down the spines of professional announcers throughout the British Isles.
Premier's Voice Not So Good

In striking contrast with Mr. Baldwin, however, was Premier Ramsay Mac-Donald's speech Radiocast just previously. Mr. MacDonald's voice sank and swelled, ebbed and flowed, as at one moment he shouted stentoriously, and the next dropped to an oratorical whisper. He addressed first one section of his visible audience and then another, the Radio listeners catching what they could. If Baldwin's effort was worthy of a championship prize, then MacDonald's was equally a lesson in how it should be done to carry off the booby prize.

Radio Taught by Machine
CAMP ALFRED VAIL, N. J.—A
mechanical device is to take the place of human instructors in Morse and Continental code at the Army Signal Corps school here, following successful experiments with the new adaption of phonographic instruction.

Oxford Vs. Carleton on Air NORTHFIELD, Minn.-Oxford university, England, and Carleton college, located here, were heard in debate recently when KFMX, Carleton college station, that a seven-foot depth of solid concrete broadcast the intercollegiate contest.

#### **BUILD HIGH TOWERS** FOR GIGANTIC WLW

INCINNATI.—The task of erecting the two 200-foot aerial towers for the new five kilowatt super power station of WLW, the Crosley Radio corportion at Harrison, Ohio, is nearly completed. Every effort is being made to rush the completion of this station so as to be able to broadcast Christmas tidings to Radio listeners throughout the world. Telephone wires will connect this new station with the microphones in the studios at 3401 Colerain avenue, Cincinnati, some twenty-five miles away.

There is a great difference between the aerial used for the reception of broadcasting and the transmission aerial.

Some idea of the weight of these towers and their size may be had from the fact is used to imbed the four supports.

BROADCAST Receiver that A marks another long step forward in radio design and estab-

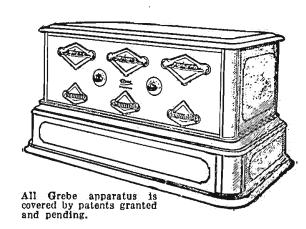

lishes a new set of standards in

# KPO-"The Voice of The Golden Gate"

the first time, sat down to their Radio supper after the show, he might feel himself especially honored, for the long table is loaded with good things which California offers her friends. But that entertainer need not feel too "chesty" but should be thankful that he was invited to perform for KPO, for the KPO Radio supper is a nightly feature.

The studios are on the top floor of the great Hale Brothers Department Store on San Francisco's busy corner of Market and Fifth streets. The tea room adjoining the studio, enjoys noon hour pipe organ recitals as well as Radio listeners. The studio is large and attractive. The adjoining operating room with Claire Morrison as chief operator and announcer, assisted by Harold Perry, Earl Thomas and John Signer opens out onto a roof from which the visitor can watch the twinkling lights of San Francisco and the bay.

When KPO was ready to open in January, 1923, they offered the program

distinction who understood social usages and could adapt them to correct form in a Radiocasting station studio. Mrs. O'Brien was visiting in the East at the time and wired back her acceptance. The charming mother of two daughters, Mrs. O'Brien has made KPO a station of genuine worth. Everything from French lessons to bedtime stories, from grand opera to "Bananas" goes on the air in season.

"More and more I realize the need of musical education among program directors, and more and more I feel that musical program direction of Radio is a woman's work. It requires tact. The woman can best deal with the temperamental artist or the phlegmatic plodder. The woman arranges details, she can best plan a balanced program for her listeners of whom many today are women. Radio is no longer a man's game. It is as much the woman's field and in the program balancing, the home -of which the woman is the central factor-is considered in its continuity and beneficial interest."

KPO is the only station in the West to operate its own pipe organ in its studio. A Wurlitzer, with Theodore John Irwin giving daily programs, is

of Music, and one of the few chosen organists playing the great municipal organ of San Francisco. Here in the West he has pioneered in organ music. From KPO he gives his listeners programs of great value. One every program (and he goes on the air three times a week) he gives his hearers one movement of some standard symphonic number, a prelude or an adagio, an overture or a rhapsody—but always from a classic composition.

The recent addition to KPO management of Oliver W. Tuttle, a well-known publicity man and former Radio editor of a San Francisco paper, was announced simultaneously with plans of remote control to many of the largest auditoriums in the city.

"We are planning to have as many auditoriums as possible for size, connected with KPO by wire, giving our listeners everything which we may hear in the city. The first principle of Radio in a department store is service—the kind of service which such a store gives to its customers. This we are giving through KPO to its listeners everywhere.

Four days a week, at five thirty, Big Brother of KPO talks to the children. He advises them in their daily life and (Continued on page 8)

# STATIONS MULTIPLY AFTER CONFERENCE

LARGE NUMBER CLOSED BROADCAST ONCE MORE

Many New Stations Found Among List Wanting License to Operate -Modern Equipment Used

Since the closing of the Third Radio conference, numerous broadcasting stations which were closed for indefinite periods have again taken the air. Along with these stations, several more new stations have applied for, and have been granted licenses.

Prominent among the stations which are reopening is KQV, who have been closed for more than a month. Mrs. George Santemeyer, a popular favorite with Pittsburgh Radiophans, was the premier artist on the opening program.

WFBG Opens at Altoona Listed among the new stations is WFBG, the Tribune-Gable station, located in Altoona, Pennsylvania. On Friday evening November 7, the bands of the Pennsylvania railroad located in Altoona, broadcast a special program. The works choir, more than one hundred employees in operation some time in December. The of the Pennsylvania system furnished three special numbers during the evening.

This station will be known on the air by the ringing of an engine bell, the blowing of an engine whistle and the rubbing of sand blocks, imitating a train about to station will be dedicated to the people of start. They will operate on a wave length of 261 meters.

Station KFUO, owned and operated by the Concordia Seminary at St. Louis, Missouri, recently went on the air with their first program. They are using 500 watts power and broadcast on a wave length of 545 meters.

Church Contemplates New Station The First Baptist church of Memphis,

Tennessee, will soon be broadcasting with their own equipment. They have made application for a license, and will broadcast every Sunday morning.

KTHS, meaning "Kum to Hot Springs," is the call assigned to the new station now nearing completion on the roof of the Arlington hotel at Hot Springs, Arkansas. They will broadcast on a wave length of 375 meters.

G. C. Arnoux, formerly connected with Station WBAP, will be director.

#### NOTED CRITICISM'S TO BE PUT IN BOOK FORM

"Footlight and Lamplight" by Oliver Sayler for Fans

NEW YORK .- "Footlight and Lamplight," Oliver Sayler's half-hour of criticism of books and plays which is broadcast by WGBS every Thursday evening at 8:30, is to be released in printed form free to all who wish to obtain it. Mr. Sayler, the well known writer and critic, in this series discusses the latest worth while offerings in the dramatic and literary fields.

On the Fridays and Saturdays following Mr. Sayler's talks, printed copies of "Footlight and Lamplight" will be placed in every book that is sold over the counter in Gimbel's book department. Those who hear it over the Radio may also obtain copies, without expense, by sending a stamped addressed envelope to Mr. Salyer, care of WGBS, Gimbel Brothers. "Footlight and Lamplight" is also to be distributed in the theaters where plays are running that Mr. Sayler reviews.

From Oklahoma City comes word that a new 500 watt station will be erected and exact location for the station has been undetermined as yet, but a survey is under way to find the best possible site.

The station has already been characterized as "The Voice of Oklahoma." The Oklahoma for their use. Plans are under way to create a "Church of the Air." whereby various denominations will have an opportunity to put on special programs each Sunday.

Call letters have not been assigned to the station as yet, but are expected soon from Washington.

Charleston Wants Station
A project to give Charleston, West Vir-

ginia, one of the largest broadcasting stations in the country, was broached at the weekly luncheon of the Charleston real estate board recently, and received the approval of those present.

The Peoples Bank building owners have offered the use of the roof of their building for the station and a studio will be located there. Sending apparatus will be on the roof and lines connecting all the theaters and places of public meetings will be installed.

# OPERATING AND TROUBLE SHOOTING

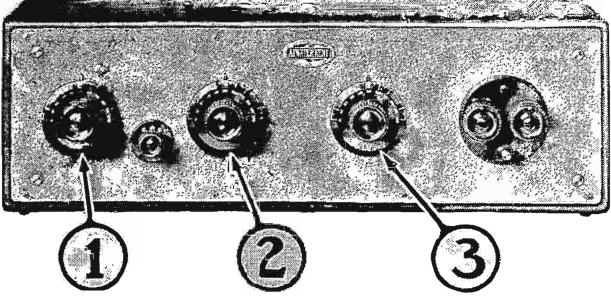

### For the Owner of an Atwater Kent Model 20

XTENSIVE tests with this set showed that it could be used, with excellent results, on almost any type of antenna. Naturally, the best results are secured with a high outside wire since more energy reaches this type. The length over-all, including the lead-in and ground should, preferably, not exceed 100 to 150 feet. If one long straightaway wire is impossible and an aerial of two or more wires is used, the space between wires should be not less than 3 feet and greater separation would be to advantage. Antenna and Ground

Between a loop antenna and an indoor wire, tryouts proved the indoor to be slightly better. A wire was strung straight down a hallway about 40 feet in length and 6 inches below the ceiling, attached at each end to the top of a door frame with insulators. This worked very nearly as well as the outside wire. Since an antenna strung behind the picture moulding of two rooms was available this was also tried and, while the volume was not quite as great, the selectivity was increased to knife-like sharpness and the range differed not at all. Although it was not tried, there seems good reason to believe that an attic antenna would give even better results than the wire strung in the hall.

The ground, as usual, was made by scraping the water pipe and tightening a substantial ground clamp around the clean portion. In this case the connection was made in the basement near a window, the wire run out through a small hole in the basement window frame and up to the window through which the antenna lead from the outside wire was passed. Both wires are brought, in porcelain tubes, through a board under the sash. Tubes and Batteries

Following the manufacturers instruct batteries and then connecting all the loose tions, five "hard" tubes of the A type wires to the set. Care should be obwere used, instead of four A tubes and a served when connecting the loud speaker soft detector. Although the set performed that the cord with the red thread inter-

were switched around while the set was marked "Red Tracer Lead." left tuned to a station to ascertain whether any of them performed better as Radio frequency amplifiers. Some improvement in both volume and clearness was perceptible when the first Radio frequency tube and the detector tube were exchanged. The battery is a 6-volt, 120 ampere hour unit and, while it may be used for several days and then recharged for several hours at a high rate, it has been found better practice to charge it a little each evening while at dinner to make up what was used the evening before. A charging rate of 21/2 amperes for an hour seems to keep this one about right.

Model 20 was used on both storage and dry cell B batteries. Performance over a period of six weeks is apt to be more consistent with the former, but no difference could be noted during the two nights' test of this set, though the dry cell blocks were 10 per cent gone and the storage cells freshly charged. When making connections to this receiver, or any other for that matter, make one complete connection from set to battery at a time, rather than making five connections to the batteries and then connecting all the loose

well on the first insertion of tubes, they | woven in it is connected to the post

Check all battery, antenna, ground and speaker connections once before putting in any tubes; then insert one in any socket and pull the filament switch out. Turn the rheostat over slowly and, if tube lights dimly it will be alright to insert the other four tubes. Turn both rheostats to right nearly to the maximum position, and one is ready to tune in stations.

Operation

It will be found that the second and third dials will always be at very nearly the same setting for any given stations, while the first dial will be at some point slightly above or below them, depending on the position of the tap switch. This switch is provided to adjust the set to any antenna with which it may be used. A few trials will show on which tap it should be set for maximum results, after which it can be left there. In the case of our tests it was found that tap number 2 worked slightly better than the others. First of all set dials 2 and 3 on, let us say, 56. Then swing dial 1 slowly from 40 to 70. If no program is heard, even faintly,

mum response. Then adjust the two rheostats to the point where both volume and clearness are at maximum, but do not turn them any further to the right as this would merely be burning up energy uselessly and will shorten the life of the

With a distant station tuned in, try shifting the switch located between dials 1 and 2 and reset the dials slightly. If any increased response is noted write down the dial settings and then tune in another station with the switch back on the point at which it was before. Then shift switch and reset dials as before. This procedure on different stations located in several directions will determine once and for all the switch setting and it should then be left alone. It will be found an excellent idea to keep a little red tag or something else bright in color, attached to the filament switch for a few days, as otherwise if one leaves the set at a time when signals are not tuned in, it is very easy to go off and leave the tubes burning, possibly for many hours. The tag serves to attract one's attention and remind that the switch should be pushed in. After the fact that the switch is there and is to be used, has been sufficiently impressed on one's mind, the tag can be removed.

Dial Settings

The dial settings we found with the antenna compensating switch on point 2 are shown here and it seems reasonable to believe that other Model 20 sets will follow these settings very closely.

#### England Establishes Direct Contact with New Zealand

LONDON.-Two British amateurs have achieved the record feat of exchanging listened to New Zealand and transmitted a reply. A cable has just arrived to the miles of space. postal address Radioed from London the previous night, which confirms the almost incredible achievement.

London, whose call sign is G2OD, was velopment company.

astonished on the morning of October 16 to hear the Morsc call sign of Z4AG, calling up U6ARB, an American amateur station with which he was apparently in communication. Hc realized that for the first time an English station (home-made Radio messages across the world. They and with ridiculously small power) had got a message across thirteen thousand

The first tramp steamer to be equipped Describing the feat, the secretary of with a Radio fitted motor lifeboat is the the Radio Society of Great Britain said: Geraldine Mary, recently designed and E. J. Symonds, an amateur living near built for the Anglo-Newfoundland De-

#### Site for England's Super Power Station Determined

LONDON .- Britain's new super power broadcaster, to take the place of 5XX at Chelmsford (which was never intended to be more than an experimental station), is likely to be erected at Northampton.

The British Broadcasting company's engineers have examined several other suggested sites, and a final decision will be made shortly.

The new station will have a transmitting power of at least 25 kilowatts.

#### Walter Johnson at KHJ

LOS ANGELES, Cal.—The mighty Walter Johnson took his turn in the broadcasting studio of KHJ here recently. In a two minute speech, he expressed the desire to settle down in California when "finis" is definitely written to his major league career.

# Effarsee for Better Reception

YOU get less noise and more music on an Effarsee Portable Antenna. It brings in stations from coast to coast on sensitive sets, and very good volume and distance on other sets.

It stops all aerial troubles in congested places and makes it easy to install a radio set. It reduces static and improves the tone. Used in series with an outdoor aerial it stabilizes and improves the signals. Every set owner should have one for nights when static is bad.

In apartment houses Effarsee can be put under the rugs. Dealers are using them for demonstrations.

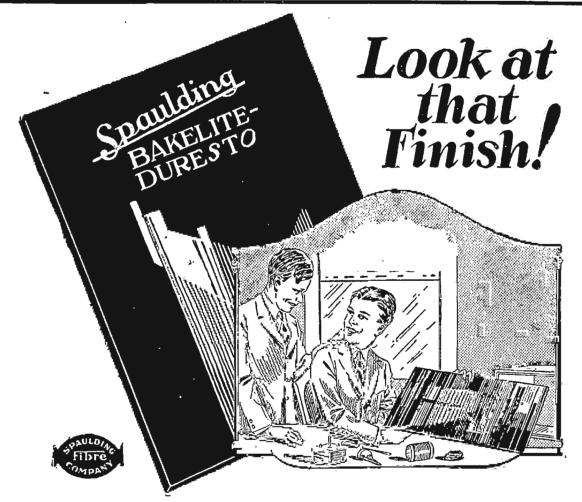

#### Three Sizes: \$1.00, \$1.50 and \$2.50

If your dealer cannot supply you, write us direct-money back if notsatisfied.

Jobbers and Dealers: Effarsee is going big this year and offers a real profit opportunity.

The Fishwick Radio Co. Edwards Bldg., Cincinnati, Ohio

#### Headliners of the Week

LL THE excitement of the jungle with none of the danger may be had by dialing for WFI, Saturday at 4 p. m. A microphone will be placed in the Zoo and C. Emerson Brown, the superintendent, promises to make the hyena laugh, the monkey squeal, the lion roar and the rattler rattle. An interesting program by another Philadelphia station will be broadcast in the evening. Negro songs, by negro composers, rendered by negro musicians, will be heard at WIP. Football fans will enjoy hearing the seven "old timer" football players and coaches who will talk at

Sunday evening the Western and Southern orchestra, directed by William Kopp, will put on an unusually fine program. Dan Beddoe will be the soloist.

Do not be deceived Monday, if you hear lectures and talks in Italian, German, Bulgarian or Hungarian. WOC and WEEI are only trying to be heard in Europe. These talks in various languages will continue through the week. Many special programs for international reception will

be featured by other stations. America wants only the best to travel across the seas.

Tuesday night, KSD will entertain with music and specialties from the Grand Central theater. Milton Sachs reading of "Mrs. Rastus on the Telephone," will amuse you at WSAI, Cincinnati.

WGR is featuring this Wednesday, Gertrude Hutchinson and her assisting artists in an international test program. Notice the photographs above and set your dial at 319 meters.

Garcia Guerrero, the famous Chilean pianist, who left his home in the southern hemisphere to become a member of the faculty of the Toronto Conservatory of music, will play at WGY, Schenectady, Thursday. Ferdinand Fillion, the violinist, will also appear on the program.

'On Jhelum River," a pleasing Kashmiri love story set to music will be sung at CNRT, Toronto, Friday by Hazel H. Vandervoort and Arthur E. Vandervoort. Cora DeFoe, whose smiling face may be found on the next page, will also help to make the evening pass merrily with her funny

# U. S. STATIONS TO TRY FOR INTE

#### Where to Hear Concerts

Central Standard Time

#### TUNE IN TONIGHT TO **BOYD BUNCH AT WGR**

Nisten for that piano at WGR, Buffalo! This is Boyd Bunch, ivory pounder and featured artist of the Vincent Lopez Hotel Startler Dance orchestra, for the week of November 24. The piano will be prominent that week under the new plan of Harold Gieser recently announced in the Digest; the idea being to help the Radio audience to distinguish various instruments in any orchestra and make the audience better acquainted with its entertainers. Boyd Bunch is more than six feet, husky and-well! Look at his picture! See the program pages for the time this orchestra is on the air. Then, listen for that Colegrove Studio, Buffalo. piano!

International Four, Florence Wasson, aoprano; Jean Browne, contraito; James Blair, baribone; Sam Roberts, tenor; solors, duets, quartette numbers.

YWJ, Detroit, Mich. (Central, 517), 7 a. m., setting-up exercises, R. J. Horton; 8:30, tonight's dinner and a special talk, woman's editor; 8:45, Public Health hulletin and talks; 6 p. m., the Detroit News orchastra; Charles Coats bartione Charles Coats, baritone.

CKAC, Montreal, Can. (Eastern, 425), 8:30 p. m., Frontenac Breweries.

CKY, Winnipeg, Can. (Eastern, 450), 7:30 p. m., Esperanto lesson; 8, CNRW program.

KDKA, E. Pittsburgh, Pa. (Eastern, 326), 12:15 p. m., iuncheon concert, Scaizo's orchestra; 6:30, dinner eoncert, KDKA, Little Symphony orchestra; 7:15, chil-

iuncheon concert, Scalzo's orchestra; 6:30, dinner eoncert, KDKA, Little Symphony orchestra; 7:15, children's period; 7:30, address, representative of the Pittsburgh Automobile club; 8, program, National Stockman studio; 8:30, concert; 11, concert, Pittsburgh Post studio.

KFI, Los Angeles, Calif. (Pacific, 469), 5-5:30 p. m., Evening Herald news items; 5:30-6, Examiner concert and news Items; 6:45-7:30, Y. M. C. A. program; 7-8, Don's Melody Makers, dance orchestra; 8-9, Ambassador Hotel concert orchestra; 9-10, Examiner

bassador Hotel concert orchestra; 9-10, Examiner Thanksgiving program; 10-11, special Thanksgiving

bassador Hotel concert orchestra; 9-10. Examiner Thanksgiving program; 10-11, special Thanksgiving day program.

KFMQ, Fayetteville, Ark. (Central, 263), 7:30 p. m., "How to Make the Loafing Tree Bear," J. R. Cooper; "Electricity on the Farm," W. B. Steizner; Real Estate for Everybody," A. W. Jamlson.

KFNF, Shenandoah, ia. (Central, 266), 12:25 p. m., special Thanksgiving service; 7:30, concert, Mrs. Margaret O'Connell, soloist; Minor Clites, pianist.

KGD, Oakland, Cailf. (Pacific, 312), 4-5:30 p. m., concert orchestra, Hotel St. Francis; 8, "The Servant in the House," KGO players; 10-1 a. m., dance program, Henry Halstead'e orchestra.

KHJ, Los Angeles, Calif. (Pacific, 395), 12:30-1:30 p. m., musicai program and news; 2:30-3:30, matineo musicaie; 6-6:30, Art, Hickman'e concert orchestra, direction Edward Fitzpatrick; 6:30-7:30, Prof. Walter Sylvester Hertzog, stories American history, Dedtime story, Unele John; 8-10, aocciai Thanksgiving day program, presented by Loa Angeles Soap company; 10-11, Art Hickman's dance orchestra, Earl Burtnett, director.

KYW, Chicaga, Ill. (Central; 536), 6:30, 7, 8 a. m., exercises; 9:30, news, reports; 10:30, Farm and Home aervice; 11:35, tabio talk, Annai J. Peterson; 2:35 p. m., afternoon frolic: 6:02, newa, roports; 6:35, bedtime atory, Uncla Bob; 7, concert, Congress hotel; 8, good reading, Rev. C. Pernin; 8:20, vnusical program; 9:15, "Safety Firat," Z. C. Elkin; 16'-11:30, at home program; Coon-Sanders Originai nighthawks.

WBAP, Fart Warth, Tex. (Central, 476), 7:30-8:30 p. m., dance program, Merle Monham'a orchestra; 9:30-10:45, program, Elena Munster.

WBBR, New York, N. Y. (Eastern, 273), 9:10 p. m., 1. B. S. A. string quartet; 9:20, violin duets; 9:30, Sunday school lesson, S. M. Van Sipma; 9:50, vloiin duets; 10, 1. B. S. A. quartet.

WCAE, Pittsburgh, Pa. (Eastern, 462), 3 p. m., Pitt-Penn State football game; 6:30, dinner concert, William Parts betal. Texts.

Sunday school lesson, S. M. Van Sipma; 9:50, vloind ducts; 10, 1. B. S. A. quartet.

WCAE, Pittsburgh, Pa. (Eastern, 462), 3 p. m., Pitt-Penn State football game; 6:30, dinner concert, William Penn hotel; 7:30, Uncle Kaybee; 7:45, concert, artists, Moores' eafeteria, Clarke'a Pennsylvanians.

WCBD, Zion, III. (Central, 345), 8 p. m., annual Thanksgiving band concert; G. R. Sparrow, tenor; Mrs. Blanche Reynolds Kesaler, reader.

WCCD, Minneapalis-St. Paul, Minn. (Central, 417), 6:30 p. m., dinner concert; 9, weather report, special Thanksgiving program.

WDAF, Kansas City, Mo. (Central, 411), 2:30 p. m., hroadcaating, play by play, of the annual Missouri-Kansas Thanksgiving day foothall game from Columbia, Mo.; 6-7, achool of the air; piapo tuning-innumher on tho Duo-Art: travclogue, Edgar Allen Linton; readings, Cecile Burton; tha teli-me-a-story lady; music, Hoetl Muehlehach Trianon enaemhle; 11:45-1 a. m.,' Nighthawk frolle, tha "Merry Old Chlef" and tho Plantation players, Eddie and Bobbia Kuhn's K. C. A. C. orchestra.

WEAF, New Yark, N. Y. (Eastern, 492), 1:45-4\$15 p. m., Cornell-University of Penneylvania football game; 4:16-4:30, Minnie Weii; 6-7 dinner music, Waldout-Astoris

hotel; 7-7:30, services, Greater New York Federation of churches; 7:30-7:50, Winlfred Bauer, planist; 7:50-8:30, Hohner Hermony Four; 8:30-9, Pockard Motor Car company; 9-11, Columbia Syracuse Glee club; 11-12, Vincent Lopez and his Hotai Pennsylvania

Car company; 9-11, Columbia Syracuse Glce club; 11-12, Vincent Lopez and his Hotal Pennsylvania orchestra.

WEAD, Columbus, Ohio (Eastern, 294), 11 a. m., Charlene Clancy, planist; Mirs. Heien Herbison Stevenson, soprano, from Marguerlte Manley Seidal School of Music; 1:15 p. m., Mirs. Lavine Andrews, planist; Mirs. Marjorie Allenbaugh, sopreno, from Seidel aclool; 8 p. m., chimes program, Prof. A. P. Mc-Manigal; talk; musical program.

WEBH, Chicaga, III. (Central, 370), 7-8 p. m., Oriole orchestra; Leota Loobs, aoprano; musical bits, Riviera theater; 9-10, Oriole orchestra; Belle F. Cutter, soprano; golf losson, Amber Andrews; songs, Nick Lucas; 11-12, Herry Davis, tenor; Oriole orchestra; songs, Nick Lucas; Edgewater Beach hotel late revue.

WEEI, Boston, Mass. (Eastsrn, 303), 6 p. m., dence selections, Jack Renard and his Mansion Inn orchestra; 7, Boston Edison Big Brother club; 7:30, musicale; 8:30, program, Greater Boston Foderation of Churches; 9-10, program from WEAF.

WFAA, Dallas, Tex. (Central, 476), 12:30-1 p. m., address, Charles E. Osborna; 8:30-9:30, Walter J. Fried, violinist; 11-12, Adolphus hotel orchestra.

WFI, Philadelphla, Pa. (Eastern, 395), 8 p. m., epcelal Thenksgiving musicale.

WGN, Chicaga, III. (Central, 370), 12:30-2:30 p. m., Draka concert ensemble; Blackstone string quintet; 6:30-8:30, Drake concert ensemble; Blackstone string quintet; 10-11, dance program, Drake and Bleckstone orchestras.

quintet; 10-11, dance program, Drake and Bleckstone

quintet; 10-11, dance program, Drake and Bleckstone orchestras.

WGR, Buffalo, N. Y. (Eastern, 319), 12:30-1 p. m., Georga Albert Bouchard, organist; 2:30, Buffalo Courier and Enquirer musical progrem; 10-10:30, Lew Ferris, popular songster, tha 'Eiffel Tower of Radio,' in international tests; 10:30-11, concert, Bertha Drescher and assisting artists in international tasts.

WGY, Schenectady, N. Y. (Eastern, 380), 1:45 p. m., football gama, Cornell-University of Pennsylvania, from Philadelphia; 6:30, dinner music, Hotel Ten Eyck orchestra, Albany; 7:45, naw book chet, William F. Jacob; 8, recitai, planist, violinist, by courtesy of National Carbon company.

WHAS, Louisville, Ky. (Central, 400), 4-5 p. m., Aiamo theeter orchestra; 7:30-9, concert, auspices, Mrs. Jane Webster Murrell; specialty numbers, Russell Robinson and Al Bernard.

Webster Murrell; specialty numbers, Russell Robinson and Al Bernard.

WHB, Kansas City, Mo. (Central, 411), 2-3 p. m., ladles' hour program, Sweeney Radlo trio; 8-9, program given by the Ott's boys' band of llathe, Kans.

WIP, Philadelphia, Pa. (Eastern, 509), 3 p. m., piay by play description of Penn-Cornell footbai gama; 6:05, Art Coogan and his Club Madrid dance orchestra; 8, "Where to Go and How to Get There," Gene Hogie, secretery of Automobile Club of Philadelphia; 8:15, recital, Maunder's "Song of Thanksgiving," choir of St. Matthew's Episcopal church; 10:05, Harvey Marburger and his vaudeville dance orchestra.

choir of St. Matthew's Episcopal church; 10:05, Harvey Marburger and his vaudeville dance orchestra.

WIAX, Cleveland, Dhio (Eastern, 390), 7 p. m., Mrs. Wanda C. Bontrager, readings, "Recessional" (Kipling), "When tha Frost Is on tha Pumpkins' and "Griggsby's Stetion" (Riley); 7:15, Vincent H. Percy, organ recitai, Clevelend Public Auditorium; Ted Robinson, "Philosopher of Folly" of Cleveland Piain Dealer, original verse; Loew's State theater, special Thanksgiving musical program.

Thanksglving musical program.

/JZ, New York, N. Y. (Eastern, 455), 10-10:20 a. m. WJZ, New York, N. Y. (Eastern, 455), 10-10:20 a. m., housewives' leagua menu, Mrs. Jullan Heath; 10:20-10:30, Review of Reviews; 10:30-10:40, Bride's Household Linen, Editor of Naedia Art; 10:50-11, fashion talk, Eleanor Gunn; 1-2 p. m., Nathan Abes' Hotel Pennsylvania orchestra; 4:30-5:30, Bernhard Levitow's Hotel Commodora tea orchestra; 7-8 Bernhard Levitow's Hotel Commodore orchestha; 8-8:10, Wali Street Journai review; 8:10-8:30, N. Y. U. Air coilega; 10:30-11:30, Weldorf-Astoria dance orchestra. WKAQ, San Juan, P. R. (Intercolonial, 360), 8:30-10 p. m., musical concert, Cafe-Restaurant, "La Cafetera." WLS, Chieago, III. (Central, 345), 12-1 p. m., noonday musicai program; 6:30, Ralph Emerson, organist; 7, lullaby time, Ford Rush, Glenn Roweii; 7:15-8, musicai program.

lullaby time, Ford Rush, Glenn Roweii; 7:15-8, musical program.

WLW, Cincinnati, Ohio (Central, 423), 9 p. m., Doherty Melody orchestra; Wendeil Hali; Milnor instrumental trio; 10, international test slient hour; 11, Doherty orchestra.

WMAQ, Chicago, Ill. (Central, 447.5), 6, Chicago theater organ recital; 6:30, Hotel LaSaile orchestra; 8, Hotel LaSaila orchestra; 8:55, lecture; 9, musical program, WMC, Memphis, Tenn. (Central, 500), 3 p. m., musical program, Powell Stamper of Jonesboro, Arkansas; 8:30, classical program, Mrs. Louise Bowen.

WMH, Cincinnati, Ohio (Central, 309), 8 p. m., songs, Bernard and Robinson; organ recital, Kurt Kenkel; 9, Avon danca orchestra.

Avon danca orchestra.

WDAW, Dmaha, Nebr. (Central, 526), 6 p. m., every child's story hour, Graca Sorenson; 6:30, dinner concert; 9, 17th U. S. Infantry band, Herman Webel, bandmaster.

WDC, Davenport, Ia. (Central, 484), 9 p. m., Palmer School Radio orchestra, Erwin Swindeli, eonductor; messages of greeting in foreign ianguages, S. Fuenies, Spanish; Bert Ekeuhnei, German; Theodore Viadeff, Butterion

Spanish; Bert Ekeuhnei, German; Theodore Viadeff, Buigarian.

WÖR, Newark, N. J. (Eastern, 405), 7-7:30 a. m., WOR gym eiass; 2:30-2:45 p. m., Emma Johnson, contraito; 3-3:15, Emma Johnson; 6:15-6:30, "Radio for the Layman," Albert E. Sonn; 6:30-7:15, Jimmie Lent and his Famous Society orchestra; 7:15-7:30, resume of the day's sports, Jolly Bill Steinke.

WQJ, Chicago, III. (Central, 448), 7-8 p. m., dinner concert, Ralph Williams and his Rainbo Garden orchestra; Ingram Cleveland, violinist; M. Rodriguez, tenor; Lydia Lochner, contralto; K. Synder, reader; speciel Thanksgiving day program; 10-2 a. m., Ralph Williams and his Ralnbo skylerks; Will Rossiter, "The Daddy of Them Ail;" Axei Christensen, planologues; Rosemary Hughes, soprano; Harmony singers; record artiste; vocal.

WRC, Washington, D. C. Eastern, 469), 6 p. m., children's hour, Peggy Albion; 7:45, talk on motoring, American Automobile association; 8, music; 8:30, talk, auspices, Smithsonian institute; 9:15, Lee Houss trio; 10-11, apecial program for transatlantic tests.

WSAI, Cincinnati, Ohio (Central, 309), 10 p. m., speciai Thanksgiving program arranged by Mrs. Adolph Hahn; songs, Bernard and Robinson.

WTAM, Cleveland, Dhio (Eastern, 390), 6 p. m., Guy Lombardo's Royai Canadians orchestra.

WTAY, Dak Park, III. (Central, 283), 6:45-7:45 p. m., Paari Jarret, pienologues; Leon Switzer, barltone; Edward Barry, planiat; 9-9:45, 10:15-11:15, Ellen Converse, soprano; Roiend Hinkle, tenor; Guyon's Paradise Balroom orchestra.

#### Friday, November 28

Friday, sitent night for: CKAC, KFMQ, KPO, PWX, WBBR, WEAD, WHAA, WHAZ, WJAX, WKAQ, WLW, WMH, WOI, WRBC, WRC, WTAM, WSAC,

WSAI.
CNRT, Toronta, Can. (Eastern, 400), 8:30 p. m., "On Jhelum River." a Kashmiri iove story: Ashoo, Hazel Hali VanderVoort; Soubahna, Arthur E. VandarVoort; Avey Ciarke, accompanist; "What Canada Must Do to Attract the Scottish Settiers," James Reid; Senora Deminguage soprano: Cora DeFoe. reader; Mabei F.

Avey Ciarke, accompanist; "What Canada Must Do to Attract the Scottish Settiers," James Reid; Senora Dominguez, soprano; Cora DeFoe, reader; Mabei F. Downing, harpist.

KDKA, E. Pittsburgh, Pa. (Eastern, 326), 6:30 p. m., organ recital, Samuei Winters Eilotson; 7:15, children's period; 8, feature; 8:15, educational course, University of Pittsburgh studio; 8:30, concert.

KFAE, Pullman, Wash. (Pacific, 330), 7:30 p. m., Ivar Melander, planist; "Essentials of Successfui Farm Management," Gsorga Saverance; health talk; "December and Farm Crops," L. Hagnauer; survey of new books, Alice L. Webb.

KFI, Las Angeles, Calif. (Pacific, 469), 5-5:30 p. m., Evening Herald, table talk, news; 5:30-6, Examiner nows and markets; 6:45-8, organ recitai from Aaolian pipa organ studio; 8-9, Walt Widmayer's orchestra; Virginia Hoffman, contralto; 9-10, Examiner concert; 10-11, vocal recitai, Myra Beli Vickars; 11-12, Abe Lyman's Coecanut Grove orchestra.

KFNF, Shenandaah, Ia. (Central, 266), 7:30 p. m., musical program, Dr. J. W. Sellarda orchestra.

KHJ, Los Angeles, Calif. (Pacific, 395), 12:30-1:30 p. m., program of news and music; 2:30-3:30, matinea musicale; 6-6:30, Art Hickman'a concert orcheatra, Edward Fitzpatrick, director; 6:30-7:30, weekly visit Richard Headrick, cereen etar; bedtime story, Uncla John; 8-10, program presented by Globe lee Cream company; 10-11, Art Hickman's dance orchestra, Earl Burtnett, director.

KDB, State College, N. Mex. (Mauntain, 360), 7:30-

KYW, Chleago, III. (Central, 536), 6:30, 7, 8 a. m., exarcleses; 9:30, news, reports; 11:35, table talk, Anna J. Peterson; 6 p. m., news, financial reports; 6:35, bedtime story, Uncia Bob; 7, dinner concert, Congress hotal; 7:30, program from Duncan Sisters Publishing company; 8:20, speechas, Auarican Farm bureau; 8-245 a. m., midnight revue; Coon-Sanders Original nighthawks; organiogue, W. Remington Welch.

WBAA, Foncert Collimania Symphony orchestra, F. R. Walthal, direct; 9:30-10:45, Butchers' School of Hawaiian music, with a symphony orchestra, F. R. Waithal, directly 9:30-10:45, Butchers' School of Hawaiian music, Philadelphia, Pa. (Eastern, 462), 6:30 p. m., dinner concert, William Penn hotal; 7:30, Uncia Kaybee; 8, special feeture; 8:15, special feature; 8:30, music program, Oswald Johns, Wolsh baritone.

WCCO, Minneapolis-St. Paul, Minn. (Central, 417), 9:30 a. m., news builetins; daily program; 10:45, home eerviee, "Are You Underweight," Betty Crocker; 2 p. m., woman's hour, "The Child's Right to Health and Character," Caroline Crosby, executive secretary Child's Protective Scolety, arranged by Community Fund; 2:30, musical program; 4, megazine hour; 6:30, children's hour, Tess Cooperman; 6, sport hour; 6:30, children's hour, 1:30, ecture; 9, weather report; musicei program, Norwegian Male chorus and solists.

WDAF, Kansas City, Mo. (Central, 411), 3:30-4:30, p. m., the Star's string trio; 6-7, school of tha air, plano tuning-in number on tha Duo-Art; address, speaker from the Kansas City Children's bureau' tha tell-me-a-story lady; musical program; 9, program from Philadelphia,

phia Zoological gardans; 6:30, Meyer Davis Bellevue Stratford concert orchestra; 7, Sunny Jim, tha kiddles' pal.

WGN, Chicago, III. (Central, 370), 1:40 p. m., luncheon music, Draka eoncert ansembla, Blackstona string quintet; 2:30-3, Lyon & Healy concert liali; 3-3:30, Rocking Chair tlme; 5:30-5:57, Skeezix tima for children; 6-6:30, Lyon & Healy organ recitai; 6:30-7, Drake concert ensemble, Blackstona string quintet; 8-9, musicai; 10-11, Jack Chapman's danca orchastra; Don Bestor's Blackstone orchestra.

WGR, Buffala, N. Y. (Eastern, 319), 12:30-1 p. m., Georga Albert Bouchard, organist; 2:30, Buffaio Courier and Enquirer musical program; 6:30-7:30, dinner music, Vincent Lopez Hotel Stetler orchestra, Haroid Gieser, directing; 9-9:30, Miss Marion Shaw, planist; 9:30-10, eoncert, direction of G. A. McCauiley, Ridgaway, Ont.; 10-11, concert, Buffalo Trust company, direction of Ceclle Kertz; 11, supper-dance music, Vincent Lopez Hotel Statier dance orchastra, Haroid Gieser, directing.

WGY, Schenectady, N. Y. (Eastern, 380), 12:30 p. m., atock report; 12:40, market report; 12:45, weather; 2, music, "Home Lighting Effects," Walter A. Bowe; 6, market quotations, news; 6:30, bedtlime stories; 7, international Sunday school lesson; 7:45, health talk; instrumental selection, WGY orchestra; 8, eonedy drama, "The Parish Priest," WGY players: 10:30, program, WGY orchestra; xylophone soloist, Raymond Bentz; address, C. M. Ripley.

WHAS, Louisville, Ky. (Central, 400), 4-5 p. nl., Alamo theater orchestra; 7:30-9, concert, Standard Sanitary band.

WHN, New York, N. Y. (Eastern, 360), 2:15-2:45 p. m., Wal Wilson's orchastra; 4:45-5, Uncio Robert's chat; 5-5:30, Alia and his orchestra; 6:30-7, Alamae hotel orchestra; 7-7:30, Club Richman; 9:30-10, Crystal Palaca orchestra; 10:10:15, fashion chats, Mme. Belle; 10:30-10:45, Club Madrid orchestra; 10:45-11, Arthur Bail, tenor; 11:30-12, Club Alabam; 12-12:30 a. m., Parody club.

WHD, Des Moines, Ia. (Central, 526), 7:30-9 p. m., The Williamson brothers. guitarists: Mrs. Kate

Bail, tenor; 11:30-12, Club Alabam; 12-12:30 a. m., Parody club.

WHD, Des Moines, ła. (Central, 526), 7:30-9 p. m., The Williamson brothers, guitarists; Mrs. Kate Mliier, whistler; Mrs. Maude Huges, accompanist; North High trio, Franklin Kagy, cellist; Arthur Cohen, violinist; Hoyt Irwin, pianist.

WIP, Philadelphia, Pa. (Eastern, 509), 1 p. m., Gimbel tea room orchestra; 3, recital, students of Frank Oglesby studio; 6, Harvey Marburger and his Vaudeville dance orchestra; 7, Uncie Wip's bedtime storios.

WJZ, New York, N. Y. (Eastern, 455), 10-10:20 a. m., housewives league menu, Mrs. Julian Heath, 10:20-10:40, "Books," Grace Isabel Colbron; 10:40-10:50, "Arts and Decoration," Mrs. Mary Roberts; 10:30-11:30, Duke Yeliman and his Irene Castle orchestra.

WLS, Chicago, Ill. (Central, 345), 12-1 p. m., Book Farmer series, G. C. Biggar; 3:45-4:45, homemakers hour; taik on children, Mrs. Emma Cornweil; talk, "Work of Chicago League," Susan Murphy; 6:30, Ralph Emerson, organist; 7, lullaby time, Ford Rush and Gienn Rowell; 7:20, musle numbers; 7:30, Isham Jonee and his College Inn orchestra; 7:45, visiting telent; 8-9, talk, C. V. Gregory; 9, Saddler feature; 9:30, music numbers; 10:15, music numbers; 10:30, Isham Jones and his College Inn orchestra; 10:40, Ford and Gienn time.

WMAQ, Chicago, Ill. (Central, 447.5), 12:25 p. m.,

orcheetra; 10:15, music numbers; 10:30. Isham Jones and his College Inn orchestra; 10:40, Ford and Glenn time.

WMAQ. Chicago, III. (Central, 447.5), 12:25 p. m., Y. M. C. A. forum; 4, talk on English, Alexandra C. Jenkins; 4:30, pupils of Bush conservatory; 6, Chicago theater organ recital; 6:30, Hotel LaSalle orchestra; 8, wide-awake club program; 8:30, muslcal geography; 9, Christian endeavor topies; 9:15, musical program. WMC, Memphis, Tenn. (Central, 500), 8:30 p. m., concert by Britling's Novelty orchestra, Frank Bracciante, director; 11, midnight frolle.

WOAW, Dmaha, Nebr. (Central, 526), 6 p. m., story hour, Doris Ciaira Secord; 6:30, Harry Brader, violinist; Frank Strawn, planist; 7, Pat's Melody boys; 9, program, Prof. Frank Buckingham; 10, music; 10:30, danca program, Brandels tea room.

WDC, Davenpart, Ia. (Central, 484), 7:20 p. m., educational lecture; 9, Murray Family orchestra; Lu Reno Teed, planist; Prof. W. F. Vesely, trombonist; messages of greetlng in foreign ianguages; Joseph Jurecz, Hungarian; Sara Peterson, Swedish.

WDD, Philadalphia, Pa. (Eastern, 509), 11 a. m., organ recital, Mary E. Vogt; 12:02 p. m., Wanamaker erystal tea room orchestra, Robert E. Golden, director; 5:15, organ recitai, Mary E. Vogt; 7:30, A. Candelori and hia Hotel Adelphia concart orcheatra; 8:20, Erno Rapee and his speelal concert from Fox theater; 9:30, recitai, Harrist G. Ridlay; 10:03, organ recital, Mary E. Vogt; 10:30, Vincent Rizzo and his Hotei Sylvania dance orcheatra.

WQJ, Chicaga, III. (Central, 448), 11 a. m., Fred Mann

oreheatra.

WQJ, Chicaga, III. (Central, 448), 11 a. m., Fred Mann and his Sunday dinner menu; 3-4 p. m., talk, Sarah Place; travelogue, Mrs. H. T. Sanger; 7-8, dinner concert, Raiph Wiiliams and his Rainbo Garden orchastra; Marldaan Borresen, baritone; Dorothy Schubert, soprano; 10-2 a. m., Raiph Williams and his Rainbo akyiarks; tha Verdi trio, instrumental; Rogera boys; Nubs Allen, contraito; Ziegler sisters; June Lee, soprano; O'Flannigan and O'Hara, the two Frenchmen.

wWJ, Detroit, Mich. (Central, 517), 7 a. m., setting-up exerciaes, R. J. Horton; 8:30, tonight'e dinner and a apecial taik, Woman'e Editor; 8:45 a. m., public health eervice buliatin and talk; 2 p. m., the Detroit News orchestra; 6, the Detroit News orchestra; 5, the Detroit News orchestra; Etilian E. Hoffman, pianiet; John Watt, tanor.

# "Low Loss," What It Is and Why

By Jacques Fournier

NANY readers, all of the columns of printed matter on low loss coils and low loss condensers may seem to be a great deal of hullabaloo about a very small and comparatively unimportant factor. It may seem to many that the actual gain resulting from paying strict attention to all of these little details does not result in sufficient gain to warrant the winding of special coils and the choosing of unusually efficient condensers. The results of some tests recently made will readily prove that these losses are all important for selectivity and signal strength.

Low Loss Tests

A fairly low loss coil, and a condenser that may be considered about average, were connected in series with a resistance box and a thermal ammeter. The coil was then placed close to an oscillating circuit adjusted to a wave length of 400 meters. The resistance box enabled the experimenter to insert more or less resistance in the circuit, exactly as it is present in a Radio frequency circuit when resistance due to poor construction is found. The condenser was then swung through the scale of wave lengths from 350 to 450 meters; the oscillator being left at 400 meters. The resulting curves were rather startling, for with no resistance inserted the thermal ammeter registered 82, while, with one ohm inserted the meter registered but 65. When 5 ohms were placed in the circuit the meter would basket coil show a maximum of only 38. This procedure was continued until 25 ohms had been inserted, at which point the meter registered but 8 and the curve was so broad that a similar circuit in a receiver would be useless in a congested area.

purely theoretical to the practical, the ing the coils will cover coils used for any resistance of a well-known low loss con- purpose in a receiver. This unit will have denser was measured and found to be .02 a large fixed secondary coil with a rotor

DETAIL OF COIL MOUNTING PIECES PANEL 2 REQUIRED Figure 3.

Plainly, such a coil would reduce the efficiency of a Radio frequency circuit a

The type of inductance known as the basket coil has the lowest losses of any type now used in Radio, and while such a coil is somewhat delicate and must be handled with care, it is not hard to make and mount behind a panel.

We will take up the construction of a tuning unit suitable for use in a regenera-Transferring the experiments from the tive receiver and the instructions for wind-

found that the resistance had been in- intersections. Dowel rod can be obtained creased .8 ohm. A coil wound on a solid at any lumber yard %-inch in diameter tube was then tested and it was found and nine pieces should be cut 5 inches that its resistance was 4 ohms more. long as shown in Figure 1. One end of each of these pieces should be slightly rounded off with a file so that the rod will slip into the holes in the baseboard readily. Before inserting these rods they should be smoothed down with fine sandpaper so that when finished our coil will slip off without trouble. The rounded end of each rod is now coated with glue to a height of 1 inch and the rods inserted in the holes.

clear by reference to Figure 3-a; the wire being number 14 dcc. The starting end this shape. It will be noted that this of the wire is denoted at A and the wire piece is exacly the same shape and size passes outside of the rod B, inside of G, outside of C and inside of H. Since we of the dowel rods passed through in have an uneven number of rods, the wire will pass outside of the alternate rods on be slipped through the large coil at the the second turn and the resulting outline point where rod D was located, so that of the coil is a nine-pointed star. It will the ends of the coil will be at the rear be found most convenient to slip the wire loosely around four or five pegs and then slide it down toward the bottom. This winding is continued until 54 turns have

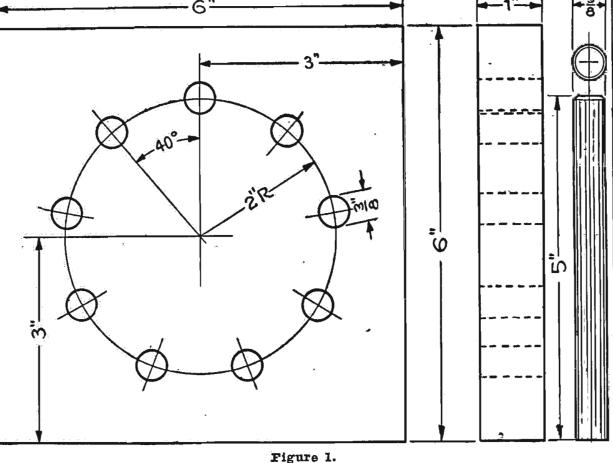

been wound on the pegs. It will be noted " that there are nine intersections of wire between the nine rods and at these nine points a piece of heavy thread or string should be tied lengthwise around the wire; that is, it should pass from one end to the other on the outside of the coil over the wire at each end and then down inside the coil. This will hold the turns tightly together at nine points and it will be found that with a little maneuvering and bending of the dowel rods the coil can be slipped off of the form at one end.
No cement or collodion mixture of any kind should be used on this coil as we are trying to keep losses at an absolute minimum.

The two smaller coils which will form the rotors at the end of the large coil will now be taken up. The form is similar in construction to that used for the secondary, except that the dimensions used in Figure 2 are to be followed and 4-inch dowel rod used. These smaller coils are to be wound with number 18 double cotton covered wire and one is to contain 18 turns while the other should contain 10 turns. The 10-turn coil is the primary. These smaller coils having been wound and tied up with heavy thread, as was the large one, we are ready to mount them into a single unit.

Assembly of Unit

The complete assembly is shown in Figure 3, the small numbers connected to each piece by arrows indicating the small part, details of which are shown in Figure 3. Item 1, which is the spine or backbone in the construction, should preferably be made of hard rubber or bakelite, but can also be made of hard The method of winding will be made wood soaked in paraffin if the builder does not have the tools to work bakelite into as the opening left in the coil where one winding. It is suggested that this piece and handy for connection.

#### Announcing Call Letters

If Station Is Not Known Interest Is Lost

THERE has been much said about announcing station call letters that it appears impossible to say more, yet announcers at many stations fail to take heed and give their call letters or station's name. Most of the thrill comes from getting a certain station and then to hear its fine program. Stations have sent out broadcasts for an hour at a time without any mention whatever of its call letters. It can be readily understood that a lecture or a discourse by a minister takes from twenty minutes to a half hour and when broadcast there is not much chance for the call letters to be sent out on the air. Even at that ministers and lecturers have brought it about in their speeches so that the station's name was mentioned purposely to acquaint the listeners of the person speaking and the locality of the broadcasting station. This is much appreciated. However, the whole discourse or service need not be sent out without being interspersed with the station's name or call letters. To substantiate our position in this matter we herewith present a typical letter, hundreds of which from our readers:

"I would like to ask why so many announcers in our broadcasting stations fail utterly to give their call letters or location before and after each number on the program. They apparently take for granted that all who are tuned in know where the Radio message is coming from. Now, I think it is far more interesting to know the station's location, but I have waited sometimes for twenty minutes and then failed to find out "where I was at;" for all I got, many times, was something like this: 'The next number on our program will be, etc. Miss Smith's next offering will be, etc. You will now hear "Jasboo Orchestra" play, etc. This concludes our program for the evening, good night.'
"I cannot understand how an announcer can be so

lax—but there are many of them. I am glad to say that the Chicago stations, as a rule, are free from this criticism and I am hoping the offenders will pattern after them. Perhaps a word or two from you, editorially, would help a whole lot .-- J. M. W."

We would suggest, for each station's good, that this important part of the announcing is not forgotten. Let the listener know who is broadcasting and he will give you better support.

#### Standardization of Parts

Means Sought to Bring About Unification

OFFICIALS and engineers of the U. S. bureau of standards are seeking means to effect the manufacture of standard Radio parts. It is the first step made toward unification of the industry throughout the country.

At present each manufacturer has his own measurements for apparatus that is used generally in as many forms as there are producers. Standardization of such parts would reduce their cost and make replacements easier.

Taking note of the advancement made in the automobile and other similar industries through the agreement of the manufacturers for standardization of their parts, some Radio producers have already signified their willingness to achieve the same results in their industry.

Conferences have been held, with the officials of the bureau of standards taking part, and more are expected to come.

It is only after certain important parts have been standardized that the Radio industry will be in a position to produce apparatus on a large quantity basis. At present each manufacturer is virtually for

#### Recognize Station by Sound Oddities Tell You Who You've Tuned In

THIS may be called mental telepathy but what-ever it is, one may recognize a station by the way it tunes in. To the novice such keen auditory perception is unbelievable, but to one who knows his set and understands how to handle it, the trick is play with your Radiola and don't bother mc. simple.

\_3 .<u>~~~~</u>

#### RADIO INDI-GEST

#### Father Makes a Radio

Father answered every ad in every magazine; Copied every hook-up that this world had ever seen; Neutrodyne and superdyne and every kind of dyne. His workshop was a junkshop, his high ethereal shlne; HIs bench was strewn with everything from rheostat

The layout of his panel was a second German map. But father worked on unabashed—he had an end in

He'd have a wonder Radio that no one could outdo.

For one whole month he labored hard, a Herculean feat, Then called a family meeting and announced it as

He hooked it to the aerial, he hooked it to the ground, He hooked it to his A's and B's and turned the dials

At first there wasn't anything, and then an awful howl, A cross between a buzz-saw and a hootin', tootin' owl. Then twenty thousand cannon seemed to hammer in the phones,

While fifty thousand dishpans were a-rolling on the stones.

When everything was at its worst, the old world seemed at bay,

Willie says, "Gee, listen, Pa, I made a set today." He brought it in and hooked it up, 'twas wonderful, that's all:

It brought in all the DX with each station's clear-cut

The music came like tinkling bells, so soothing to the While Pa got so much smaller that they feared he'd

disappear. 'Each generation has its fun," said mother with a

"Why, John, you know when we were young we had the phonograph!"

#### Mrs. Partington Speaks Out

Dear Indi: Mrs. Partington says that in Radio Digest a party who lives at a place that wasn't Radio made it famous, is blaming his crystal set for some "stunts

with Radio," and she says that if this fan will clip his article and mail it to "The Hired Hand" at Station WBAP, he will receive a very appropriate document by return mail. Mizz Partington says there's nothing mysterious about disconnecting the wires from your set and still getting a concert. She says she has often turned the lights out in her set and listened to KDKA coming in strong and clear. No mystery, either, just her nelghbor's "Hot-water Cant" set across the street. She says she had a letter from a fan in Pensacola, last winter, who wrote her that on his 8-tube Super-

Het, he always got next week's programs, this week, but your correspondent was able to hear, with one ear, in daylight, the buzz of a time signal across two time zones, with his tubes dark and turned off-thirty days before the signals were even made. He might have proved it on the bed springs, if he had found a bug "between the ticks." He says he had "accessories of all kinds," in his room, so naturally had the one kind that made his town "famous," that's all.

SIGNING OFF.

#### Slum Gullion

My friend and neighbor, yclept Doug, Was bit by the blankety blank Radiobug.

He bought a lot of plans and books, And sought himself some sheltered nooks In which to read this wordy stuff.

No matter, he had had his chance, But bit and dug into his pants To buy up the stuff he thought he needed, 'Till he felt that he'd been bleeded.

This and that in parts and truck. Spaghetti-and here it was his luck, To have his cook hean about this buy And sit her down to wonder why.

Anyway, he got everything That he needed to make the Radio sing; And worked all day for two or three, Even as Bill, and you, and me.

He finished it one afternoon And knew he'd best wait for the rising moon, The thing he'd made to properly try out And see if the books knew what they were talking about.

He ordered a cute collapsible loop Made like a funny hexagon hoop, For he wasn't going to chance a lightning fire From an outdoor aerial wire.

So that evening late he headed home To listen in to-maybe-Rome: But disappointment became his po'tion, And you can't imagine half his emotion,

For though, there set his nice new loop: His wonderful set was In the soup. 5XV.

Pa Knows Everything

"Say, paw, what does A. T. T. stand for?"
"'American Trade Trimmers.'" Now run along and THE THIRD TROMBONE PLAYER.

#### A Matter of Choice

#### Condensed

By DIELECTRIC

A regular feature on the program of WAHG is the appearance of Mr. Kaltenborn, associate editor of the Brooklyn Daily Eagle, whose timely comments are genuinely informing. It is an advantage to have at your command the means whereby such men may address themselves to you audibly. Their editorials may be read, but are more limited in scope.

So far as I can recall there have been very few features put out through Station WGY subject to adverse criticism. Whenever you tune to this station you will find good programs well Radiocast. Such was the case when the WGY male quartet sang in a group of carefully chosen numbers with intelligence and good voice. I like them, don't you?

To anyone not a resident of Chicago it might have been a question whether that city had a City Police band or not-until WEBH came on the air with it. There is one, as its spirited playing before Mike discloses to all listeners. What about encores; are they allowed?

The program director of KFKX showed his wisdom in selecting musicians from the First Baptist church of Hastings, Neb., to give enjoyment to all who would listen. There were violin and vocal numbers in variety sufficient to satisfy everyone. KFKX will appear here again.

Then the set brought in one of the Quaker City stations, WDAR. Unfortunately, at the time of getting this station a baritone was sorrowfully intoning the dirge: "It Had to Be You!" This sentiment found an echo near my set as we drifted away to other, and less popular (?) selections. Do you ever find classical music to be worn out?

WSAI was another "station stop," as they used to say on the day coaches when approaching a gettingoff place. There was a violinist for you, one of the do or die executionists! Verdi never meant any harm by writing music to "La Miserere." The harm comes from hearing it at the close of an evening's search for enjoyment—in vain.

Gimble Brothers are running a program of variety at their new station, WGBS, in New York city, which appeals to most every interest. Eddie Cantor was himself on the opening night, with his ready wit always on tap as announcer. Since, there was presented orchestra, chorus and description of "The Miracle," a stupendous production. We are indebted to WGBS for the privilege of hearing the music to it.

Some day, I suppose, this column will review English, French and African Radiocasts. Dielectric is pursuing a course in Zulu now. At present, however, the only stops outside the country are in Canada. If you have never "dialed" to Montreal, try it. CKAC will put you on to hear the Mount Royal orchestra from the roof garden. It's fine.

My membership in the Red Apple club was never recognized, though WCX is on the list for late sessions, so it isn't a reinstatement; I just dropped in on them. They not only are doing business but appear to be keeping right up to the latest in Radiocasting.

WEBH (a fine announcer they have) merits our salaams for choosing the Chicago university quartet to entertain us. Bring them on again Mr. Boniel and they'll get another hand.

# How to Build the Simplest Possible Super-Het

Part II—Wiring Instructions You Can't Mistake

By John G. Ryan

N WIRING this receiver, the first leads to put in are the filament connections. Looking at the layout, Figure 2, the binding post furthest to the right at the rear of the baseboard is the minus A; a soldering lug is slipped under the head of the screw holding it in place. A piece of bus bar wire is now bent so that it will go around to the right of the last tube socket and then to the left to the filament switch. Slip a piece of spaghetti tubing over this lead and solder one end to the lug on the binding post and the other to one of the switch ter-

Now lay a piece of bus bar along the front edge of the tube sockets; if it will not reach from socket 1 at the left to socket 7, solder on another short piece so that it will. Put a soldering lug on each right front binding post on each socket and bend them down at an angle. Solder one end of the long piece of wire to the lug on the first socket to the left, then cut a piece of spaghetti just long enough to reach from that point to the corresponding post on socket 2. Solder the long piece to that lug and slip on a second piece of spaghetti to cover the wire to the front right post on socket 3. Proceed across the board until each socket has the corresponding filament binding post soldered to the long lead with spaghetti between. A short wire is now bent and soldered to the long lead where it is soldered to the long lead where it is attached to socket 5; the other end is soldered to the second filament switch terminal. That completes the negative A

The Positive Circuit

The binding post at the back of the set and second from the right is the positive A. A wire is bent to pass between the audio frequency transformer and the C battery, then to the right of socket 6, over the .5 mfd. fixed condenser, to the rheostat. Slip spaghetti over this wire and, using soldering lugs, attach to the plus A binding post and to the rheostat. A long piece of bus bar is now connected to all sockets to the front left hand binding posts exactly as was the other except that the soldering lugs on the sockets are bent up. This will place the second long filament wire directly above the first.

Now run a short spaghetti-covered lead from the remaining rheostat terminal to this upper filament bus at the point where it connects to the left front post on socket 6 (counting from the left). The filament circuit is now complete and may be tested. Connect the 6-volt storage battery to the terminals marked "A Bat." Put all tubes in the sockets, turn the filament switch to "On" position and turn up the rheostat slowly. The tubes will glow dimly at first and, finally, with some brightness. If all tubes light, remove them and disconnect battery.

The potentiometer is now connected by running a short lead from its left binding post to the lower filament bus where it is attached to socket 4, and another from its right terminal to the upper bus where it is soldered to the binding post on socket 5. Each wire other wire is bent so that it passes from should be bent, covered with spaghetti this last-named binding post, between the and attached to a soldering lug. This leaves the center terminal to be connected

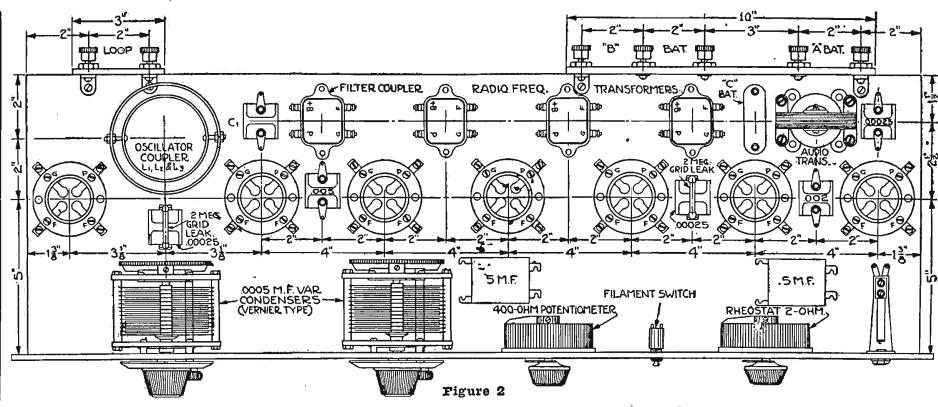

The Oscillator

coupler and condenser. It is usual for the manufacturers of super kits to enclose a diagram showing the proper conevery builder will probably have such placed between sockets 2 and 3. The rear

ered the cost of Radio.

10 South LaSalle St.,

from a 180 degree variocoupler on which the outer tube is 3½ inches in diameter, wound with two separate coils of number 24 silk covered wire. One winding contains 18 turns and the end nearest the edge is connected to grid (G) binding post of tube socket 1 and the stator (fixed) plates of the variable condenser at the left end of panel. This is inductance L-3 in the wiring diagram Figure 3. The end in the middle of the tube is connected to the right front binding post of socket 1 (the lower filament bus). The 8-turn coil is wound beside the 18turn coil.

The end of the 8-turn coil (L-1) nearest the second edge of the tube is now connected to the movable or rotor plates of the second variable condenser and to the right binding post of the two marked "Loop" at the rear edge of the baseboard. The inner end of this 8-turn coil is connected to the plus filament circuit at the point where the upper filament bus connects to the left front post on socket 2. The rotor of this oscillator coupler is 3 inches in diameter with 22 turns of number 24 silk covered wire. One end at this winding is connected, by spaghetticovered wire, to the rotor plates of the left hand variable condenser and to the terminal on socket 1 marked P.

A long piece of wire should now be bent so that, when one end is connected to the second terminal of this inner coil, the wire will lie close to and in back of the filter coupler and about 1 inch behind the Radio frequency transformers along the rear edge of the baseboard. A soldering lug is slipped on the terminal of the filter coupler marked B plus and this long wire is soldered to it. Spaghetti is slipped over this long lead and the free end is soldered to a lug on the center post of the three marked third Radio frequency transformer and the C battery, behind socket 6, then diagonally forward and to the right over the .002 condenser to the longest spring We will now take up the oscillator tube, on the upper jack. Slip spaghetti on this lead and solder to the center B battery post and the long spring on the jack.

It will be noted in Figure 2 that a fixed nections for the oscillator coupler, and mica condenser of .005 mfd. capacity is

Price

\$4.00

Quality is your protection.

Be sure that every vacuum tube you buy is marked RADIOTRON.

nected to the B plus binding post on the filter coupler. At the same time it would be well to connect the rear terminal of condenser C-1 to the B plus terminal of the filter coupler. The front terminal of the .005 condenser is connected to the lower (negative) filament bus wire where it is soldered to socket 2.

The Intermediate Amplifiers

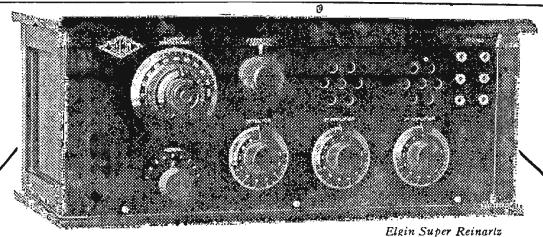

A long lead is now bent from bus bar so that, when one end is at the B plus terminal of the first Radio frequency transformer, it lies in back of the Radio frequency transformers, but close up against them and ends at the first or left hand post of the three marked "B Bat." A soldering lug is slipped on each of the B plus terminals on the Radio frequency transformers and the long wire just placed is then soldered to these lugs and to the B battery post with spaghetti be-

Slip a lug on the P binding post on the filter coupler and also on the P binding

a diagram. The coupler shown was made | terminal of this condenser is now con- | post of tube socket 2. A short wire can now be bent that can be soldered to these two lugs and to the front terminal on condenser C-1. Now connect G of the filter coupler to G on socket 3, P on socket 3 to P on the first Radio frequency transformer, G of this transformer to G on socket 4, P of socket 4 to P on second transformer, terminal G of second transformer to G on socket 5 and, finally, P on socket 5 to P on the third transformer.

Between sockets 5 and 6 is a grid condenser and leak. A short lead is now run from the G post on the last Radio frequency transformer to the rear terminal of this condenser; another wire should connect G on socket 6 to the front terminal of the grid condenser and its leak. Now bend a wire that it will connect the F binding post of this last Radio transformer with the left front post of socket 6 by going over the right edge of the grid condenser and leak. To complete the Radio frequency circuits, the F binding posts on filter coupler and the first

#### HOW TO HOOK-UP SIMPLEST POSSIBLE SUPER-HET

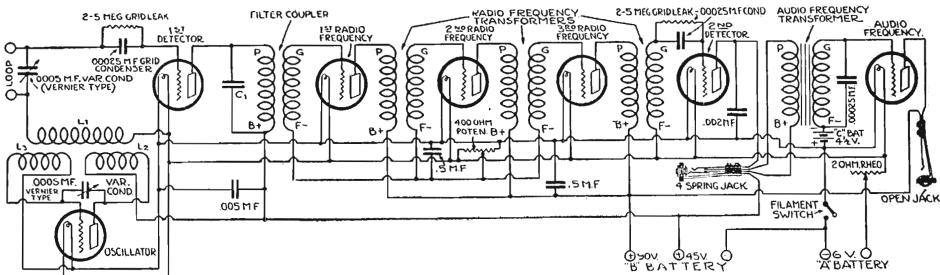

Figure 3

#### SUPER-HETERODYNE

(Continued from page 17)

two transformers must be connected to the center terminal of the potentiometer. Bend a wire so that it will go up from F on the filter coupler, to the right and over the first and second transformers and down to F on the second one. Where this wire passes over F on the first transformer solder a short lead that will connect to that post; also, another wire that goes straight toward the panel, down to the front terminal of the .5 mfd. fixed condenser and on to the eenter terminal of the potentiometer. Spaghetti is, as usual, placed on this lead between joints. The rear terminal of this condenser is then connected to the lower filament bus where it joins the front right post on socket 4.

#### The Finishing Touches

Now to complete the amplifier B battery circuit. A wire is bent to connect at one end to the left binding post of the three marked "B Bat." and pass between the C battery and audio transformer, over the .002 mfd. fixed condenser to the long spring on the lower jack. While soldering this lead to the jack, put in another wire that goes to the front terminal of the .5 mfd. fixed condenser behind the rheostat. The rear terminal of this condenser is connected to the lower filament bus where it is soldered to the front right terminal of socket 6. The short spring of the lower

If the lower jack is of the type that has but one spring, the frame acts as would a long spring and should be connected as

Examination of the upper jack will show two short springs that, when no plug is inserted, make contact with the longer ones. Note which one touches the long spring and connect it to the terminal of the audio frequency transformer marked B plus. The other short spring is then connected to the P terminal on the audio transformer. This leaves the shorter of the two long springs, so it is now connected to the rear terminal of the .002 mfd. fixed condenser between sockets 6 and 7 and to P on socket 6. The front terminal of this condenser connects to the front right post on socket 6.

Bend and solder a wire to connect G minal of the .00025 mid. condenser beside wire. Tighten the aerial wire so that the should be connected to F minus on the times. In summer, when the aerial exaudio transformer and to the negative pands, the spring contracts and takes up post on the C battery. The C battery the slack. jack is now connected to P on socket 7, the minus A binding post should be conthe wire being covered with spaghetti. nected to the right hand post of the three marked "B Bat."

Going now to the other end of the set, we are ready to finish up. Run a wire from the stator (fixed) plates of the second variable condenser (from the left) to the front terminal of the grid leak and condenser between sockets 1 and 2, and continue it around the oscillator coil to the remaining loop binding post. A second wire is used to connect the rear terminal of the grid condenser and leak with the G post on socket 2. This completes the wiring and we are ready to test

(Mr. Ryan, next week, will tell how to look for trouble, test circuits and operate. -Editor's note.)

#### Aerial Efficiency

# Helpful Hints to Get the Most from Radio

### Chapter X—Amplifying the Signals

By Thomas W. Benson

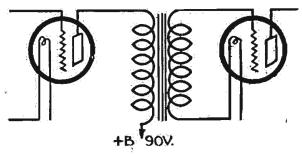

IN THIS series of articles set opera-tion will be told in so simple a manner that the uninitiated can follow instructions and get the most out of reception, whether or not he knows anything about electricity or its application to broadcasting and reception. The series consists of thirteen chapters, of which the three next will be:

Chapter XI-Care of Radio Batteries.

Chapter XII-Telephones and Loud Speakers.

Chapter XIII-Hints on Tuning.

of a receiver it is possible to employ amplification methods that will accomplish one of these effects to a greater extent than the other. Thus by using Radio frequency amplification, that is amplifying the received energy before

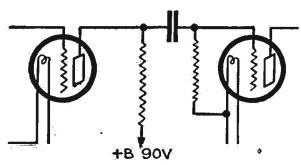

Pigure 24.—Transformer coupling as used in audio frequency amplification is the most efficient arrangement.

detection, the range of the set is increased in that it will build up the weak Radio impulses to a point where they will readily affect the detector with but slight increase in volume of the signals.

The value of Radio frequency amplification lies In the fact that the response in a detector varies as the square of the impressed grid voltage. In other words, when the voltage impressed on the grid by the Radio impulses is reduced by half

one quarter. It will be seen that very weak impulses will not be sufficient to glve a response in the detector plate circuit but by building up the signal by

O INCREASE the range or volume Figure 25.—Impedance coupling using a resistance as shown or an inductance, gives clear reproduction with decreased efficiency.

> Radio frequency amplifiers the voltage is raised to the point where the detector tube can be operated.

Audio Prequency Amplification

On the other hand audio frequency amplification acts chiefly to increase the volume of the signals. It is true that with audio amplification signals will be heard that would be inaudible with detector alone thus having the effect of increasing the range. But this action is limited to signals that are strong enough to affect the detector, for audio frequency amplifiers can only amplify signals that have been detected.

The real problem of amplification is the design of the apparatus used to couple the output circuit of one tube to the input of the next amplifier without distorting the signals. It is true of all amplifying systems that the current in the output or plate circuit of the last tube must be an enlarged reproduction of the current variations applied to the grid of the first amplifier. All coupling methods fall into two classes, namely, transformer and impedance coupling.

In Figure 24 ls shown the essentials of a transformer coupled amplifier in which a coil in the plate circuit of one

tically non-resonant, that is, it must of wire adds to the capacity and reamplify all the notes within the audible range to an equal extent. A poorly designed transformer will amplify currents of a certain frequency much better than those of other frequencies and thus give distortion.

Input Voltage

Since the tube is actuated by the voltage applied to the grid every effort is made to make the input voltage as high as possible and to that end the secondary of the transformer is wound with more turns than the primary to obtain a step up in voltage in the transformer. This is entirely practical and desirable up to a certain point. We find on the market transformers with ratios all the way from 3 to 1 up to 10 to 1. This means In the first case that there are three times as many turns on the secondary as there are

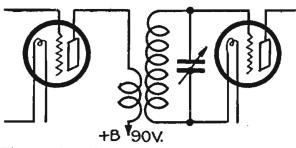

Figure 26.—At Radio frequencies transformer coupling should be tuned to obtain high efficiency over the entire range.

on the primary, in the last case ten times as many turns. Theoretically there should

the response in the phones is reduced to tube is coupled inductively to a second be a step up in voltage of 3 to 1 or 10 coil in the grid circuit of the next tube. to 1. Actually we find that this ratio Let us consider the essentials of a good holds true for low ratio transformers, but frequency transformer. It must be prac- as the ratio increases the increased turns

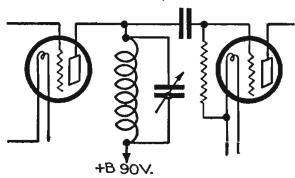

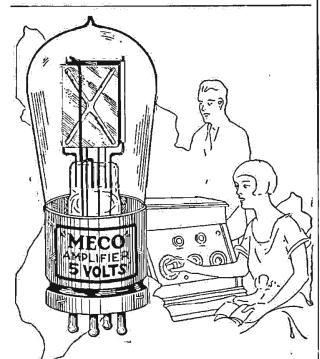

Figure 27.—Tuned impedance coupling is very efficient but is entirely too unstable for practical purposes.

sistance in the circuit to such an extent that the ratio of turns is no measure of

The best practice is to use low ratio transformers, never more than 5 to 1 in the first stage and 3 to 1 in the second stage. Higher ratios than this are bound to give distortion and more than two stages of straight audio frequency amplification is rarely practical because of the tube noises encountered. To overcome this and give extreme volume we can have recourse to push-pull amplification. Each stage of a push-pull amplifier requires two tubes that are so connected that the distortion produced by one tube is neutralized by the other, thus giving

(Continued on page 20)

#### Operated on Dry Cell A Battery

A radical improvement in the construction of MECO Tubes makes it possible to operate them at a lower temperature which in turn allows the efficient use of dry cell A battery. The longer battery life and tube service resulting are as much appreciated by particular radiophans as the greater volume without impairing its clear, distinctive receptive tubes.

MECO Tubes operate in every receiving set, whether audio-frequency, radio-frequency, regenerative or reflex action. They come in 5 volt and 3 volt sizes with large or small bases. Genuine MECO Tubes have MECO stamped on the base. Look for it.

Your dealer has MECO Tubes or can get them for you from recognized radio jobbers.

Metropolitan Electric Co. Des Moines, Iowa

A simplified, loud speaking, long rango set at a price within the reach of all.

If you want Radlo during the long winter nights the Nightingale will give it to you at very nominal cost, and you will be surprised at the remarkable distance and volume you will receive. Hansen BLUE BIRD. 4 Tube Radio Frequency.......

perfect reproduction. One stage of pushpull gives about the same amplification as a single stage of straight amplification and is recommended only in extreme cases where large volume is necessary and a third stage required.

#### Shielding the Transformers

Shielding of transformers is desirable but not really necessary on well designed transformers for the stray field is small. Feedbacks in transformer coupled audio amplifiers is usually due to capacity effects and can only be prevented by using the shortest leads possible between transformers and tubes.

The other method of coupling amplifiers uses an impedance connected in the plate circuit as shown in Figure 25. The plate of one amplifier tube is connected through a condenser to the grid of the next tube. The principle of operation is simply that changes in the plate current will cause the drop of potential across the impedance to vary, which potential changes are transferred direct to the grid of the next tube through the condenser.

This type of amplification has been recently rediscovered and much talked about because of its freedom from distortion when a pure resistance is used as the battery potential is not applied to the plates of the tubes and no step up is pose of mounting this unit on the panel possible in the coupling. Both factors and keeping the wires of the secondary act to reduce the amount of amplification obtained per stage and it takes three similar in shape to item 1, but is much of transformer coupling. This type of coils. It will be noted that, while 4-inch coupling seems to filter out much of the tube noise and gives beautifully clear reproduction, but everything considered a transformer coupled amplifier with low ratio transformers and the tubes worked within the bends in their curves will give reproduction with fewer tubes.

#### Efficiency of Transformers

And so in Radio frequency amplifiers we find two similar methods of coupling the amplifiers but modified to suit the higher frequencies dealt with. In audio frequency amplification the currents have a comparatively low frequency while in Radio frequencies we must handle currents having frequencies up into the hundred thousands of cycles per second. Here it is found more difficult to design trans-

GET MOST FROM RADIO formers that will amplify uniformly over gerly during this operation and no prestigation and no prest found much better to stick to sizes number 20 for the small coils usually work best at some wave length It will be found perfectly feasible to and number 14 and number 16 for innear the center of the band or about 375 mount this unit on the panel and then ductances 3 inches and more in diameter. meters and fall off in efficiency at higher and lower wave lengths.

Another factor difficult to overcome in the use of untuned Radio frequency transformers is the fact that the storage bat- lous job, a groove can be filed around tery tubes have a comparatively high the shaft at the point Y as shown in capacity between the electrodes in the tubes as this capacity acts as a bypass for some of the Radio frequency currents, thus lowering the potential applied to the grids. Generally speaking it can be said that a receiver using untuned transformers is not an efficient amplifier.

A much superior arrangement is the tuned transformer as in the neutrodyne and similar receivers. Here the transformers are tuned to the wave length being amplified and operate with equal efficiency at all wave lengths within their

(Batteries, the life of the receiving set, will be the next subject of Mr. Benson. Too little is konwn about the forms used and you will derive much benefit by following instructions given.—Editor's Note.)

#### LOW LOSS—WHAT IS IT?

Old Batteries Cause Noise

An old B battery makes a receiving set noisy. As the battery becomes run down its resistance increases and gives rise to noises that are annoying, to say the least. When the voltage of the plate battery has dropped 20 per cent, it is advisable to replace it; thus a 221/3-volt battery becomes useless when it has dropped to 17 volts. Larger batteries can be figured in the same proportion.

# Regenerative Radio Frequency Set

#### Few Parts Required for Building R. F. Receiver

After experimenting with Radio frequency, combined with regeneration, for some time I have found the circuit shown in the accompanying sketch to give

#### WORKSHOP KINKS EARN A DOLLAR-

THERE are many little kinks worked out at home that would aid your fellow Radio worker if only he knew about them. There are new hook-ups, new ways of making parts and various unique ways of operating sets that are discovered every day. Radio Digest is very much interested in obtaining such material. Send them in with full details, including stamped envelope, so rejected copy may be returned. The work must be entirely original, not copied.

RADIO KINKS DEPARTMENT Radio Digest, 510 North Dearborn St., Chicago

excellent results. During quite warm weather, I have received quite a number of distant stations, many being loud enough to work the loud speaker—with two steps audio frequency amplification. The set gives very clear signals and may be handled very easy, the only critical dial to adjust being the condenser connected across the Radio frequency transformer.

The building of the set is simple and the parts required are few, as will be seen in the illustration. A single honeycomb or spider web coil of 35 turns forms the coupler, this being connected in series with a 43-plate variable condenser. The Radio frequency transformer is made with a honeycomb coil as shown. The coil has the regular fiber strip around it for protection, over this is wound, in the same direction as the winding of the coil, 6 turns of number 22 dcc. wire. The fiber thus separates the two windings. The six turns form the primary and the coil

# Questions and Answers

Reinartz Coil

(08191) HHO, Winnipeg, Can.

I want to wind a Reinartz spider web coil and would like to know the dimensions of the frame, number of turns, taps, etc., to cover the broadcasting wave lengths (200 to 600 meters).

A.—We are advising in your inquiry that several methods of accomplishing suitable coils for the Reinartz circuit are employed and described in detail in our booklet on the circuit as a whole. This is available for fifty cents through our book department and will be helpful in perfecting an efficient type of receiver.

Briefly, coil form can consist of a cardboard form, properly treated to be moisture-proof, with a 21/2-inch core and an uneven number of slots for winding. Elther No. 24 or No. 26 dcc wire can be used. Taps should be taken in steps each on the slot following the preceding tap. The turns are counted from each tap point. The first or tickler winding has slxty turns with a tap at every fifteenth turn, countgive five connection points. The primary and secondary are all one length of windlng spaced with fifteen extra turns connecting the two sets of taps. The primary turn, counting the starting lead, making if possible, I desire to use a loud speaker. eleven connection points. After the last tap fifteen extra turns are made before the next tap is taken. This tap is the first connection point for the secondary tap Stacy, Royal Ave., Rockford, Ill. switch. The secondary winding consists of twenty-eight turns, tapped after every A Super Antenna. Greater volume. Easily seventh turn. Counting the first tap, this will give five connection points.

Send me your burned-out or broken Power tubes—50 watts or over. Will pay liberally. W. Baker, 36 West 20th Street, New York City.
