SOS MYSTERY PLAY MAKES HIT OVER AIR

"A STEP ON THE STAIRS" IS HIGHLY PRAISED

Congratulatory Letters and Telegrams Pour Into Radio Digest from Radio Authorities

Letters and telegrams from all sections of the country confirm the opinions expressed by studio directors and Radio entertainment specialists that the Radio mystery story, "A Step On the Stairs," written especially for Radio Digest, came at the psychological moment when a change in the trend of broadcast programs seemed imperative.

The dramatization of the story into Radario form by Fred Smith has supplied the happy medium between the super abundance of jazz and the extremes of the classical.

Here is the telegram from J. Andrew White, king of descriptive announcers in New York:

"'Step On the Stairs' has them all licked Best thing of the kind I've heard. Played straight by listening at home with the lights turned low, so this is not apple-sauce. Heaviest congratulations.—J. Andrew White."

Shut-Ins Like Play

A shut-in so blind she had to have another writer her letter for her sent this message as typical of the most critical of all kinds of listeners; to the WNAC station at Boston—conservative old Boston:

"I want to send you just a line to tell you how much I enjoyed the first installment of 'A Step On the Stairs.' It is such a relief from the constant jazz and popular songs that are played so much every day they are monotonous. I am a shut-in and nearly blind, so you can understand what the Radio means to me. I wish I might have some more drama and readers as I enjoy them very much. Long live WNAC!"

The letter is signed by Mrs. H. M. Young, 14 Lander street, East Lynn, Mass.

After he had finished the third installment, Fred Smith of Cincinnati, who put in Radario form the story appearing in Radio Digest, came up to Chicago to meet Robert J. Casey, the author. Radio Digest had sought these two men, unknown to each other, but each the best to be found for their respective tasks, to perform this work for the Radio public.

Is Radio History

"How did you get hold of Casey?" was the first question asked by Mr. Smith on his arrival in Chicago. "He has the rare combination of ability as a fiction writer and a knowledge of Radio technique. He knows how to utilize these faculties and has done so in this very remarkable story."

"This is Radio history," said Mr. Smith later, when, with the editors of Radio Digest, he met Mr. Casey at the Hotel La Salle. The two men set next to each other in the grill where a booth had been reserved. The Chicago man was of medium height, plainly dressed, undistinguished except for a heavy gold signet ring that made his soft, well cared for hands more noticeable. His hair was short and his face confirmed the ancestry of his name, especially when the Celtic blue eyes popped wide open at vivacious moments of the table conversation. On the other hand, Mr. Smith was the artist, precise as a professor, speaking at all times with the perfect English and adhering to form even to the manner with which he held his teacup—he had tea—and crooked his little finger, just so. But a man and a man's man with full appreciation for the red-blooded elements in the story. He wore glasses and the hair was thin above his well developed forehead. The two men, side by side, represented a wide range in a new kind of literature.

"'A Step On the Stairs,' is something that we have been approaching from various angles for several years. It will mark a decided point in the development of Radio art," said Mr. Smith.

St. Paul Fans Excited

"We had a big crowd in the studio and turned out the lights," wrote E. H. Gammons of Station WCCO, St. Paul-Minneapolis, "and everybody in the place got a great kick out of it."

"The most amusing thing in connection with the broadcast was that hardly had we completed it when telephone calls began to come in complaining that some station, FYX, had come on the air and blanketed us. In fact one St. Paul listener was so excited about it that he didn't get the call letters and accused one of the small 50-watt stations in town of having come on the air, and stated that he was going to take the matter up with the department of commerce. It so happened that the station he had in mind happens to have an 'F' and a 'Y' in its code call."

From the many letters written, it is ob-

DAINTY MARY BRIAN OUR COVER BEAUTY

THAT perfect oval so ardently desired by the connoisseurs of beauty in the feminine head, genus homo, seems approximately attained by the maiden on the Radio Digest cover this week. She is Miss Mary Brian, another of the famous 1926 Wampas Stars, whose face is often seen in the pictures of the Paramount brand.

You know the story of the lucky thirteen who make the Wampas cast each year. All the great motion picture producing companies on the Pacific coast present their young and most promising hopes to the consideration of the Western Association of Motion Picture Advertisers. There is a vote among the members of the association. The thirteen who stand highest are the Wampas stars for the year. Experience has shown that these chosen ones make good and become real stars of the screen.

Take another look at the picture, that flawless, oval contour, and you will not wonder that she is one of the Wampas Stars of 1926.

vious that the trick of turning out the lights while listening to the drama over the air adds 100 per cent to the thrill. It may not be generally known that a darkened room usually adds to the illusions in Radio. When the Radario especially provides for a darkened room the effect is even more noticeable.

Mike Starts to Vanish But Mystery Is Solved

Temporary Disappearance Caused by Man Dragging Connection

NEW YORK.—"Mike, mike, who's got the mike?" was the query of Ralph Wentworth, one of WEA's announcers, recently at a celebration broadcast direct from Carnegie hall, when he suddenly saw the microphone vanishing from him. He was then telling the Radio audience about the parade of the colors which had just taken place.

The temporary disappearance of "mike" was caused by one of the New York friends of Senator Ashurst of Arizona, the orator of the day, rushing forward to greet the senator and not noticing the wire connection to the microphone stretched across the floor. Wentworth managed to clutch "mike" in time to prevent any real break in his descriptions of events for the Radio audience.

Five Veterans of Civil War Broadcast at Station KOA

DENVER, Colo. — KOA's performers during the last year have ranged in ages from a 4-year-old prodigy—Phillip Cooper, Colorado's youngest Radio artist—to five 80-year-old survivors of the Denver Drum Corps, an organization inspired by the Civil war.

Because of death, the drum corps has been reduced from an original group of fourteen persons to a quintet.

NEWS BRIEFS FROM THE BROADCASTERS

KGO TO PICK CHAMPION FIDDLER OF WEST

KFI Gives Artist-Composer Series— Punch and Judy at WLIB— Gilda Gray at CKAC

Old fiddlers from all over the West will gather around the KGO microphones, Saturday night, March 27, and give the world a taste of the music of a generation ago, which is still calculated to tickle the feet.

KFI is presenting an artist-composer series. One of the recent artists to appear at this station was Alice Barnett. Songs and compositions by this American composer were featured during the entire program. Arrangements are now being made for early programs by Charles Wakefield Cadman, Homer Grunn, Halette Gilberte, Heinrich Tandler and Carrie Jacobs Bond.

The squeaky voices of Punch and Judy may be heard nightly over the microphone of WLIB, Chicago. Uncle Walt, who is directing the Radio appearances of these well-known puppets, describes them so well that many kiddies throughout the United States enjoy this new bedtime feature.

Gilda Gray, famous Follies dancer, pleased Canadian fans recently when she gave advice to girls on beauty and dancing, over the microphone of CKAC, Montreal. She gave her talk in French.

Sidelights on boxing in Mexico will interest sport fans over WPG, Atlantic City, Saturday. James Monahan, former intercollegiate lightweight champion of Lafayette college, will talk about his recent experience as referee in this interesting neighbor republic.

The novel feature of WBAL's Saudman circle, which goes on the air every Monday and Thursday evening from 6 to 6:30 p. m., Eastern time, is a Radio serial story for children. "The First Days of Man," an historical story written especially for young folks by Frederick Arnold Kummer is the present serial.

"Memories of Jennie Lind and Clara Schumann," is the title of the program to be given by Anna Barbash, soprano, at WPG, Monday evening.

"Winds, Clouds and Rain" is the subject to be discussed for fifteen minutes over KGO, Monday evening, March 22, by Major Edward I. Bowie, weather man for the western part of the United States. Major Bowie will be remembered by KGO listeners for other talks about how the facts concerning the weather are gathered, charted and forecasts made twice daily in the San Francisco office of the Weather bureau.

Community singing on a large scale is being encouraged by WGN, Chicago. Every evening from 6:55 to 7 p. m., Central time popular ballads and well-known tunes are presented by an ensemble of WGN artists. Listeners are invited to join in.

And still they come! Here is another old fiddler, Andy Hidee, who will broadcast from WLW, Cincinnati, Saturday evening, March 20, at 9 p. m. Central time. He places the fiddle between his knees and bows it like a cello. The other member of the team is Walter Harlan, accompanist.

Fans who listened to Bishop Frederick Fisher recently at WBPI, New York, enjoyed some of the thrills of the hunting trip in India of Kermit and Theodore Roosevelt. Bishop Fisher has been in India with the Roosevelts.

Each month will end attractively at WJZ, New York, with a recital by two favorite Radio artists, Godfrey Ludlow, Australian violinist, and Lolita Cabrera Gainsborg, pianist. These Sunday evening concerts will include the sonatas of well-known composers.

S. L. Rothafel, popularly known as "Roxy," to thousands of listeners, bid a temporary farewell to his many Radio friends recently from Station WEA. He will broadcast again next autumn when his new theater opens.

During the first week in March, WOR devoted one-half hour each afternoon to talks by outstanding authors of the day. Martha Ostenso, author of "Wild Geese," Homer Croy, author of "West of the Water Tower," and Charles Hanson Towne, author of "Tinsel" were among the speakers.

Looking Ahead

Peleg Turner Speaks from the Tomb and curses the murderer of his brother, Jeremiah, next week in "A Step On the Stairs." Milford Jones reappears, somewhat the worse for his absence. The best part yet of Mr. Casey's serial will make startling disclosures next issue.

"Radio Owes an Incalculable Debt to the American Boy," says Secretary of Commerce Hoover and he has reference to the ingenuity and inventiveness of boys as they, through Boy Scout and Y. M. C. A. organizations, worked out many problems that have puzzled their elders. Radio Digest has an interesting Boy Scout story about ready for release.

Intense Interest Has Been Shown Throughout the Country in the dramatization of the Radio Digest mystery play. Wherever it has been put on the air listeners have reported surprise and delight at the unusual effects produced. At the Gold Medal Station WCCO Minneapolis-St. Paul, the players made up for their parts. See pictures and story in Radio Digest.

Causes and Locating of Man-Made Static will be the subject of the next article in the Blooming and Interference series. The number of electrical devices in common use that cause clicks, hums and rattle in Radio receivers is surprising.

Assembly and Wiring of 1926 Four-Filter Super is taken up in the third article on this receiver which will appear next week. Large as this receiver is, the wiring is comparatively simple, since the audio amplification is all wired when installed and the shielding is the negative filament circuit.

Readers of Milo Gurney's A. B. C. Series will next get a brief discussion of the super-heterodyne receiver from a theoretical viewpoint. The Rolls Royce of Radio is not so complicated as it sounds but a fair knowledge of what is happening in one is most helpful to the constructor.

TO PICK GREATEST ANNOUNCER

COMMISSION DESIRE OF ZENITH COUNSEL

ASSAILS PRESENT KIND OF RADIO ADMINISTRATION

Believes Radio Commission More Equitable Form of Supervision—Organized Labor Also Makes Kick

By L. M. Lamm

WASHINGTON, D. C.—Strenuous demands that congress take the administration of the Radio law out of the hands of the department of commerce and establish a Radio commission were made during the closing hours of the hearings on the Dill Radio bill, which lasted for several days before the senate committee on interstate commerce, of which Senator Watson, of Indiana, is chairman.

Irving Herriott, counsel for Station WJAZ, of the Zenith Radio corporation, and E. F. McDonald, Jr., president of the firm, told the committee that he did not believe that the secretary of commerce should be clothed with his present broad powers for Radio regulation or with those provided for in the Dill and White bills.

He asked that a commission be appointed by the president and that the control of Radio be taken away entirely from the department of commerce.

Says Hoover Can Divide Station Time

Mr. Herriott in opening his testimony gave the history of the Zenith station and some of its troubles which terminated in the federal courts in Chicago, and in which it is expected a decision will soon be rendered. He went on record distinctly as in favor of a bill for Radio regulation and seemed to favor the Dill bill except in that he wants a commission instead of the power being delegated to the department of commerce.

He took the position, in answer to questions of the committee that if the secretary of commerce now has the power, under the present law, to assign wave lengths he must also have the power to divide time for the stations. He called the committee's attention to the fact that Radio is still in its infancy but he predicted that the time is not now far distant when power will be transmitted by Radio for various purposes.

Labor Would Divest Hoover of Power

The number of stations owned by one firm, said Mr. Herriott, should be limited in the bill under consideration. In contention of his suggestion for the Radio commission he said that it could handle the matters more expeditiously and he thought that a provision should be made in the bill "for a fair division of time for everyone."

W. J. H. Strong, representing the Chicago Federation of Labor, told the committee that the Dill bill is not scientifically drawn and that it is not in the interest of public policy. He made suggestions for almost all of the sections of the bill.

He told the committee that Radio should be declared a public utility and that it should be taken away from the department of commerce and placed under the interstate commerce commission. He said that he does not favor the United States government owning any Radio stations.

Rochester, N. Y., Giving Programs Over WGY

Former Silent Night of Schenectady Station Now Feature

SCHENECTADY.—Wednesday, heretofore a silent night for WGY, has become one of the biggest nights for the station, and it is sure to gain in popularity with the listeners. That evening is given over, practically entirely, to Rochester, N. Y., and that city has thus far provided three outstanding programs.

The symphony orchestra of the Eastman theater is heard at 6:45 o'clock and this is followed at 8 o'clock by a program by Eastman School of Music pupils, the Little Symphony orchestra, the Rochester Symphony orchestra, or other Rochester talent. The Little Symphony orchestra and the Rochester Symphony orchestra are under the direction of Eugene Goossens. WHAM of Rochester broadcasts all Rochester features simultaneously with WGY.

150,000 Swedish Licenses

WASHINGTON, D. C.—The number of Swedish Radio licenses issued up to the end of February, this year, amounts to about 150,000, according to a report to the department of commerce from Stockholm.

PASS LAW AGAINST LOUD RADIO NOISES

MOUNT VERNON, N. Y.—There will be no loud noises from Radio receivers or phonographs in this little town, if the aldermen have anything to say about it. The common council announced recently that an ordinance had been passed fixing a penalty of a \$5 fine or five days in jail on the owners of phonographs or Radio sets that make too much noise. The aldermen said they hoped the ordinance would check the efforts of "merchants seeking to attract attention by increasing the volume on their loud speakers."

TEXAN SEPARATES VOICES OF SEXTET

CINCINNATI.—Nearly every fan boasts of some performance of his set which makes it quite the best, but the broadest claim for selectivity is made in a letter received by Station WSAI, of the United States Playing Card company, here, in which the writer, a Texan, insists that he uncrambled the voices of the Bicycle sextet at will. At times he served to his guests a tenor solo, regardless of the fact that five other voices were being broadcast at the moment, or occasionally shifted to a duo with the tenor and baritone.

DID YOU SCENT SCENT SHE SENT?

Ruth Fallows is the girl with the atomizer in the above picture taken in the WJZ studio, New York. She was telling her sisters of the Radio audience all about the beautiful scents that come from atomizers and she became so engrossed in her story that she really thought she could send out the odor, just as she was sending out her voice. At least, that's the impression she caused in the studio and, according to letters from fair listeners, she almost succeeded in doing that very thing.

NEW LOCATION AIDING WGBS TRANSMISSION

Fans in Greater New York Are Getting Better Reception

NEW YORK.—Since moving its transmitter from the congested downtown district, WGBS, here, has practically been deluged with letters from listeners reporting that the new location in Astoria has greatly increased the strength of the Gimbel Brothers' station.

Before this step was taken WGBS was heard with excellent quality in all parts of the country, but a great many Radio fans right in Greater New York, principally parts of Brooklyn, found it difficult to tune in to the station. This was due entirely to the mass of steel and other air obstructions in the midtown district.

One of the main features in connection with the new transmitting plant is the fact that it is built on a peninsula of land, and surrounded by water on three sides.

Metropolitan Theater Now Operating from New Studio

BOSTON.—The Metropolitan theater here recently opened its own studio broadcasting through WNAC, the Shepard Stores, with an extensive and exceptional broadcasting program.

The studio has been highly praised by those who are competent to know of the modern mechanical equipment in the average broadcast studio. Every effort has been made by the Metropolitan theater to make this new studio ahead of the times. The latest and the most approved microphones have been installed. Radio engineers have designed the most efficient mixing panels.

Radio Conference at Geneva

GENEVA.—Invitations have been issued to all broadcasting concerns in Europe to attend an international conference in Geneva beginning on March 25. The organizing body is the office international de Radiophonie. The main question to be settled is the definite repartition of wave lengths.

WINNER WILL BE SELECTED BY LISTENERS

Third Gold Cup Award

Annual Contest in Which Fans Will Choose Favorite Announcers to Start Next Week

For the third consecutive year the millions of Radio listeners numbered among the invisible audience will have the opportunity of selecting the world's most popular Radio announcer. Who will be selected this year to bear the coveted title and receive the handsome solid gold cup offered by Radio Digest in its third annual Gold Cup Award?

Two gold cups have already been awarded. In 1924, George D. Hay, formerly of WMC and WLS, now director of WSM, won the much desired trophy. In 1925, Graham McNamee, WEAJ's chief announcer, topped the list and won the prize. In 1926—who will win?

McNamee Won Cup in 1925

The race last year was by far more thrilling than in 1924. Graham McNamee, George Hay, Henry Field and Gene Rouse were all possible winners at various stages of the voting. The jockeying up and down of the more popular contestants provided listeners with many surprises.

But when the final count of the 1,161,659 votes cast was made and McNamee's total reached nearly 200,000, the race was over. At that, Henry Field was a close second.

D. P. R. Coats, announcer for CKY, Winnipeg, Manitoba, led the list of Canadian announcers last year, and was presented with a silver loving cup. This precedent will be followed again this year, and the high Canadian announcer will receive a beautiful silver loving cup.

Radio listeners clamor anew to know who is the world's champion announcer. And to gratify the wishes of the great army of listeners, Radio Digest is again undertaking to aid them in making their selection.

Contest Begins Next Week

The Gold Cup Award is a permanent institution. As long as broadcasting stations continue to broadcast, the Gold Cup Award will be conducted annually by Radio Digest. Each year a solid gold trophy will be awarded to the world's most popular Radio announcer.

Watch the next issue of this publication for further announcements concerning the contest and how it will be decided this year. Full details will be given, and the first official ballot will appear. It is important to have every ballot, beginning with number 1.

In the meantime members of the invisible audience are advised to listen carefully to the various styles of announcing they hear nightly. What kind suits you the best, who pleases the most?

Say it with ballots, beginning next week.

Each City Has Program On Manitoba's Station

Each Point in Province Can Tell of Its Attractions

WINNIPEG, Canada.—CKY, "Manitoba's Own Station," operated by the telephone system which is owned by the people of the province, is now broadcasting programs by remote control from all the principal cities and towns outside Winnipeg.

The whole purpose of these broadcasts is that of giving each point in the province an opportunity of going on the air and telling the world about its local attractions. The programs are put on officially by the town councils or boards of trade. The broadcasts are performed by the telephone system in the interests of the province.

Private commercial advertising is barred and on this understanding the work is performed at rather less than actual cost. Manitoba is the only province in the Dominion of Canada operating its own broadcasting system and providing broadcasting facilities of this kind to its outlying towns. There are no other broadcasters in Manitoba.

Secretary Hoover Is Real Fan

UNCLE Sam's Radio Spokesman Keeps Receiving Set Near His Desk and Enjoys DX Hunting as Well as Local Programs—Conferences Aid Wireless Progress

By L. M. LAMM

HERBERT HOOVER, erst-while food administrator of the United States, present secretary of commerce, adviser to the President, and friend of the Radio fans of the country, is himself a diligent fan. He has been called "Czar of the Air," but the title does not suit him. He does not like it.

From time to time the secretary has had all kinds of sets in his home for his personal use, from a small crystal to the most up-to-the-minute tube set. He has tried all these out so that he will better be able to know the conditions under which the fans who have small sets operate. It is known that he has himself experienced many of the inconveniences to which the owner of the small set is subject and for that reason he has all kinds of patience with the kicks of listeners in which reach him almost daily.

Mr. Hoover now has several Radio sets in his own home. One of them, however, is his "pet" and that is installed in his own private study, right alongside his desk, where he does a great deal of work at night. This study has a large open fireplace and it is said that frequently when he is trying to solve a problem he will stop in the middle of his work, light his pipe and play with the dials.

He gets considerable "kick" out of the quality of the programs and the reception. Mr. Hoover is also very much interested in loud speakers and has tried out many of them. Manufacturers of sets and speakers who think that they each have something out of the ordinary frequently send their sets to the secretary to see what he thinks of them.

The secretary is not the only one in his family who is a Radio fan. He has a very handsome set installed in his living room for the use of his family. Mrs. Hoover shares interest with the distinguished secretary in this art. His son, Herbert, who is now away, has been interested in Radio for many years. He has been an amateur and has been very active in his experimental work with Radio. It was probably through this son that Mr. Hoover became so much interested in the subject. It is also through this son that the secretary has a direct contact with the amateur operators of the country.

Sometimes the amateur broadcasters think they get rather a poor show and have to take a lot of abuse from the Radio public in general. One of the most ardent amateurs in the country is Herbert Hoover, Jr., who is seen above with his famous dad, who is the voice of Uncle Sam on all Radio rights and authority. Beside the secretary is Mrs. Herbert Hoover, Jr. So the amateurs should be well represented at Washington. Below is a group well known to Radio fans. Left to right are W. E. Harkness, assistant vice-president American Telephone & Telegraph Co., in charge of Station WEAJ, New York; A. Atwater Kent, Philadelphia; Secretary of Commerce Hoover and Congressman Arthur M. Free of California.

EVER since Radio has been an active subject in the department of commerce, and that means practically ever since Mr. Hoover has been secretary, he has been strong for the American boy as one of the greatest assets of the Radio industry. His appeal has always been for the boys of the country and he has looked out consistently for their rights in legislation and regulation, as well as those of the amateurs in general.

Mr. Hoover has always stood for the motto of the service to the public of the broadcasting stations. He believes that this is the real sum and substance of Radio broadcasting at this time.

Many Radio problems are presented to Mr. Hoover daily and, although he has a large corps of assistants to help him, he is fond of dealing with the subject himself. At the present time there are three outstanding problems. They include interference, applications for new broadcasting stations for which no wave lengths are available, and applications for increases in the power of the present stations.

Mr. Hoover frequently talks over the Radio at functions but he does not frequent broadcasting stations, although there are two first-class stations near at hand in Washington, WRC of the Radio Corporation of America and WCAP of the Chesapeake and Potomac Telephone company. He has, of course, been through these and other stations and knows about them thoroughly, being an engineer of note himself.

The secretary is best known, perhaps, throughout the Radio field in all of its branches as chairman of the various Radio conferences, of which he has called four since he has been in charge of the department of commerce.

He has a proclivity for running conferences and is most successful in this field. At the first Radio conference which he convened, about five years ago, there were only some twenty-five people present. This number has increased each succeeding year, until the last conference, held in the autumn of 1925, brought to Washington more than 600, representing every Radio interest, including represent- (Continued on page 12)

Fair Listeners Love KOA Chat

DENVER Station Broadcasts Snappy Matinee Program to Please Housewives and Mountain Maids Remote from City Shops and Social Conveniences

By HAROLD P. BROWN

DID you ever know a woman to be "up in the air" about her clothes, her health or what to get for luncheon that would be different and more pleasing than the usual thing?

Quite likely, or you never knew a woman.

Possibly you may know Mrs. Ruth Drumm Witting of Denver. You certainly know her if you live within range of KOA, the "mile-high broadcasting station" of the General Electric company, located at Denver. And, by all means, if you are a woman listener in that widespread area you know Salle Dee and Clara Hoover, both of the same station. All three of these ladies may be "up in the air" a mile high from the sea level but they have all these important things that women are most interested in, down to the last word, in the microphone.

Out where the West begins, women are women, just the same as they are anywhere else. Don't ever doubt that. And if you want special confirmation of the statement it is only necessary that you tune in KOA during one of the triweekly women's matinees indicated on the Radio Digest program pages.

OH, IT'S healthy in Colorado, up there on the mountain roads, of course! You step a little harder on the accelerator and keep your eye pretty close to the highway as you

A nerve tonic? Certainly! Leave it to Mrs. Witting. Just tune in on one of those mid-afternoon relaxing and corrective exercises for women—"Over now, touch the floor with the tips of your fingers, One! Two! Three! . . . Fill your lungs with fresh air . . ." and all the while the piano creases out the effort of exertion.

Just to visualize her listeners a little more clearly, Mrs. Witting often conducts a gymnastic class in the KOA studio.

LET'S all just forget everything else of the day's routine," says Mrs. Witting to the visible and invisible listeners, "and I can positively assure you if you will take this tonic according to prescription you will feel greatly benefited. Correct daily exercise, giving every little muscle, every little blood vessel, every nerve and tissue a chance to function and carry on the necessary reconstruction of the body, is better by far than all the pills and elixirs in the world. Keep physically well by keeping mentally well. Keep mind and body in harmony by gymnastics."

Mrs. Witting administers her "nerve tonic" in special doses for those who wish to reduce, for others who wish to build up and for all who wish to especially cultivate poise and posture.

Women love Salle Dee (right) because she brings to the listeners of KOA, Denver, the shop windows of the city and describes latest styles. Health and beauty are broadcast from the same station by Mrs. Ruth Drumm Witting (below), and kitchen technique and art of cooking by Clara Hoover (in circle).

Mrs. Witting is followed by a lively half-hour interlude of special music, which includes the latest song hits, chats along airy lines and other incidental features.

Now here is a secret that some folks will be surprised to hear: Following the interlude comes "Clara Hoover." That is just a "nom de Radio!" Her real name is— Pardon! That would be telling too much, more than the lady desires. Anyhow, she is a very highly esteemed society matron of Denver. If you know your Denver society, you may recognize her through the cover-all apron and broad headband as she is pictured here.

CLARA HOOVER, as she is known, has analyzed the kitchen and cooking problem down to the last and final —

And don't forget that "women are women" wherever you go—the same problems, the same heart cravings, the same worries—from Augusta, Maine, to Catalina Island, East or West. So Mrs. Hoover says:

"Because the woman's daylight hours are split three ways by family responsibilities, business cares and club activities, Radio talks on these subjects by those who have made of them a special study should prove not only interesting but profitable to those concerned. Especially should this be true of the kitchen and cooking—that never-ending bugaboo to many women." After that she lifts a figurative carving knife and lays open the various mysteries behind the kitchen door. Even a dull minded husband, eavesdropping on the loud speaker, should (Continued on page 12)

begin to climb the rugged flank and make the sharp curves, but you can't help seeing the cottage up there on the terrace and the thought flashes through your mind, "Man, but this country would be poor picking for a doctor!"

True enough! Still, it doesn't change the fact that women are women where the West begins the same as they are anywhere else. And that accounts for Mrs. Witting who talks health and beauty into the homes of the mountain folks. Mrs. Ezra McPeak, twenty miles up the Pike road, may never have seen a beauty doctor, but she is interested in knowing how to fix her hair and she has those "dizzy spells" and a "touch of lameness" in her "joints" just the same as the casual shopper on Fifth avenue, New York, or the "Boul. Mich." in Chicago.

a STEP ON the STAIRS

By ROBERT J. CASEY

Radio Dramatization by FRED SMITH

Illustrations by HILMER C. OLSON

Synopsis of Preceding Chapters

G RIM and ghostly mystery settled down on the old manor house of the Turners on Pelican Bay shortly before events chronicled in this story. The manse had come down through one hundred and fifty years of sea-faring Turners and then Jeremiah Turner was found dead with a bullet in his head on the hearth of the gun-room floor. They carried his body out the door reserved exclusively for the removal of the dead masters of the house. Soon after, the body of Peleg Turner, a brother, followed the same course. He seemed to have died from natural causes.

Lawyer Ardwyn, his executor, summoned the relatives for a weird seance in the deep shadowed hunt-room, lighted only by a candelabra. A letter left with the attorney had stated that the departed Peleg would attempt to communicate his discoveries beyond the grave through the Radio. The story opens with the party assembled. Only John Carton, a favorite nephew, is missing. He had been suspected of the crime. Henry Mills, the caretaker, had been startled by the arrival of a man in a gray overcoat from the stormy waters of the bay. The man said he had been called to the meeting, but Hari Singh reported later to Henry that he had never arrived at the house.

The clock struck twelve. There was a scratching sound in the receiver. A few syllables were uttered. Then followed an interruption. The voice of the announcer at F.Y.X., a nearby broadcasting station, called for help and a shot was fired. The listeners who were sitting in absolute darkness rushed for the locked exits in confusion. They already had heard ghostly sounds on the stairs and a mysterious tapping similar to an SOS signal. Finally, when a bit of candle was lighted, it was found that Milford Jones, one of the guests, was missing.

Tolliver, another guest, was appointed to investigate the F.Y.X. shooting. He found that a stranger had broken into the broadcasting station, shot the engineer and escaped unidentified. The wounded man was taken to a hospital but Tolliver discovered a trail of blood and picked up a letter which he handed to Ardwyn at the table. Just as the lawyer was about to open it Mary Williams, a friend of Carton, and sought in marriage by another cousin, Henry Graves, accidentally knocked the only candle to the floor.

In the darkness that followed Ardwyn felt the hair of a woman brush his hand and his wrist was caught in a savage bite. Another candle was lighted. The letter had disappeared.

Mary was suspected. When the other guests left the room for coffee and sandwiches Ardwyn showed her a locket which she admitted was her own. He had found it caught on his watch chain.

Then she showed him a pair of shoes left by some mysterious visitor who apparently had come through the locked and barred door of death. Mary dared Ardwyn to wait for the intruder's return. The candle stub sputtered out. Mary was heard to scream she had touched a corpse. The other guests rushed into the room and found Ardwyn and Mary both sprawled on the floor unconscious.

THE STORY CONTINUES.

CHAPTER SEVEN

Hail to the Prodigal

THE candle flared reluctantly as Henri Singh applied the match and cast a dim radiance over a scene of chaos. Ardwyn, the lawyer, sat where he had fallen beside a chair near the door. Blood was trickling down his face from a cut in his forehead.

Mary Williams, white and silent, lay on the floor. In her outstretched hand—fluttered by the drafts in which the storm came over the worn sills about the trembling house—was a white scarf. As the crowd stood in an awed circle about them, Miss Williams slowly opened her eyes and Ardwyn attempted to raise himself.

"What happened, Mr. Ardwyn?" inquired Hari Singh.

"Blessed if I know," replied the lawyer hazily. "The front door is barred. But the front door opened just like she said it would. And somebody came in. I think I collided with the edge of the door in the dark."

"Who said someone was going to come in?" broke in Maurice Tolliver. "Do you mean to tell me you were waiting for somebody to come in here and rap you one on the coco?"

"The Sahib is in pain, Mr. Tolliver," Hari Singh cut in. "Would you please not question him?"

"Never mind, Hari Singh," Ardwyn told him. "My head is clearing. And one must talk sooner or later."

"I may say, Mr. Tolliver, that your supposition is correct. Miss Williams was expecting someone to come in through the front door and we sat here waiting for the visit."

"It certainly is beyond me," Tolliver went on irrepressibly. "I guess I ain't very inquisitive. But I'm tellin' the world that if any ghost or banshee or what not wants to come in through that door or go out, there ain't goin' to be any interference from me. I'm stayin' here until daylight when I may feel safe about goin' home on the bay road. What happened to Miss Williams?"

Hazel Stanton, who had been holding the wrist of the prostrate girl, looked up at him.

"She's just fainted, I think," she said. "Offhand I'd say she has had a horrible fright."

"No worse than she gave me with that shriek of hers," declared Tolliver. "People with nerves like that shouldn't play around in the dark."

"Miss Williams' nerves are easily the best in this company," Ardwyn declared, still huskily. "She shamed me into staying here and if I hadn't bumped into the door or whatever it was, I probably should have fainted myself."

"What did she see after the door opened?" inquired the girl with the red hair.

"I don't know that she saw anything, Miss Stanton," the lawyer told her. "It was pretty dark in here. And I was only vaguely conscious of what was going on. I think she said something about colliding with a corpse. . . ."

A CORPSE. . . . The voice was Hari Singh's but barely recognizable. "That bears out what I said. I recognized the white scarf the minute I saw it. With my own hands I put it about the shoulders of Peleg Turner before they laid him in his cof-

fin. . . . It was his mother's scarf. I couldn't be mistaken in it. . . ."

Ardwyn interrupted him.

"She's coming around now," he said. "Stand back a little and give her quiet. We can ask her a little later to tell what happened to her."

"Seems to me you're showing her a lot of consideration," snapped Aunt Helen.

"I don't think I quite understand what you mean, Mrs. Holmes," retorted Ardwyn.

"Well, I notice this. Trouble just seems to be a-followin' her around. It always does follow these flighty young girls. There have been some funny goin's on in this house tonight and this girl has been mixed up in all of them."

"For that matter, Mrs. Holmes, we have all of us been mixed up in them. It's a bit early to go fixing our suspicions upon one person—particularly before we know what to suspect them of."

And Mrs. Holmes' shrill plaint was not repeated.

On the fringe of the crowd, however, she found sympathy in the whispered commendation of Cousin William.

"I think you're just right about that,"

he told her in a half whisper. "Yes, indeed. I don't trust that Williams woman, either. And I'd trust Jezebel farther than I would that red-headed hussy who's rubbing her wrists."

"Virtue is its own reward, like I always says, Cousin William," Aunt Helen told him as one philosopher to another, "and I knew trouble was a-comin' when I first laid eyes on these girls. That red-headed Stanton woman is a bad lot, I'm tellin' you that, Cousin William. Mary Williams is bad enough. But I'll tell you somethin' for your own good an' don't breathe it to a soul. Hazel Stanton is worse. . . . Would you believe it, when some woman in this room was chawing the hand off of Ardwyn, that Stanton woman wasn't in her chair!"

"What?"

"I'm not fooling you, Cousin William. I'd not be makin' a joke out of anything so serious an' solemn as this. But she—certainly—was—not—in—her chair."

"But, Aunt Helen, what surprises me is how you noticed it. You had fainted. . . ."

"I recovered, my boy. I ain't never fainted so bad yet that I couldn't tell when evil was goin' on around me. It's just the natural unconscious feeling I have about sin an' wickedness. I know when they're around. The girl seems to be openin' her eyes. She looks groggy but I guess she'll be all right."

"Miss Williams needs all the air she can get," Ardwyn said. "I should suggest that all of you go back to the library and finish your coffee. If Hari Singh will get me a bandage and some hot water I think I can take care of the first aid work."

There was no audible objection to the program. The movement back toward the library was quick enough and concerted enough to be classed as a stampede.

A RDWYN took Miss Stanton's place at the girl's side. "They are gone, Miss Williams," he said to her. "Was there something you wished to say to me?"

"I was not so brave as I had thought," she replied weakly. "I didn't know it would be like that." She shuddered. "It was a dead man, Mr. Ardwyn. I felt his flesh. It was clammy and cold. And instead of trying to hold him I tried to get away."

"Don't bother to talk about it," he suggested to her. "You are all unstrung and probably couldn't remember what happened even if you tried. I should like to get you a stimulant if you wouldn't mind being alone a minute or two."

"I have no choice," she answered. "Anywhere in this house I should feel uneasy. I do not think I shall be any worse off here than elsewhere. The dead man went out with the shoes. He probably will not be back again."

"Just what do you suppose a dead man would want with shoes?"

"I'm sure I don't know. I don't know why a dead man should leave a comfortable grave on such a night as this. . . . All I know is that one did. But don't mind me. I shall be all right with the candle lighted and the door to the hall open. I think I am only half awake now. Nothing seems to matter—and I was dreaming just a moment ago of Milford Jones. I seemed to see him going out through that front door. I seemed to see him dying to keep up the old tradition. . . . But I was not alarmed about it. . . . Oh, don't mind me, Mr. Ardwyn. I'm quite all right, only weak and dizzy."

"I'll get you a stimulant and be back in a moment," he said rising. "Surely we have had our share of excitement for one night."

The girl was vaguely conscious of his footsteps becoming less and less noticeable on the bare parquet floor of the hall. Then came the old silence and the old sounds—the clock, the storm, the muffled voices—and one more dire if no

\$500 in Gold

FOR THE SOLUTION OF

"a Step On the Stairs"

REPRINTS NOW AVAILABLE

NATION WIDE interest has been created by this thrilling mystery story. Listeners in sunny California, chilly Maine, the Province of Quebec and old Louisiana are endeavoring to solve the tangle of clues. Because this is true, and so many people are attempting to win part of the \$500 in Gold prizes which are being offered, a reprint of the first four installments, complete in every detail, has been printed and may be had for the nominal charge of twenty-five cents, in coin or stamps, to cover the cost of handling. If you have missed one or more of the preceding installments you will want this reprint to help you solve the mystery and win a prize. Address your letter to the Mystery Story Editor, care of Radio Digest. Besides the story there appears in the reprint a number of questions which may be helpful in formulating the solution.

The story, "A Step On the Stairs," is written by Robert J. Casey, an author whose works in the literary world need no introduction. Furthermore he is well versed in the needs of such fiction for Radio presentation. His work, in turn, is being Radio dramatized by Fred Smith, Managing Director of the United States Radio Society, who can be counted among the first few men to write and present Radio plays.

Read the story and hear it played weekly from the selected stations. Don't miss this thriller, whether or not you intend to submit a solution!

The chosen stations, which will broadcast "A Step On the Stairs" in Radio play form, are given on page thirteen. The days and the hours are listed.

THE PRIZES

The prizes are seventeen in number. First prize is \$250; second prize

is \$100; third to seventeenth prizes inclusive, are \$10 each. In the event of a tie for any prize offered, a prize identical in all respects with that tied for will be awarded to each tying contestant.

HOW TO WIN A PRIZE

Nine installments of Mr. Casey's story will be published consecutively each week. The first appeared in the February 27 issue. His tenth and final installment will not appear until the prize winning solutions have been selected by the judges. The solution nearest correct, that is, nearest to unravelling the mystery accurately, will win. The method of preparing the solution—its neatness, legibility, etc.—shall be considered in the selection of the winning solution. It should not be difficult for the average reader to study the story carefully and arrive at a logical solution.

RULES OF CONTEST

1. The contest opened with the February 27 issue. All solutions must be received by Radio Digest not later than midnight of Saturday, May 1. The ninth installment of the story will appear in the April 24 issue. The author's intended and final chapter will appear in the May 15 issue of Radio Digest, together with the announcement of the winners' names.

2. The contest is open to everyone except employes of Radio Digest and their families.

3. Contestants pay no fee and need not be subscribers to Radio Digest. Solutions, however, must be written upon but one side of paper, and names and addresses should be written or printed plainly.

4. The decision of the judges, to be named later in the contest, will be final.

BEGIN NOW to Read This Thrilling Mystery Story and Hear It Played Over the Air. Perhaps Your Solution Will Win One of the Many Prizes.

less familiar. A step was descending the stairs.

Mary Williams came back to full consciousness with a quick intake of her breath.

"Who's that?" she demanded in a voice no more than audible. "Who is it?"

The steps came nearer. They turned at the hall door and a figure slipped stealthily into the room.

"A man!" she whispered. "A man!" And then in a hushed tone that combined awe, amazement, and the fervor of a prayer: "John . . . John Carton. . . You have come back to me. I thought you were dead."

CHAPTER EIGHT

The Body in the Snow

WITH an alert eye watching the hall door, John Carton stole across the room and dropped to his knees on the floor between the fireplace and the huge leather chair from which the girl had partly risen.

"I was in the linen closet at the head of the stairs," he explained rapidly. "I overheard what that man said to you and I guessed you might be alone. I had to talk with you."

"John, where have you been?"

"I can't tell you that. I can't tell you anything until this night is over and the police are in the house."

"The police?" she repeated almost unbelievably. "John, do you . . . want the police . . . here?"

"Why not?"

"But, boy, they have been looking for you. They have been accusing you of murder. Don't you know that?"

"I know it. Somebody killed Jeremiah Turner. I was here. I went away. It looks like what the police would call a prima facie case."

"But you didn't kill him?" she pleaded. "You won't lie to me, will you, John? You didn't kill him. Tell me you didn't kill him!"

"No," he said slowly and a bit coldly. "I didn't kill Jeremiah Turner."

"I knew it, John. I felt it—always. . . . But, oh, you don't know the weariness of all these months I have put in waiting to hear you say it. . . . Who did kill him?"

"I can't talk about that, Mary. There isn't time."

"You are shielding somebody."

"I am not shielding anybody."

"Why did you run away?"

"Hush, Mary, don't work yourself into

hysteria. I tell you there isn't time to talk about these things now."

"What did you come back for?"

"To prevent another murder. It's on the books for tonight. I know it just as surely as I know I shouldn't be here now. And I am beginning to wonder if after all I can stop it."

"Murder?" The girl's voice was a trifle skeptical. "Are you sure you are telling me the truth, John?"

"I haven't time to give you evidence, Mary. You've got to believe what I tell you."

"Are you sure Hazel Stanton had nothing to do with your going away and that she has nothing to do with your return?"

He showed some signs of irritation. "Who is Hazel Stanton?" he inquired. "I never heard of her."

"Don't tell me that, John. I saw the two of you there under the porte-cochere on the night of the murder. I saw her red head in the moonlight. And I saw your white face as you talked to her. . . . I have tried to trust you, John. Why won't you give me a chance?"

"I can't explain, Mary," he admitted helplessly. "I can't say anything that will make you believe in me. But you have to believe in me without explanation. You have to. I came here to tell you . . ."

BEFORE he could finish, the murmur in the library grew ominously louder and the voice of Ardwyn was heard in the kitchen beyond.

"Hari Singh," he was calling. "Hari Singh, where are you? Isn't there anyone in this house knows where the medicine chest is?"

"They're coming back," gasped John Carton. "I didn't know they were in the library. . . . I'm caught!"

"There is some way to open the front door," she told him. "It's been open oftener tonight than in the hundred and fifty years this house has been standing here."

He drew back from her. "Hush, Mary," he told her. "You don't know what you are talking about. Only corpses have ever gone through that door."

"At least one live man went through it tonight," she countered hastily. "And you've got to get out of here."

"I'll let them take me before I'll try to get out through that door," he declared with finality. "And I guess the game is up. Here's someone now."

"Hari Singh!" breathed Mary.

The Indian looked at the pair as casually as if he had expected to find them there.

"This way, Sahib," he said. "And be quick about it."

"Go with him and God help you," the girl commanded him.

"Good-bye, Mary," he whispered hastily. And he moved rapidly about the table to the door where Hari Singh stood waiting for him. A moment later the side door creaked open and slammed and the guests were moving diffidently back into the room.

"THOUGHT I heard someone in here talking," volunteered Henry Graves from a point beyond the candle light. "Funny, isn't it?"

"What did Ardwyn send us back here for, anyway?" demanded Tolliver.

"My reputation will never survive this night," sighed Aunt Helen.

"Where is Ardwyn?" growled Henry Graves.

"I'll be there presently," called the lawyer from the hallway. "Hari Singh must have put the medicine in the safe."

He pushed through the group at the door and carried a glass of white fluid to Mary Williams.

"I found it at last," he said. "It's a simple sedative. You'd better drink it. You'll need it before dawn. . . . Didn't I hear Hari Singh in here a moment ago? What became of him?"

"I don't know," the girl replied dully. "I heard him say something and then the side door slammed. Maybe he went out."

"Why should he go out in a storm like this?"

"I don't know. I just thought he had gone out."

He pushed through the group at the door and carried a glass of white fluid to Mary Williams.

"I found it at last," he said. "It's a simple sedative. You'd better drink it. You'll need it before dawn. . . . Didn't I hear Hari Singh in here a moment ago? What became of him?"

"I don't know," the girl replied dully. "I heard him say something and then the side door slammed. Maybe he went out."

"Why should he go out in a storm like this?"

"I don't know. I just thought he had gone out."

Tolliver sniffed.

"Why get excited about it, Ardwyn?" he asked. "What's there to be surprised about if anybody in this festive madhouse take a notion to go out runnin' around in the snow or walkin' on his hands or imitatin' a sea lion? Maybe he did go out. An' I'll bet if he did you'll find him wearin' a straw hat."

"Please be quiet, Mr. Tolliver," advised Ardwyn. "If Hari Singh went out he had some good reason for going. Hari Singh is sane—whatever may be said for the rest of us."

A whistle of wind and the banging of the side door interrupted him.

"That's the door now. Who came in?"

"That's the door now. Who came in?"

"That's the door now. Who came in?"

"That's the door now. Who came in?"

lift him alone." His voice was unsteady from over-exertion.

"Lift whom?" demanded Mary Williams in sudden panic. "What is he talking about? Oh, Mr. Ardwyn, what has happened now?"

"Who is it, Hari Singh?" the lawyer asked him.

"I do not know his name," the Indian replied, "I found him out there in the snow. I think he is dead."

"Dead," shrieked Mary Williams in wild hysteria. "Dead. . . . He can't be dead. He was alive only a moment ago."

Who was it that came in the awful front door as Mary and Ardwyn sat watching? How did

The Indian looked at the pair as casually as if he had expected to find them there. "This way, Sahib," he said. "And be quick."

she get Peleg Turner's funeral scarf in her hand? Why has John Carton returned? Whose murder did he seek to prevent? And whose body has Hari Singh brought in from the blizzard? Can it be that John Carton has returned to prevent a murder only to be felled himself? Read the fifth installment of Robert J. Casey's story next week in Radio Digest. Perhaps some of these questions will be answered.

KTNT BOSS THROWS JAVELIN AT HOOVER

CHARGES SECRETARY HAS FAVORED SOME FIRMS

Seeks Senator to Instigate Administration of Radio Affairs Alleged to Be Mismanaged

WASHINGTON.—A senatorial investigation of the department of commerce administration of Radio was asked recently by Norman Baker, owner and operator of Calliophone Studio K-"TNT" of Muscatine, Iowa, and president of the American Broadcasters, an organization composed of independent stations.

Mr. Baker charges discrimination in the radio affairs as administered by the department of commerce, stating that the department is mostly interested in the passage of the White and Dill Radio bills because the officials have violated the laws so many times that they now seek protection.

Wants Chain Stations on Same Wave

Before the committee on interstate commerce of the senate, Mr. Baker viciously attacked the department of commerce's activities, and suggested many changes in the Dill bill. He suggested no power over 500 watts be allowed for stations when broadcasting simultaneously, and such stations be located 500 miles or more apart, thus preventing complete monopoly of the receiving set dials which now is the case when a number of stations are connected together.

He urges the same wave length for all stations operating in a chain, and answered those who claimed it is impossible by advising the committee he has filed for patent on such a system that will enable any number of stations to broadcast simultaneously on the same wave without interference.

Denounces Hoover as Villian

Baker branded as false, or misrepresentations, the data supplied by the departments on some Radio matters, claiming it may have been done to mislead the public.

He further asserted that the department of commerce has discriminated in the allocation of wave lengths, putting capital and powerful interests on the few select wave bands above 280 meters and crowding over 459 stations together between 200 and 280 meters, with great interference. He said there were open wave lengths in New York city, supposedly held for favorites or some powerful station, perhaps WJZ at Boundbrook. He attacked WJZ, the 50,000-watt station at Boundbrook, as to their right, under an experimental license, to broadcast programs and advertising with higher power than others are authorized to use.

Mr. Baker stated he can produce sufficient evidence of discrimination to warrant a complete investigation of the Radio administration in America, which he will start as soon as arrangements can be made with a senator to introduce the resolution in the senate. He added that the White and Dill bills should be defeated because they protect the "interests" more than the public.

TOWNS OF PANHANDLE PLAINS GIVING SERIES

Artists from Different Points in Region Perform at WDAG

AMARILLO, Texas.—The Panhandle Plains publicity programs that have been scheduled at Station WDAG, the Martin broadcast station of this city, have been very successful in their efforts to entertain the Radio world.

The closing series of these programs will be broadcast beginning March 23. During the following three weeks, artists from many different towns in the Texas Panhandle Plains region will be heard over WDAG.

The towns to be represented are: Canadian, March 23; Crosbyton, 24; Post City, 25; Booker, 26; Estelline, 27; Follett, 29; Hedley, 30; Idalou, 31; Lockney, April 1; Miami, 2; Muleshoe, 3; Perryton, 5; Plainview, 6; Spearman, 7; Stratford, 8; Wellington, 9; Ralls, 10; Lorenzo, 12; Mobeetie, 13; Channing, 14. All of the programs will begin at 9 p. m., Central time.

Program on 10 Watts Power Is Received Across Country

PROVIDENCE, R. I.—What appears to be a new broadcasting record was made recently when a program sent from WGEM, here, with but 10 watts of power was received on a loud speaker in the state of Washington. A post card giving the time and the selections played was received at the station saying that the program came in clearly through slight interference from KFWI.

DEMPSEY NERVOUS WHEN FACING MIKE

DENVER.—To Jack Dempsey there probably is one ordeal less trying than facing the microphone for a swing at static. That, say Denver sports writers and observers, is a good stiff battle in a squared circle.

Giant that he is, the heavyweight champion can show his wares before an audience of any size without flinching and, as he declared recently over KOA here, is prepared to defend his title against any challenger, but punching static is an entirely different story.

"Before starting his talk over the General Electric station, the champion was plenty nervous," observed the sports editor of one Denver paper. "First he stood on one foot and then on the other while being introduced to Radio listeners by Freeman H. Talbot, studio director. Next, he slid one hand into his pocket and finally put the other at his back."

In launching his Radio talk, Dempsey explained that his happiest days were the struggles of his early career.

"On all sides," he continued, "I am being asked when I am going to defend my title. In answer, I want to say, I am in the greatest shape of my career. I am ready to defend my title against any man in the world, Harry Wills preferred."

"Negotiations for this bout are shaping up so that I am sure a definite announcement will be made in a few weeks."

ANNOUNCER'S CALL IS IDENTIFICATION

David Lipton, Radio Director of Balaban & Katz, Gives Call to Cash Check

CHICAGO.—Speaking of the power of the press, the power of the screen and the like, hear this tale of the power of Radio. David Lipton, announcer and Radio director of the Balaban & Katz theaters, who broadcasts over WMAQ, WGN and WEBB, walked into a bank the other day to cash his weekly pay check. Having no account, being a Radio man, he was asked for identification.

He searched vainly through his pockets without finding anything to prove his employment with the firm.

"Say," he asked the teller, "Have you a Radio set?"

"Sure have," answered the money man, "the wife and I listen to it every night."

"Well then," said Lipton, "See if you can recognize this." "WMAQ," he called forth in true Radio fashion, "Broadcasting an organ program direct from the auditorium of the Balaban & Katz Chicago theater."

"You're the Balaban & Katz announcer," cried the teller promptly, "say that was a fine program you gave us last night. Have Fossler play 'Mother Machree' for us some evening," he continued gleefully as he passed the two dollars over the counter to the hard-working man.

Cupid Makes Conquest At Hollywood Station

Billie Dunn and Tom Breneman in Studio Romance

HOLLYWOOD.—Although listeners could only hear the call letters KFWB as the program came over the Warner Bros. "mike," it was really station LOVE broadcasting. Billie Dunn, popular studio pianist of the movie station, thought the day a little warm even for a California winter when a big, handsome newcomer from the East walked into the studio and announced that he was a singer. Later she confessed she capitulated when the singer, Tom Breneman, sang "Take This Rose."

One day the pair showed up at the studio with the announcement of the engagement and shortly afterward cupid finished the job. Now they are back at KFWB, Billie Dunn's fingers twinkling just a little more as she plays and Tom Breneman sings his ballads with just a little more sentiment, a perfectly happy Radio-romantic couple.

WLW Is City Mouth-Piece

CINCINNATI.—Col. C. O. Sherrill, city manager of the city of Cincinnati, has appointed Powel Crosley, Jr.'s broadcasting station WLW, the official mouth-piece of the city. Messages of importance to listeners all over the country will be sent through the station.

The New Radio Book

HOW TO

Operate Sets Construct Parts Improve Reception Understand Radio Assemble Circuits

REVISED EDITION

FREE With One Year's Subscription to Radio Digest

THE revised edition now contains the greatest assemblage of facts and hints, from actual everyday practice, ever gotten together. Edited by the technical staff of Radio Digest, it supplies the demand for a book covering every phase of Radio from a simple explanation of Radio reception to a technical explanation of the different parts of a set which leads to the best reception possible. The sections on selecting and making sets develops the different types of sets and circuits with diagrams to explain same. A seven tube super-het on a panel 7x18 inches, complete with all instructions, illustrations describing the wiring and actual size template is described. Just the thing for a portable this summer. Do you know how to get the best out of your set? "How to Operate" gives detailed information on the operation of all the well-known sets. The list of stations which is complete and revised, now contains all stations classified according to call letter, states and wave lengths. The section of workshop kinks will save the home constructor time and money.

Now is the time to take advantage of the exceptional offer as listed in the coupon for your convenience.

WHEN KYW PICKS UP THE CONGRESS

RATING with the most beautiful studios in the country, the Congress hotel pickup of Westinghouse Station KYW, is pleasing in its simplicity. The best of furniture and equipment are found therein. The Congress studio has its own staff, the members of which are shown above. At the left in the circle is Miss Eulalie Kober Stade, accompanist and pianist. In the group, left to right, are Miss Stade, Edwin Boroff, director of Congress studio; Miss Florence Pauley, soprano; and Harold H. Isbell announcer. KYW's studios are scattered all over the Chicago loop district. One is located in the Hearst building, and another, probably the most elaborate of the three, is in the Fine Arts building. The transmitter is on the Congress hotel. While its rated power is 25,000 watts, KYW uses but 2,000.

RADIO SERVICE ASKS FOR LARGER BUDGET

PLAN TO SPEND MONEY TO LESSEN INTERFERENCE

New Offices Would Be Placed at Strategic Points and Night Headquarters Force Added

WASHINGTON.—An increased appropriation of \$125,000 is recommended for the Radio service of the department of commerce in the appropriation bill for that department just reported to the house by the appropriations committee.

Plans have already been made by the Radio service for the utilization of the increased money to decrease interference. Deputy Commissioner Arthur J. Tyrer, of the bureau of navigation, gives the following account of how the money will be spent:

"We believe we should locate offices in the present centers of sending stations, at strategic points. In each of these sub-offices we should have an assistant inspector and one clerk. The new offices that we propose are at Dallas, Memphis, Los Angeles, Portland, Ore.; Pittsburgh, Buffalo, Denver, St. Louis, Minneapolis and Omaha.

Would Put On Night Inspectors

"At each of these new offices that we propose to locate, we would have an assistant inspector and one clerk. We are proposing to put one new man at each of the nine headquarters ports for night duty. Perhaps the most important broadcasting period is from 7 to 12 o'clock at night and at the present time our men who go on duty at 9 o'clock in the morning are continuing until along in the evening with their work. But it is rather heavy for them, so we propose to put on a night man at each of the headquarters ports.

"Then we propose to have one additional assistant inspector at Boston, New York, Baltimore, Atlanta, San Francisco, Seattle, Chicago and two at Detroit.

To Get Three New Radio Trucks

"We propose to get three new Radio-equipped trucks for locating sources of interference. We propose eventually to have one in each district. We tried one in the Detroit district first, to make sure that it would do what we thought it would do.

"During the time this Detroit truck has been in actual operation it has located 30 sources of serious interference and required the owners of transmitting stations to remedy the same. During this time 53 cities in five states were visited; 48 amateur, 15 broadcasting, 11 commercial, and 14 ship stations were inspected."

At the present time the Radio section is working under an allowance of only \$220,525 but the bureau of budget recommends \$354,000 for the fiscal year 1927. This was cut by the committee to \$335,000 but it is understood that an effort will be made to have the appropriation increased when it is taken up on the floor of the house.

Call for Aid Over Radio Brings Relief To Widow and Children of Storm Hero

Family of War Veteran who Fought Raging Seas on Santa Monica Bay Receives \$3,800 After Story Is Told to Listeners In at Station KNX

HOLLYWOOD.—When raging seas and unheard-of high tides swept in on the Santa Monica bay district near Los Angeles during the latter part of February, threatening destruction to piers and shipping and wrecking many of the cottages that had been built on the beach, a war veteran named Harry Hoover was one of the tireless ones who worked night and day saving the lives and property of those who lived on the shore. During the height of the storm he was swept out to sea and, presumably, because his strength had been exhausted in his fight for others, was unable to beat his way to shore and was drowned, leaving a widow and three small children.

The word of Harry Hoover's death came to G. Allison Phelps, Town Crier at Station KNX in Hollywood, who, with the permission and help of Naylor Rogers, manager of the station, decided to call on the Radio audience to help the grief-stricken and penniless widow. At the time word came of Hoover's death, the station was booked solid with toll programs but sponsors came forward and donated five,

ten and fifteen minutes each so the Radio audience could be told of the tragedy of the drowning, as well as the greater tragedy that faced the surviving little family.

The response was immediate, people phoning in their donations, and others, finding it impossible to get KNX by telephone, came in person to the studio to hand in their contributions. At 12 o'clock, when the station usually signs off for the night, about \$800 had been received and the telephone service still was paralyzed with incoming calls, so gathering a few of the artists together KNX continued on the air with a special Harry Hoover program that lasted until 4:30 in the morning.

A few days later G. Allison Phelps took a check for \$3,800 to Mrs. Hoover; contributions were still pouring in from all over the country, and means and ways of erecting a fully-paid-for home were being completed.

"It is a thing like that that gets under a man's skin," said Naylor Rogers afterwards, "and that makes this Radio game the biggest and most interesting one I know of."

BALABAN AND KATZ ENTER RADIO FIELD

CHICAGO THEATROWNERS EMPLOY FOUR STATIONS

Choice Bits of Musical Programs and Entertainment Are Broadcast by Remote Control

CHICAGO.—Balaban and Katz, owners of the Chicago, Roosevelt, Uptown, Central Park and Tivoli theaters, Chicago, have completed arrangements with stations WMAQ, WGN, WEBB and KYW whereby the choice bits of their musical programs are broadcast at intervals during the week.

Studios have been constructed in the theaters controlled by Balaban and Katz and are hooked up with the various stations by remote control.

Stage presentations are broadcast as well as the studio numbers, and the various stars appearing on the programs entertain Radio audiences during the period of their engagement.

The famous Sunday noon concerts of the Chicago theater are broadcast through WGN. The Balaban and Katz Radio review every Saturday night and the dinner hour organ concerts by Dean Fossler are nightly features from the Chicago theater through WMAQ. From WEBB every Tuesday night at 9 o'clock, Uptown theater entertainment is broadcast, as well as every Thursday afternoon between 3 and 4 o'clock.

KYW broadcasts midnight shows from the stage of McVicker's theater Wednesdays and Fridays.

Forbes Fairbairn, former Hearst staff correspondent in Europe and later director of stations WTAS and WCEE, has been appointed director of the Balaban and Katz Radio presentations.

Leon H. Wood Is Heard On Large Grace Church Organ

NEWARK, N. J.—Leon H. Wood, Orange, N. J., organist, was heard over WOR recently on the Grace Church organ, which is generally said to be one of the six largest church organs in the world.

The organ has taken nearly five years to build and is just now completed. It contains 300,000 square feet of lumber, has over 9,000 pipes and over 500 miles of wire. Of further interest, it takes two 20-horsepower electric motors to supply wind for this instrument, furnishing 15,000 cubic feet of air per minute.

Rochester Philharmonic Is Putting Concerts Upon Air

ROCHESTER, N. Y.—The Rochester Philharmonic orchestra has joined the list of notable symphonic bodies that are broadcasting their concerts by "going on the air." This happened recently when its program was carried by both WGY at Schenectady and WHAM at Rochester. Although other concerts have been broadcast from the Eastman theater and its kindred institution, the Eastman School of Music, this was the first broadcasting of an entire performance by the Philharmonic, the famous orchestral unit conducted by Eugene Goossens.

French Chamber Rejects Tax

PARIS.—The French chamber, after a heated debate recently, rejected the proposal to inflict a flat rate tax on all receiving sets in France. The tax was condemned as undemocratic and vexatious and as likely to interfere with a useful branch of public instruction.

PLEDGE CARD

Radio Digest

PROGRAMS Illustrated

Reg. U. S. Pat. Off. & Dom. of Canada

I WON'T BLOOP CLUB

I pledge myself to operate my Radio set to reduce radiation or blooping. If I am unable to make my present set operate properly, I further pledge myself to replace it with a receiver that will create less interference.

Make of my set:	Signature
Number of tubes is:	Address
	City and State.....

I am cooperating in this campaign with Station.....

Upon mailing this pledge to Radio Digest, "I Won't Bloop Club" membership card suitable for wallet or framing will be issued.

HAVE you offered to do your share in improving broadcast reception by co-operating with the thousands of members of the I WON'T BLOOP club? Listeners from Alaska to Cuba have joined this movement of the Radio Digest to clear the air, and already reports are reaching our offices telling of improved conditions brought about by neighbors getting together and eliminating dial interference.

Broadcasting stations, newspapers and Radio clubs which have secured chapters in the club and who are acting as individual units of the club, are sending in daily lists.

Do you belong to a Radio club? If so, have the club pass resolutions to follow an I Won't Bloop policy. Get the members' pledges. Fill one out yourself. Do it today. Then follow the pledge to operate your receiver properly.

AN EVENING AT HOME WITH THE LISTENER IN IN EASTERN TIME

Table listing radio stations by call letters, location, and broadcast times for Saturday through Friday. Includes stations like WQO, WRC, WSAI, etc.

STATIONS IN ORDER OF WAVE LENGTHS

Table listing radio stations in order of wave lengths, with columns for Meters, Call, and Station Name. Includes stations like WOK, WGH, WTB, etc.

'Mixing Panel' Handles Program on Five Mikes

WHT Engineer Installs Device to Control Group Broadcast

CHICAGO.—Overcoming one of Radio's most persistent difficulties, Reeve O. Strock, chief engineer of WHT here, has installed a "mixing panel" in the control room of the station. By this device, all five microphones and all incoming lines may be used to broadcast a single number, and the volume of sound coming over any one of these circuits can be magnified or subdued in relation to the others.

SAYS SECRET RADIO SYSTEM PERFECTED

PRIVATE COMMUNICATION POSSIBLE, IS CLAIM

Devise Involves Use of Three Wave Lengths with Set Working by Combinations

LONDON.—J. D. Chisholm, president of Secret Wireless, Ltd., giving evidence before the broadcasting investigation committee here, said recently his company had perfected a system of secret radio which enables signals to be received only by those for whom they are intended.

KOA Is Preparing for Big International Music Week

DENVER.—Eight full days of melody, embracing more than one hundred widely varied airway attractions, are planned for an international Radio audience next May, it is announced, when KOA, General Electric broadcasting station, bills Denver's far-famed music week celebration and annual spring festival.

Eliminate License Invaders

"Our system will eliminate the evaders, and the increased demand for the new type of instrument will reduce the price of tube sets. By selling 6,000,000 copies of our weekly programs at two cents each, the broadcasting companies will secure a sufficient revenue. The state might charge twenty-five cents a year for a receiver license.

KPRC in New Studios

HOUSTON.—Station KPRC, Houston Post-Dispatch, has been formally installed in their suite of studios in the new building of the newspaper. Two acoustically perfect and well appointed studios are separated with a spacious reception room for those visiting or waiting their turn on the air.

Name Sixteen Stations as Reliable for Calibration

WASHINGTON.—Sixteen code and broadcasting stations have been found by the bureau of standards to maintain sufficiently constant frequencies (or wave lengths) to justify their use in the calibration of radio sets. These stations are: WQL, frequency in kilocycles 17.13; NSS, 17.50; WCI, 17.95; WGG, 18.86; WII, 21.80; WRT, 22.60; WVA, 100; NAA, 113; WJR, 580; WEA, 610; WCAP, 640; WRC, 640; WSB, 700; WGY, 790; WBZ, 900.

TABLE SERVICE FOR COMPANY DINNER

BE WELL PREPARED TO SERVE COMPANY

HOUSEWIFE MUST LEARN TO BE GOOD HOSTESS

Success of Entertaining Depends Largely on Way in Which Work Has Been Organized

Have you heard, and do you regularly listen for Betty Crocker's Radio talks? Miss Crocker is nationally known as a home food specialist who is broadcasting from a dozen of the country's largest stations. By special arrangement Radio Digest has secured a series of exclusive articles by Miss Crocker dealing with her current Radio talks. These broadcasts are made through WEEL, WEAF, WCAE, WGR, WEAR, WWJ, WDAF, WJAR, WHT, WFI, KSD, KFI, and WCCO, the Gold Medal station at Minneapolis-St. Paul. All of Miss Crocker's recipes and discussions are based upon actual investigations and work of herself and her assistants in model kitchens.—Editor's Note.

By Betty Crocker

IS AN unexpected guest a calamity in your home, or are you the kind of a home-maker who is equal to any such emergency? Is a company dinner a real pleasure for your family, or is it occasion that they all dread? Perhaps you really like to entertain, but have not learned how to do it easily.

Whether or not you entertain easily depends largely upon the way in which you plan and organize your work. Some women never seem to know the limit of their endurance. Because they like to give pretty parties and nice dinners, they plan elaborate refreshments and expensive decorations and then wear themselves out carrying out their plans. I am not thinking of parties particularly, but of entertaining in any sense of the word. It seems to me that it is the duty of every home-maker to organize her work so that she can easily entertain an unexpected guest for dinner or have a party for Johnny's birthday without making an invalid of herself or giving the family a case of nerves.

Plan in Advance

Some of you may find that you are attempting to do unnecessary things when you entertain. Cut out the unessentials, and you will find that you can have as nice a tea or dinner or party and with much less trouble. My way of planning in advance for the dinner or party may not be your way at all, but I always find that it is easier to make my plans on paper. I like to go over all the details very carefully ahead of time, so that I know just exactly what I am going to do, and when, and how I am going to do it. The refreshments are planned and the grocery order made out some time in advance. All of the staples, such as sugar, butter, eggs, and Gold Medal flour should be purchased in advance, leaving the more perishable things to come on the day you expect to use them.

In the ordinary household, it is necessary to plan the refreshments according to the equipment. For instance, for the evening party, it may not be possible to serve a certain dessert if you do not have enough of the right kind of dishes. It may be necessary to change your plans for dinner when you consider that you do not have several sets of forks. Such little things make a great deal of difference in the ease with which any party

(Continued on page 12)

The table arrangements shown here were made in the home of L. A. Tripp, commercial manager of Station KFI, Los Angeles. KFI is one of the thirteen stations from the Atlantic to the Pacific coast which broadcast the Betty Crocker Home Service talks three times each week and over which Betty Crocker's famous Radio cooking schools are held. This table arrangement was made according to specifications outlined by Miss Crocker.

By Betty Crocker

SHOULD the bread and butter plate be placed at the right or the left of the plate?

If salad is served with the dinner course, where should it be placed?

How can I serve dinner to ten guests without being away from the table most of the time?

These and similar questions often puzzle the hostess who wants to have the correct service and yet does not have a maid to assist her. Perhaps a few rules to which you can refer occasionally will help the next time you forget whether the salad fork should go outside or inside the dinner fork.

Correct Arrangement of Silver

In laying the table, the silver should be placed one inch from the edge of the table and at right angles to it. The knife should go at the right of the plate with the cutting edge turned toward the plate. All spoons to be used are placed at the right of the knife with the bowls up. Forks are placed at the left. It is easy to know how to place the silver if you remember that it is always arranged in the order in which it is to be used from the outside in; that is, the first piece of silver to be used will be the farthest from the plate.

In case you are serving a meal in which knives are unnecessary, the forks may be placed at the right of the plate instead of the left. The water glass is placed at the right near the tip of the knife and the bread and butter plate at the left at the tip of the fork. The bread and butter spreader is placed across the bread and butter plate parallel to the edge of the table and with the handle turned toward the dinner plate.

Even Napkin Has Its Place

The napkin is placed at the left with the loose edges parallel to the forks and the edge of the table.

Salts and peppers may be placed in front of each guest or between two covers if they are to serve for two guests.

For serving the company dinner, the service should be simple if there is no older daughter or maid to help. A cocktail may be placed on the table before the guests enter the dining room. After the cocktail dishes are removed, soup may be served at the table by the hostess if you have a soup tureen, otherwise, it should be served from the kitchen. The service may be simplified by omitting either the soup or the cocktail, as that

will mean serving one course instead of the two.

Holiday Feast Setting

For Thanksgiving or any holiday feast, it seems more fitting to have the meat, whatever it may be, carved at the table. In addition to carving the meat, the host also serves all vegetables to be served on the dinner plate. Perhaps the eldest daughter sitting near can assist him. When meat is carved at the table, the carving knife and fork should be placed directly in front of the host, that is about ten inches from the edge of the table. The carving knife should be placed at the right and the fork at the left with space between them for the platter. All other necessary serving silver should be placed at his right. If you would keep peace in the family, be sure that the carving knife is sharp.

The warm dinner plates should be placed immediately in front of the host, then the platter placed in the space left for it and all vegetable dishes arranged at his right, as is most convenient.

Placement of Accessory Dishes

Accessories such as celery, olives, and jelly, may be arranged conveniently on the table in such a way as to help make the table a really pretty picture. When it is time to serve these foods, ask the guest nearest each to serve himself and pass it on around. Do not forget the necessary spoon or fork to go with each of these foods.

If the salad is served with the meat course, it should be placed at the left of each cover. Vegetables served in small dishes are also placed at the left. It is easy to remember that all service dishes are placed at the left with the exception of the beverage, which is placed at the right.

After one course of a dinner has been served, all foods and serving dishes should be removed first, then the dishes from in front of each guest. The table should be cleared of all soiled dishes and of all food dishes used in one course before the next course is served.

It pays to plan the service of your meal according to the china and silver on hand. If the service is carefully planned, it will not be necessary for the hostess to leave the table more than two or three times during the dinner.

A loud speaker extension in the kitchen is an excellent aid for the woman Radio listener.

SHORT WAVES

By Marcella

Now to let in the young boy friends, Cecil and Harold, on the personal life of their microphone heroines. Leona Teget of KMA, Shenandoah, Ia., is 22 years of age; 5 feet 9 inches tall; 135 pounds heavy; very pretty and practical; has blue eyes, light brown hair, and lots of talent. Yes, Harold, she is still single and I have no doubt but what she would be pleased to correspond with you. She was leading soloist of the Grinnell Glee club and now teaches Science in the Shenandoah high school. She's athletic, witty, versatile and a 100 per cent all around American type of girl.

And Cecil, who inquires about Ormah Carmean of the same station, will be pleased to learn that she, too, is single, very pretty and full of fun, has coal black hair, rosy cheeks and fair blue eyes, weighs 118 pounds, stands 5 feet 5 inches high, and has lived just 20 years. Don't trifle, however, as she is very sincere and has no make-believe in her. Yes, she does considerable announcing, and she also is associate program director. She attended Tarkio college, Tarkio, Mo.

"H.G.L.," another young man—not a sheik, he notes—admires Ruth Etting of WLS, Chicago, and would know more of her. You should read his praise, "sweetest voice on the air," etc. His hopes are to be dashed in the main, however, for she is married. Anyhow, she is pretty, blonde, has blue eyes, weighs 112 pounds, and was born about a quarter century back at David City, Nebraska.

Leo Fitzpatrick, the "Merry Old Chief" of WJR, is the target of C.E.H. Was Leo always an entertainer? No, except through the news columns. He entertained in that fashion by writing feature stories for the Kansas City Star. When Radio came along he just took hold of WDAF and made it famous. Last year WJR wanted him bad and acquired him. Speaking of his entertaining abilities, he did travel Chautauqua for one summer, but that was after he made WDAF famous, and as a result of the latter achievement.

No, Ethel, this is not Gene Rouse announcing, but I do smoke occasionally. I know Gene, however, and he'll bear me up that I am not him. Where is Gene? I don't know. He did go down to KFJF for an engagement, but I believe it was only for a visit and not a permanent affair. I'll have to hunt him up for you. Yes, "Tot" Kay, WSB's "Little Colonel" entertains me very much.

Speaking of nice, married announcers, D. R. P. Coats of CKY, Winnipeg, is one. Daddy's pride, Baby John Coats, got near the mike while a program was going on and let loose with a series of yells. Papa Coats was able to handle the situation. He stepped to the microphone and announced, "The solo you have just heard was contributed by John Coats." It happens that Winnipeg had a noted tenor, a John Coats, singing there that very day. Many applause cards were drawn by the impromptu solo.

An unsigned note from Terra Haute, Ind., requests information as to the where—

(Continued on page 12)

ADVANCE PROGRAMS FOR THE WEEK

Midnight at WOC, Davenport and "A Step On the Stairs." Left to right: Mary Williams, Henry Graves, (Mrs. C. H. Walsh in charge of "props"), Lawyer Frederick Ardwyn, Aunt Helen, Cousin William, Station WYX announcer and the revolver.

Here are also closeups of the two leading women characters. In the left corner is Marigold Cass as Mary Williams and in the right corner Lola A. Straw as Aunt Helen. Fans will be surprised to find Aunt Helen so attractive.

 WEEI, Boston, Mass. (348.6m-860kc), 7:10 p. m., D.

Schedule for "a Step On the Stairs" Broadcast as a Play EPISODE FOUR

THE SETTING

THE scene of our drama continues in the high-beamed hunt-room, the room that has been the scene of strange and mysterious crimes, of the Turner manse. Most of the guests, however, have gone into the library where Aunt Helen is serving coffee and sandwiches to all but Mary Williams, who has remained in the hunt-room, ostensibly because of fatigue, but in reality to wait for the return of the owner of a pair of wet shoes which had been left beside her chair. Mary persuades Ardwyn to remain with her. The candle goes out, and almost immediately in the darkness comes a cold draft of air. A moment later Mary cries out in anguish, Ardwyn does not respond, a body falls to the floor, there is a choked curse, a slamming door, and the others rush in, lights in hand, to find Ardwyn with a nasty gash in his forehead and blood all over his face, while Mary Williams lies upon the floor in a faint, with a white scarf in her hand—a scarf that had been buried with Peleg Turner.

THE CAST

Frederick Ardwyn.....Peleg Turner's lawyer
 Aunt Helen Holmes.....A relative
 Henry Graves.....A mysterious man Mary had known formerly
 Hari Singh.....Indian servant of Peleg Turner
 Mary Williams.....A youthful guest
 Maurice Tolliver.....A youth and relative
 Hazel Stanton.....A young lady
 John Carton.....Nephew of Peleg Turner
 Cousin William.....A relative

WHERE AND WHEN TO DIAL

WOC, Davenport, Palmer School of Chiropractic. Fourth episode at 10:30 p. m., Central time, on Friday, March 19. Fifth episode same time March 26. Dial 483.6 meters or 620 kilocycles.
 WOAW, Omaha, Woodmen of the World. Fourth episode at 8 p. m., Central time, on Saturday, March 20. Dial 526 meters or 570 kilocycles.
 KGO, Oakland, Calif., General Electric company. Fourth episode at 9:45 p. m., Pacific time, on Saturday, March 20. Dial 361.2 meters or 830 kilocycles.
 KOA, Denver, General Electric company. Fourth episode at 9:40 p. m., Mountain time, on Monday, March 22. Dial 322.4 meters or 930 kilocycles.

RUSSIAN STRING QUINTET AT KNX

High Lights of the Week

UNPRONOUNCEABLE titles to musical selections or tongue twisting composers' names mean nothing to the Hired Hand or his little symphony. Every Saturday night this famous organization struggles with these jaw breakers. Orchestra selections hitherto taboo because announcers feared to announce them are being successfully brought to light at WBAP.

Claudia Muzio, whose golden tones have enchanted opera audiences all over the United States, will sing for millions of listeners Sunday evening when she is heard over the WEAJ chain. The western headliner of the evening is the Russian string quintet at KNX.

A continuity program proclaiming spring to the Radio world is the Monday feature at WOS, Davenport. Famous spring songs of great composers will be reviewed. "Memories of Jennie Lind and Clara Schumann" is the title of the program to be given this same evening by Anna Barbash, soprano at WPG, Atlantic City.

Artur Argiewicz, a master of the violin who began his musical education under the eyes of Brahms, will broadcast Tuesday from KGO, Oakland. Argiewicz studied with Joa-

chim, Ysaye and Kreisler, traveling with the latter over Europe, taking lessons between concerts.

Wednesday evening, March 24, KOA will offer another novelty program. Part one, scheduled for 8:15 o'clock, will be a mock trial, to be conducted by prominent attorneys who represent the leading luncheon clubs of Denver. As the feature of part two, Hickville will stage an old-fashioned box-supper and auction party. Si Perkins, who runs the post office and general merchandise store, is expected to contribute much to the success of the gathering. Farmers for miles around will be in attendance, it is reported.

On the equator is the interesting city of Singapore where orientals and occidentals meet. Bishop Titus Lowe recently returned from this strange tropical city will talk Thursday at WIP, Philadelphia.

The Victor hours of music over the WJZ chain have attracted the attention of fans since the famous Radio scoop of the broadcasting of Marion Talley's Radio debut. This Friday two favorites of the Metropolitan Opera company will give the program, Madame Maria Jeritza, soprano, and Emilio de Gogorza, baritone.

WLW, Cincinnati, Ohio (422.3m-710kc), 7 p. m., popular organ concert, Johanna Grosse; 7:40, Secretary Hawkins Radio club; 8, Johanna Grosse; 8:15, Pac-trum concert; 9, old fiddler; Andy Hilde; 9:30, Don Hesters Recording orchestra.

WSOE, Milwaukee, Wis. (245.8m-1220kc), 5:10 p. m., twilight campfire, Boy Scouts; 9, Candygram review.

KFI, Los Angeles, Calif. (467m-640kc), 5:30-6 p. m., Kenneth Morse's orchestra; 6, nightly doings; 6:30, vest pocket program; 6:45, Radiovariety period; 7-8, dance program; 8-9, Dan L. McFarland, organist; 9-10, Paul Roberts, pianist; Mutual Motors mtrh contest; 10-11, Packard Ballad hour featuring popular songs.

KFOA, Seattle, Wash. (454.3m-660kc), 5:15-5:30 p. m., Around the Towne, KFOA; 7-8:15, Sherman Clay and company studio program; 8:30-10, Times studio program; 10-11, Jackie Souder's club Lido serenaders.

KFON, Long Beach, Calif. (232.4m-1290kc), 6-6:30 p. m., Brayton's theater organ; 6:30-7, amusement information; 7-8, program, Dalton & Hoagland company; 8-9, Press-Telegram studio; 9-11, Long Beach Elks, No. 888, frolic.

KFWB, Hollywood, Calif. (252m-1190kc), 6-7 p. m., dinner music, Fitzgerald Music company; 8-9, program, John Wright, the Right Tailor with Bill Hatch's orchestra; Peggy Mathews, blues singer; Bill Blake, tenor; 9-10, Len Nash and his original Country Boys orchestra; 10-11, Warner Brothers frolic.

KGO, Oakland, Calif. (361.2m-830kc), 4-5:30 p. m., Hotel St. Francis concert orchestra; 6-6:55, dinner concert.

KHJ, Los Angeles, Calif. (405.2m-740kc), 8-10 p. m., program, Western Auto Supply company; 10-11, Don Clark's Biltmore hotel dance orchestra.

KJR, Seattle, Wash. (384.4m-780kc), 7-8:30 p. m., old time songs, Lundquist-Lilly male quartet; 9:30-10, Post Intelligencer studio program.

KLX, Oakland, Calif. (508.2m-590kc), 8-9:45 p. m., studio program; 9:45-10:30, Athens Athletic club orchestra.

KMTR, Hollywood, Calif. (238m-1260kc), 8-10 p. m., KMTR concert orchestra, Loren Powell, director with Neil Russell as soloist; 10-11, Starr Piano company studio.

KNX, Hollywood, Calif. (336.9m-890kc), 5-5:30, Leighton's cafeteria orchestra; 6:30-7, Atwater Kent orchestra; 7-8, program, Jell-X-Coll company; 8-9, program, John A. Vaughn corp.; 9-10, Order of Optimistio Donuts; 10-11, fights, Hollywood Legion stadium; 11-12, Ambassador hotel dance orchestra.

KOWW, Walla Walla, Wash. (256.3m-1170kc), 8-10 p. m., McDonald school of music; 10-12, Blue Mountain Blue Jay program.

KPO, San Francisco, Calif. (428.3m-700kc), 1:30-2 p. m., Rudy Sieger's Fairmont hotel orchestra; 6:30-7, Waldemar Lind and the States Restaurant orchestra; 8-9, studio program; 9-10, Palace hotel orchestra; 10-11, Waldemar Lind and the States Restaurant orchestra; 11-12, Henry Halsted's orchestra.

KTAB, Oakland, Calif. (239.9m-1250kc), 12-1 p. m., concert; 8-10, program, Breuner's.

KWSC, Pullman, Wash. (348.6m-860kc), 7:30-9 p. m., Garfield high school girls' program; girls sextet; Ukulele four.

Educational Lectures Are Popular Feature of CKY

WINNIPEG, Canada.—The first series of university extension lectures to be broadcast in Canada was introduced in March, 1923, at CKY, Winnipeg. At that time no definite attempt was being made to use Radio in the dominion for educational purposes.

Prof. W. T. Allison, Ph. D., was quick to seize the opportunity presented when CKY decided to emphasize the educational possibilities of broadcasting and it is thanks to his vision and industry that the university lectures have become so popular with Radio fans in the prairie provinces. The professor is in charge of the Extension Service department of the University of Manitoba. He is also president of the Canadian Authors' association.

SUPER BALL Antenna

What Super Ball Does

Increases the selectivity of any set and can be used on any set, no matter what circuit. Clarifies the tone. Is non-directional. Easier to install and less expensive than any other. It cannot collect ice and snow. Heat has no effect on the Super Ball. It accepts radio frequency signals, at the same time rejecting a large part of the interference from atmospheric or casual electrical disturbances. It lasts a lifetime.

The Super Ball Antenna is ten inches in diameter.

Farm Radio Breaks Monotony

GIVEN her choice between a Radio and an electric washing machine, the average farm woman will take the Radio. She'd rather have a telephone than a water heater and a piano than stationary laundry tubs."

So says Mrs. H. M. Dunlap, wife of a man from the farm who has been elected to serve his district in the state legislature for thirty-two years. She herself has done all kinds of farm work and knows every phase of farm life in her forty-nine years on the farm.

The farm woman prefers escape from monotony rather than from drudgery, she explains. That is why the preference for Radio, the telephone and the piano over purely labor-saving devices. Her statement is based on a report representing the farm home life of 2,200,000 persons living on 445,987 farms in 237 communities. It is not merely hearsay.

We are glad that Radio helps the farm woman with her burden. It makes the drudgery seem less arduous, for we all can work and live happier with music in our souls.

"Step On the Stairs" Is Hit

ALWAYS at the outset of a brand new enterprise, while it may have been enthusiastically prearranged and planned, there is that moment of doubt when we wonder if the enterprise is going to "go over."

That was the feeling of Radio Digest when "A Step On the Stairs" was planned and started on its way to the stations to be broadcast as a serial mystery drama.

Would the public like it? Did the lines hold their interest? Could it be done so as to please the fans and make them want more?

New York greeted it with a tremendous ovation. J. Andrew White, the famous sports announcer, said, "A Step On the Stairs" has them all licked. It's absolutely the best thing of its kind I've heard played." Minneapolis-St. Paul's applause, too, was abundant. The Pacific coast was free with congratulations. Chicago met the serial play and was conquered.

And we are glad. We would not want to sponsor and promote an enterprise that is not popular. We hope the public likes this new form of Radio entertainment, and wish to get individual expressions from listeners.

Laughs in the Studios

BBROADCASTING stations, like other places, have their little laughs. Humorous happenings repeat themselves at the studios. Among the more common jokes is the entertainer who has his or her telephoned, telegraphed and written applause "planted" or arranged. It's bound to arrive, and many times does before the entertainer has appeared at the microphone.

The thousands of saxophonists, according to Radio program directors, who represent themselves to have been with the original Brown Brothers saxophone sextet, always draw a chuckle. Evidently the sextet was an army at one time or other.

The effusive maidens, worldly unwise, who formerly were matinee idol or movie hero worshippers, enter the comic side of broadcasting by their persistent correspondence. But the wives of the announcers don't mind. They are good sports.

In the same picture fits the adolescent male who hears a rippling soprano and henceforth falls in love. Many are the disillusionments when these youths learn their sopranos are past middle age and have married sons and daughters.

The "Big Business Men" from most anywhere, who are big hearted and willing to entertain their friends over the microphone, make up another class of amusing studio pests. You would think they were doing the stations a big favor, but tactful studio directors are usually able to handle the situation.

So broadcasting stations are human, after all. There are many laughs guaranteed at any studio, but we can't tell you all of them for that would spoil the illusion. Then perhaps you'd lose your interest in the mystery of the microphone.

RADIO INDI-GEST

Fable of the Chimes

Davenport was busy sending
Chimes, as they so often do—
And far off in Indiana,
Listening in and talking, too,
Two old men sat near a speaker
—One was very much impressed
By the beauty of the chimes and
His old crony he addressed:

"Them there chimes is mighty pretty!"
—But the other did not hear.
"Said those chimes is mighty pretty!"
He repeated loud and clear.
Still the other did not hear him—
—Only shook his old gray head—
So the first one fairly shouted:
"Chimes is BEAUTIFUL!—I said."

But the other could not hear him
And once more he shook his head
And confessed again he couldn't
Hear a "bloomin' word" he said!
"I can't hear a thing you're sayin'"
—These sad words his friend he tells—
"I can't hear a word you're speakin'"
For them gosh-danged ornery bells!"
CHARLES ALLEN BRANHAM

What Will Red Grange Do for a Job?

Fairice, Alaska.

Dear Indi-Gest: Thanks for telling me what made Oglahooa tern red.

Here is dyeagram of my new invenshun to ship ice by Radio so the people down to WJAX can get as much water in lumps as they want for thirty8cents. It works kinda cause I tried it out on some eskimauxes and when I turned on the juice, they wanted to use the head

phones for ear muffs. Doc Cook herd of it and told the warden to tell me I'm a genius. So's his uncle.

All you have to do is put the thirty8cents in the slot and turn the dial to the amt of ice wanted and it will come out in frozen snowballs redy to be served. I'm smarter than the averidge person. Always as ever,
KITTLE DRUMMER

All Right Mildred, Call the Roll

Both Noah and his son, Ham, made the Famous Fans club. Nominations are now in order.

Adam is the next celebrity for your consideration. He has been nominated by three persons. H. Gordon Hooton puts him up for membership because he did not get his "head set" on Eve and "transformer," and by H. M. Boorn because he sacrificed a rib to get a loud speaker. J. S. Neal adds that Adam should have special recognition because the speaker was made out of spare parts.

On My Ray De Yo

I bought myself a nine tube set,
Just twelve more payments to be met—
There's nothing that I shouldn't get
ON MY RAY DE YO.

A station down in Alabam'
Gives a pretty good program,
But all I get is bam—bam—BAM!
ON MY RAY DE YO.

I thought I'd like to hear Denver—
My set would surely bring in her.
The best I heard was whir—whir—WHIR!
ON MAY RAY DE YO.

Some friends of mine did me beseech
To try to tune in on Palm Beach.
I tuned in only screech—screech—SCREECH!
ON MY RAY DE YO.

The paper is before me now—
A farmer wants to trade a cow.
I think I'll see what he'll—al—LOW!
ON MY RAY DE YO.

MELANCOLUMN

A. Conan Doyle—Ask It Not To

Dear Indi: See where a mouse was killed when it short-circuited the system at CKAC. Maybe that's where all the squeals were coming from. Hope its ghost don't come back to haunt us.
SHOBIE

Pay Cash and Save Receipts

This is to warn Radio fans not to buy Radio supplies on credit because if shops will recharge batteries they will do the same thing on other accessories.

Holding Up His End

Condensed

BY DIELECTRIC

Somewhere I read a criticism of darky melodies to the effect they were presented too frequently. Maybe so, but I'm wondering if that person listened to the Tuskegee quartet as they sang from the studio of Station WSB, Atlanta. There are some correspondents to Radio Digest who express a preference for jazz to the exclusion of classical music. They were well answered recently in the Reader's View column. These negro melodies are an essential part of American musical history and never so well rendered as by trained NEGRO singers.

Station WGY, Schenectady, selected one of the old melodious Italian grand operas to entertain their Radio listeners—an opera containing at least one aria familiar to all, "The Last Rose of Summer," from Martha. The spirited singing of the chorus was particularly enjoyable, if not the most so of the entire opera. Surely Martha is easily understood.

What has happened to Station WMBF? During the presentation of a dance program we had to await the completion of several numbers before learning the identity of the station. Let WMBF remember there are several broadcasting stations in that booming state, some of which reach farther north and with greater power than it. The station calls demand slight effort on the part of the announcer and must be given as requested.

Despite my good friend, The Third Trombone Player, I am not a soak nor even moist by Volsteadian measurement, yet my dials were carefully set to WRC's wave to listen to the fiery oratory of Senator Edwards, of New Jersey, who preceded Senator Brookhart, of Iowa. The idea of a "forum" as arranged by this Washington, D. C., station is a good feature. It allows us folks back home to hear our brilliant representatives talk on subjects they think we want them to talk about. We do. It sometimes happens they don't take the side we take, though. Until these gentlemen spoke over the Radio, no one knew the anti-saloon league was a super-state, involving entanglements—in spirit at least.

Listening to Radio features seldom make one dizzy, except where a learned professor talks on an abstract thesis, or three stations on low meters play the Charleston in thirds. However, Station WLS, Chicago, made some dizzy flights from Georgia to South Dakota and back, covering the country housing their many stores—the Sears-Roebuck stores of course. Anyone familiar with the cities visited could readily picture them as the director of the tour described various streets with their landmarks. This proved to be an entertaining diversion.

I can find no especial reason for lingering around Billy Penn's statue to overhear what Station WOO has to profer, though at times on the way down from WOAW, or WHO, I stay in Philadelphia a moment or two. On the last occasion it was to find a clear harmonic of the station on about 260 meters. This time listeners were being entertained with dance music from the Hotel Sylvania. The music was not bad at all and, in fact, our stay was beginning to become pleasurable when it came time to sign off for the night. Then the announcer dismissed his unseen audience in a perfunctory manner never approached in the experience of Dielectric by any other station. Really frigid.

ABC Radio Fundamentals for Everybody

Chapter XI—Radio Receiving Circuits (Cont.)

By Milo Gurney

IN the fall of 1922, a considerable furor was created in Radio circles by the advent of a group of circuits called reflex. In these, one or more tubes were so connected as to do double duty through functioning as both radio and audio frequency amplifiers. In these first circuits, the current at radio frequencies went through the tubes progressively, into the detector and then, at audio frequencies, went through the amplifying tubes a second time in 1, 2, 3 order. The straight reflex was followed by another system termed Inverse Duplex. In this system, the energy at radio frequencies first goes through the tubes in 1, 2, 3 order, as before, but the audio frequencies are passed back through the tubes in 3, 2, 1 order. This gives a better balance in that minimum radio frequency energy and maximum audio frequency energy are on the first tube, while maximum radio frequency currents and minimum audio frequency values are on the third tube.

In both systems, either a crystal or tube detector might be used, with the latter favored because of increased stability. In many cases these circuits functioned acceptably, although as a rule they were lacking in sufficient selectivity and were difficult to keep in a condition of sensitivity just below oscillation.

In Defense of Reflex

In defense of the circuit, it is but fair to state that the prime reason for its present lack of popularity rests upon the fact that the early efforts showed the need of added research. It is readily possible at present to construct reflex circuits which are not only more selective but compare favorably with many circuits which are less involved in critical constructional details.

A typical reflex circuit is shown in figure 26. This is a three tube idea using a crystal as detector, and comprising a total volume output equivalent to five tubes. The circuit indicates no radical departures from standard reflex circuits, while it is dependent, as all other reflex circuits are, upon a correct balancing of

Figure 26

capacities together with the strict avoidance of interstage coupling for successful operation.

Hazeltine Starts Avalanche

As outlined in last week's article, great credit is due Professor Hazeltine, inventor of the neutrodyne method of oscillation suppression. His work acted as the incentive for a multiplicity of engineers (and others) to bring onto the market a host of "dynes" and what have you, which, as might be expected, were mostly bad. Here and there, of course, there were tuned radio frequency circuits which were worthy of the purchaser's serious consideration.

The outstanding effort along this pathway was marked by this year's offering of circuits which rely upon the Wheat-

stone bridge method of balancing for the suppression of undesirable oscillations. This system has not only been successfully employed in the construction of that which is termed as "straight" tuned radio frequency circuits, but has also found its application entirely feasible and of material benefit when used in circuits of the reflex type.

How of Wheatstone Bridge Circuits

A complete digest covering not only the principle, but its application to circuits of the above-mentioned class, was published under the author's name in a series of articles entitled "Recent Advances in Tuned Radio Frequency." These appeared in Radio Digest beginning with the May 29, 1925, issue.

However, in order that those following

this series may gain an insight into the method or principle underlying this system, figure 27 is shown as typical of the idea. In explanation, the theory upon which these circuits work is that through the adjustment of the relation existing between the arms of the circuit as shown at points C-1, C-2, C-3 and C-4, the current or signal may be caused to flow only in a forward direction from the input to the output circuit.

Therefore, because of this one-way action, feedback through the tube which causes oscillation is prevented, while a further, very essential, gain is had in both

Figure 27

selectivity and signal strength because of the absence of any opposed circuit coupling action.

Reflex Combined in Bridge

The circuit shown in figure 28 should be of unusual interest to those who are experimenting. It not only employs the Wheatstone balanced bridge principle, but also includes the use of tuned impedance

(Continued on page 24)

No More Static!

NEWEST, most startling invention eliminates static under all weather conditions. No loss of volume. Everything comes in clear and strong. No more exasperating buzzes, squeaks, and howls.

Start to enjoy the pleasure of your radio. Install a Static Eliminator and you can forget all about static forever. And not only that. You will increase the selectivity of your set—you will be able to tune out other stations easier, sharpen signals, remove noises, lessen interference, and prevent re-radiation. Over a half million Static Eliminators in use now. Thousands being sold daily. You will be enthusiastic too when you hook it up to your set and hear the amazing difference.

Amazing Low Price

\$1.00
Postpaid

This wonderful new invention sells for only \$1.00. Users say it's easily worth ten times this price because it produces such a wonderful improvement in receiving power and clearness of all radio sets.

STATIC Eliminator fits all makes of radio sets. A child can hook it up in half a minute. Lasts a lifetime.

The Static Eliminator is sturdily made to give many years of perfect service. A simple, but effective device that hooks up to any make of set in 30 seconds. Complete, easy to follow directions included with every Eliminator. You will be amazed at the immediate improvement in your results. Mail coupon for your Eliminator now.

Satisfaction Guaranteed

You will be delighted with the results of this remarkable instrument. That's why we guarantee absolute satisfaction. Money back if Static Eliminator is returned within 5 days. Don't be without it another day. Begin at once to know the real joy of receiving all stations without interference. Mail this coupon with a dollar bill—TO-DAY!

Use a Beldenamel Aerial

THE reason for the unusual efficiency of a Beldenamel Aerial is the great care exercised in its construction. Beldenamel Aerial Wire is made of several strands of pure copper, each coated with many layers of baked Beldenamel. The enamel coating prevents corrosion of the wire surface, and thereby offers a low resistance to the antenna current.

Ordinary bare copper aeriels corrode, and the volume and range of the set decreases. A Beldenamel Aerial never corrodes, and therefore the volume and range are not diminished by corrosion. Try a Beldenamel Aerial, in place of your old aerial, and hear the difference.

Interesting Facts About Beldenamel Aerial Wire

- Made in 100 and 150 feet lengths to avoid splicing for lead-in wire.
- Furnished in distinctive striped carton that is a safeguard against substitution.
- Endorsed by leading radio engineers as the best and most efficient aerial.

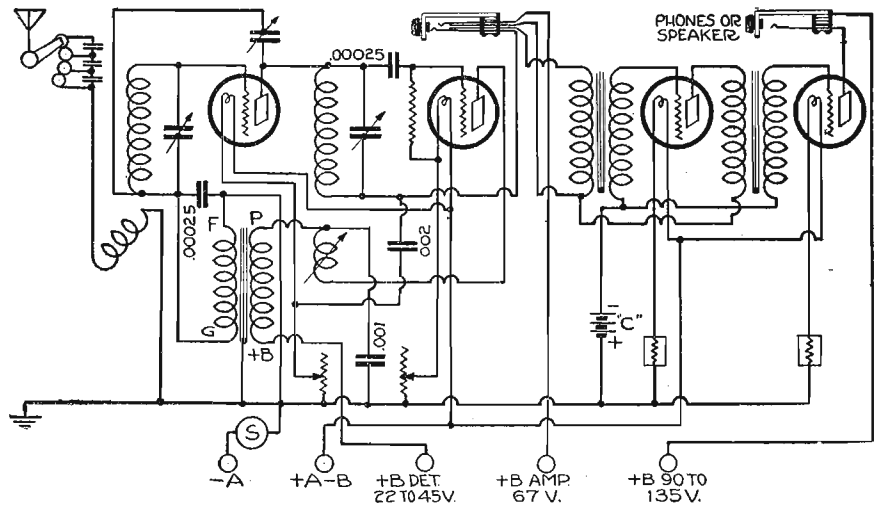

Figure 28

ABC'S OF RADIO SETS

(Continued from page 23)

in the detector circuit. To make it even more interesting, to this tuned impedance is coupled a combination of inductive and capacitive regeneration.

For fear that some rabid fan may still not be satisfied, and also in order to show

been marketed in "kit" form by several concerns.

Its regeneration is controllable through varying the inductive relation of the tickler employed, while its successful operation is, in a large measure, dependent upon both a careful selection of tubes to be used and the adjustment of the grid leak employed. It has the objection of

Figure 29

some of the complex possibilities of circuit combinations—which work—a stage of reflexing is included.

With reference to this circuit, I desire to warn that no values are given at this time, as the circuit will no doubt be offered later in a constructional series. Then a complete treatise will be given.

Another method, or rather application, of the use of tuned radio frequency is shown in figure 29. This uses a stage of tuned radio frequency in combination with a regenerative detector, the former employing the neutrodyne principle for the suppression of annoying oscillations. Properly constructed, this combination has proven very successful and has

only being capable of being balanced over a narrow wave band, such balancing not being independent of frequency, though its total operation is to be accepted as most satisfactory.

Out of pity, I shall refrain from pointing out the "fly in the ointment" chargeable to many so-called balanced circuits, in hopes that, from experience, those who are "mothering" such circuits will be taught the error of their ways.

(In the next article, the super-heterodyne will be described and explained by Mr. Gurney. Read what this author has to say regarding the "king" of circuits.—Editor's Note.)

New Type of Ray

Prof. C. E. Wynn-Williams, of the University of North Wales, England, has discovered a new type of ray, which he declares fills an important gap between broadcasting and Millikan rays.

While these new rays can penetrate air for several inches, they are stopped by all solids, even by gold leaf. X-rays can penetrate one-half inch of lead, as also can the recently discovered Millikan rays. Prof. Wynn-Williams suggests the new rays lie between ultra-violet and x-rays.

The scale of the different type of rays is:

- 1, Millikan rays (one 500,000,000th of an inch);
- 2, Gamma rays;
- 3, X-rays;
- 4, gap (new rays);
- 5, Ultra-violet rays;
- 6, Light rays (one 50,000th of an inch);
- 7, Infra-red and heat rays;
- 8, Gap;
- 9, Broadcasting rays, or waves, (up to 25 miles).

An investigation into the conditions for sparking between two electrodes revealed the new rays, which showed their presence by ionizing air so as to make it conduct electricity, as do the x-rays and the ultra-violet.

Photogravures of Your Favorite Artists
GALLERY of RADIO STARS

Suitable for Framing or Placing in Your Album

BY SPECIAL arrangement, Radio Digest is able to offer its readers a great opportunity to secure fine photogravures of their favorite Radio stars at practically no cost.

Radio fans will be able now, by this very special offer, to have pictures of their favorite artists and announcers before them when they listen in.

All that is necessary to secure photogravures from the Gallery of Radio Stars is to send the coupon published each week in Radio Digest, accompanied by ten cents to cover the cost of mailing and postage. Where a series of three photogravures is desired, it will only be necessary to send twenty-five cents and three consecutively numbered coupons clipped from Radio Digest. Remittance must accompany the coupon. Cash at your risk. Add 5 cents to personal checks for exchange.

How to Stop Blooping and Man-Made Static

Part VI—Dr. Hull's Amplituner

By the Technical Staff

IT MIGHT be well at this point in the series to insert a brief resume of what has gone before so that those just joining the movement for a better ether can follow clearly. In the first article, it was clearly shown, by excerpts from the reports of various investigating committees, that squealing interference, otherwise known as "blooping," is the direct fault of the broadcast listeners. Some

Figure 12

add to this trouble unintentionally, others do it knowingly with total disregard of the rights of others—and then complain about the blooping of their neighbors. Their own blooping is done "so very little" that it is not to be considered.

What Has Gone Before

The second part took up the subject of how and why various types of receivers

Figure 13

can squeal, and cause interference, and it was explained that the types known as "single circuit regenerative" and "three circuit regenerative" are not the only offenders by any means. We then got into correct receiver operation with some rules for the novice and old-timer alike, and some suggestions for charting the dials as a help against committing this breach

Figure 14

of Radio etiquette. The fourth installment went into the construction of the Penetrola, a commercially available device which is a true one-way repeater that permits the entrance of radio frequency energy to the set but does not permit any, in the form of oscillations, to back up into the aerial circuit.

Last week, the DeForest anti-radiation device was explained, and sufficient data was given for the insertion of the two small parts necessary to accomplish DeForest's method. At the same time, an input arrangement that would prevent suppers from radiating, was presented. Those who built their own could add this

very easily. Perusing back through some of our old issues of the various publications on the market we have come across a very interesting article in the August, 1924 issue of QST, the official organ of the American Radio Relay league, by Dr. Lewis M. Hull, on the construction of a one way repeater which he chose to call the Amplituner. While exact winding data on the construction of the output coil of his device was not given, this has been worked out in the laboratory and full constructional data is now available.

The RFL Bridge

The circuit of this device, drawn for discussion in a bridge arrangement, is

shown here as figure 12. To quote Dr. Hull's article: "It consists of a balanced bridge having two inductive and two capacitive arms. The incoming signal is impressed between the grid and filament of an amplifier tube across the two opposite terminals G and X of the bridge. The amplified voltage in the plate circuit of this tube is impressed across the other pair of opposite terminals P and F. The capacity between the grid and plate of the tube, Cm, and the associated wires, constitutes one capacity arm. The capacity between the grid and filament C1 is increased by a small adjustable parallel condenser Cc upon which the final adjustment is made. Once the balance is attained, the compensating condenser Cc is locked.

"The inductive arms consist of two coils L1 and L2 in series in the plate circuit

Figure 15

of the tube. The lower terminal of the input circuit is brought to the same a.c. potential as the point X between coils L1 and L2 by the use of coil L3 which is equal to and unity-coupled with L2. The only reason for using L3 is to keep the voltage of the plate battery B off the grid of the tube; if the battery were not present, the lower end of the input coil L would be connected directly to X."

This arrangement of Dr. Hull's gives a balance of capacity and inductance around the tube, such that radio frequency currents can enter the tube from coil L and will appear at the output terminals considerably amplified, but cannot pass from the output terminals, back through the tube, into coil L.

To further quote from QST: "In practice, the amplifier is required to do two (Continued on page 26)

Turn Your Phonograph into a Loud Speaker

with a **Fultone LOUD SPEAKER UNIT**

Big Price Reduction Now Only \$3.00

This unit is the secret behind the unparalleled success of Fultone Speaker. Its large diaphragm and bobbins of fine wire are protected from injury by a heavy nickel-plated case through the back of which adjustment is made by means of a special key. The pole pieces are not made from a solid piece of iron but are assembled from 15 laminations of carefully chosen steel.

MAKE THAT SET BATTERYLESS \$1

We will tell you how to make any radio set or circuit operate hum-free and successfully WITHOUT A, B, or C Batteries for

You can now make an **Electric Light Socket Radio Receiver** out of practically any Battery operated set, radio circuit or parts, and eliminate forever all A, B and C batteries, chemicals, chargers, continuous trouble, upkeep expense, disappointments and save easily \$75 a year.

Anyone—you, your battery-charging, electrical and radio service man or dealer who follows our instructions—can make it in short time at reasonable expense. Thousands are now doing it and thousands are now in the homes.

It will be as good as **POWEROLA**, the famous 5-tube no-battery electric radio (universal for A. C. or D. C.) now demonstrated and sold thru The New York Edison Co., your local electric light company, radio, electrical or music dealer.

Tested and endorsed by Popular Radio, Radio Broadcast, Radio News and all highest and leading authorities, and engineers, as being powerful, practical, perfect, dependable and constant in performance.

REMEMBER, YOU DON'T HAVE TO JUNK OR THROW AWAY YOUR OLD SET OR PARTS; THEY CAN NOW BE MADE INTO AN UP-TO-DATE ELECTRIC RADIO, THE LATEST AND BEST IN RADIO PERFECTION AND PLEASURE.

Send \$1.00 and we will mail you booklet containing 29 new and hitherto unpublished diagrams, information and literature, showing how to transform any old or new radio set, circuit and parts into an Electric Radio.

ATTENTION!

Radio Dealers, Set Builders, Fans, Experimenters and the Trained Men of Radio

Powerola is the Greatest and Sole Remaining "All Year 'Round," Money Making Proposition in Radio Today.

Powerola uncabineted receivers and units enable you, at surprisingly low prices, to supply almost every wish and demand of the people in your Town for a powerful, successful and popular-priced electric radio in a cabinet of their own selection.

Powerola enables you to make electric sets, or convert old or new sets or parts into electric sets, at handsome and continuous profits.

Act quickly before your territory is gone. Send \$1.00 for booklet, and ask for literature, terms and prices at once.

POWEROLA RADIO CORP. [Dept.] 1845 Broadway NEW YORK

HELP STOP BLOPING

(Continued from page 25)

things besides preventing the backward flow of current from the output terminals to the antenna. First, it must have a capacitive reactance between the output terminals which is equivalent to that of the 'average' antenna in order to allow the direct connection to its output terminals of any receiver designed to operate from an antenna; second, when such a receiver is connected to the output terminals, the resonance load in the plate circuit of the amplifier tube must be of such magnitude as to impress an amplified voltage upon this receiver.

"The provision of a suitable 'antenna-like' impedance, which will allow the receiver to retain its original tuning characteristics does not necessarily mean a fulfillment of the second requirement. A design for the output circuit was finally selected which allows the Amplituner to be operated into any receiver whose tuner is designed to operate at wave lengths from 200 to 600 meters; the receiving (set) tuner may be either single or double circuit, tuned by either series or parallel condenser, or it may consist of a so-called 'untuned' primary closely coupled to a tuned secondary, such as is used in commercial neutrodyne receivers. The design consists merely of the use of a continuous coil for inductances L_1 and L_2 , having an inductance of about 500 microhenries, shunted by a capacity at CA of 500 mmf., which gives an effective range of capacity between the output terminals of 300 to 450 mmf., between 200 and 600 meters."

The Parts Needed

When the circuit is drawn in the usual schematic fashion to which constructors are accustomed, it appears as in figure 13. The same identification numbers are used in both illustrations but C_m and C_1 are missing in this second diagram since they are inherent within the tube. The input coil L can be any of the antenna couplers on the market for use in neutrodynes or tuned radio frequency hook-ups to be tuned with a variable condenser of .00035 mfd., shown as capacity C . The small adjusting condenser, used to bring the grid-filament capacity up to the plate-grid capacity, may be any of the small balancing condensers on the market and we would suggest the Walbert listing at \$1.00 with a range of 4 to 75 micro-microfarads or the Bremer-Tully listing at \$0.90 and going up to 30 micro-microfarads.

A vernier dial such as the Mar-co is advisable although not absolutely essential. The coil L_1 and L_2 is made with 190 turns of number 36 dsc. wire on a 3/4-inch tube, occupying a winding space of just a little less than 1 1/4 inches. At one end, and wound tightly over that half of the coil known as L_2 , wind on 95 turns of the same wire for coil L_1 . The fixed condenser Ca is of .0005 mfd. capacity while the condenser C_2 is anything from .01 mfd. to .5 mfd. A suggested arrangement is shown in figure 14 and this unit may be nicely put behind a 7" by 9" panel. The rheostat is placed below the condenser dial and both are centered on the 9" dimension.

Should Be Shielded

This unit to be really effective, should be entirely shielded with some such material as number 26 half hard sheet brass, readily obtainable almost anywhere and, in Chicago, from Stebbins Hardware Co. A piece is cut exactly the same size as the panel and placed back of it, the condenser and rheostat holes being cut out a little larger to prevent grounding of live leads. The cover of the cabinet used should also be lined, with flexible wires connecting it to the rest of the shielding which is, in turn, connected to the negative A lead. The coils should be placed so that they are well away from the shielding and small bakelite or hard rubber pillars cut from tubing will do this nicely. The socket also, might well be lifted up away from the bottom shield.

Balancing

In connection with the balancing, we again quote Dr. Hull's article: "The method of balancing the Amplituner brings out a very important effect, namely the change of intra electrode capacities in an audion tube when the electron current is flowing. In a commercial anti-regenerative amplifier (standard neutrodynes) local oscillations may be prevented by balancing the tube capacities with the filament unlighted and neglecting the unbalance which follows lighting the filament. But the writer has found that this change may cause as much as 2 to 4 micro-microfarads difference in the grid-plate effective capacity of a receiving tube when the filament is turned to full brilliancy. This is sufficient partially to nullify the one-way action of the Amplituner and to allow radio frequency to creep back through the Amplituner into the antenna. Accordingly, the final adjustment is made as follows."

The following suggestion of Dr. Hull's may not be convenient for everyone to use but is preferable to the usual method of putting a small piece of paper on one of the filament springs while neutralizing. However, if a shielded oscillator (single circuit receiver) is not available, the old system will come pretty close to perfect

neutralization. To resume from the original article: "With the filament lit to full brilliancy, the amplifier is placed in the circuit shown in figure 15. The shielded oscillator represents an oscillating regenerative receiver. A receiving set is connected directly to the antenna as shown at the left. This set uses two stages of radio frequency amplification, a detector and an audio amplifier.

"Both this set and the Amplituner are tuned to the wave length of an incoming C. W. signal. The oscillator G is then tuned to produce a beat note with the incoming signal and the operator listens at the headset T while he adjusts the compensating condenser C_c of the Amplituner. The adjustment is made with a long handle (a one-foot stick whittled to screw-driver edge at one end) so the operator can keep his body away from the Amplituner. At some adjustment of C_c the beat note between the incoming signal and

the oscillator G disappears. This 'null point' indicates a complete suppression of the backward flowing current from oscillator G to the antenna. . . . It is possible to make the adjustment at 350 meters and then to operate the Amplituner from 250 to 600 meters without putting into the antenna enough energy to cause interference to other receivers on other antennas nearby."

There you have the complete story on Amplituner as worked out by one of Radio's leading engineers and a pioneer in the development of bridge circuits. All parts with the exception of the special output coil are standard and most of our readers can build Amplituner out of spare parts lying around.

(Beginning with the next installment of this series, the discussion will be on man-made static, and means for checking up on it will be shown, together with remedies.—Editor's Note).

R. F. Circuits on High Waves

I am certain that there are fans whose sets, especially of radio frequency circuits, will not oscillate on high waves. I overcame this difficulty by shunting a .001 fixed condenser from the plate of the de-

detector to the positive of the A . One may need different capacities for other sets, but my receiver works out best with a .001, as shown in the above diagram. Clarence Miller, 601 North 6th St., Kansas City, Kansas.

Radiotone Loud Speaker

Now Only \$19.95

Was \$25.00

The BEST Radio Affords

\$1.00 down!

"A Wonder" says user:—

"The Loud Speaker is a wonder. I never heard anything like it. I put it to a little test a few nights ago and it was heard clear and loud nearly one-half mile from my place through an open window."

Burton W. Cooswell,
Brockton, Mass.

Makes Your Radio Complete

The Radiotone is the last word in sound reproduction and amplification for radio sets. It is super-sensitive. Brings in distant stations with full volume so every one in the room can hear distinctly and easily. Wonderful clearness and absolute purity of tone. No distortion. No crowching in front of the loud speaker to hear announcements.

The Radiotone has a 14-inch horn made of Thorite in one piece without seam or joint, acoustically correct. This eliminates the metallic clang you often hear in other loud speakers. The reproducing unit is entirely enclosed at the base of the horn. The well balanced construction does away with all vibrations. The Radiotone has a graceful shape with a beautiful black florduline finish. It stands 23 inches high and weighs only 15 lbs. No extra batteries needed for the Radiotone—just plug it in as you do your head set. Nothing to wear out or get out of order. Sent complete with cord and plug.

30 Days Trial!

When the Radiotone comes, there's nothing to pay. Use it freely at our risk, on trial for 30 days. See how much more use and fun, you and all the family get from your radio with this loud speaker. See how loud, clear and distinct the Radiotone brings in all stations—better than any other loud speaker you've ever heard, giving you the best that is in your set. After 30 days trial if you think you can get along without the Radiotone, return it to us and we will refund your dollar plus all transportation charges. No red tape. The trial costs you not a cent.

Straus & Schram, Dept. R-8413 Chicago, Ill.

Enclosed find \$1. Ship special advertised Radiotone Loud Speaker, I am to have 30 days free trial. If I keep the Radiotone, I will pay you \$3.00 monthly, total reduced price, \$19.95. The Radiotone is to become my property as soon as you receive the final payment. If not satisfied, I am to return it within 30 days and you are to refund my money and any express charges I paid.

1926 Model Four-Filter Super-Heterodyne

Part II—Parts Alterations and Drilling

By the Technical Editor

SINCE a special means of coupling the oscillator pick-up coil into the grid circuit of the first detector (mixer) is used in this set, it will be necessary to add a few turns to the Cruver coil specified. You will note that, at that end of the secondary which is away from the primary, there is quite a space between the last turn and the end ring. In this end ring of Bakelite there is a terminal for one end of the secondary. On the end ring, measure about an inch each side of this terminal screw and drill a small hole through the end ring at each of these points, just large enough to pass a 4-36 machine screw.

In the space between the last secondary turn and this end ring, there are about five wire grooves on each longitudinal bar and on these wind two parallel turns of either number 24 or number 26 dsc. wire, securing the ends to the 4-36 screws just put in the end ring. These two turns will later be connected to the pick-up coil of the oscillator coupler to transfer energy into the first grid circuit without extending this first grid circuit clear across the set to the oscillator section.

Daven Amplifier Changes

We are going to use the binding posts on the Daven Super-Amplifier unit as connecting posts for the batteries to the whole set, and our circuit is going to have negative B connected to negative A; a change or two must therefore be made in the wiring of the Super-Amplifier. As it comes to you, the bus wire connecting the three negative posts on the sockets is connected to the binding post marked negative A, and the binding post marked plus A is connected to negative B binding post. The connection between the three negative filament socket terminals and the negative A post is to be broken and this bus connected to the negative B binding post. The strap connecting plus A post with negative B post is removed. This leaves negative A without connection to anything within the Super-Amplifier.

Consider now the oscillator coupler as supplied by National Master Radio Supply company. Of the two windings on the outer tube, the larger is the grid coil, the smaller is the plate coil. Hold it with grid coil uppermost; now find the protruding terminal of that end of the plate coil nearest the grid coil, in other words the terminal of the upper end of the plate coil. Revolve coil until this terminal is toward you, the grid coil still being uppermost. Directly below this terminal, in

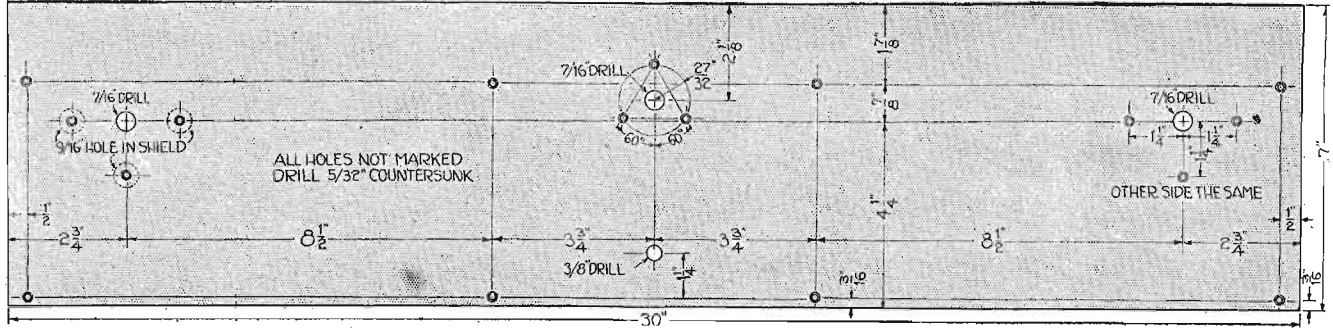

Figure 2

be used to support this unit on the sub base with a small right angle bracket.

Getting now to the drilling. Figure 2, gives the dimensions for making a drilling template for the front panel and front panel shield. Four pairs of holes, in vertical relationship, will be noticed across the face of the panel. These are for the Kelbrackets. The four holes grouped at the left end are for the input

has been made, lay it on and either paste or clamp it to the front of the panel. Center punch all holes with punch and hammer and remove template carefully as hole sizes must be followed from it. A piece of the sheet brass must be cut to the exact same size as this front panel and, for the drilling of the two together, I would suggest the following procedure. Have someone hold the panel tightly on

The panel and the brass sheet can now be separated for separate treatment. Each of the eight bracket mounting holes in the panel is countersunk from the front for which job I suggest a Yankee 45-degree countersink. Now countersink the three outer holes in each condenser group and the three outer holes of the potentiometer group. Turning now to the brass shield, drill out the three outer holes of the left

Figure 5

tuning condenser, while those at the right end, in a group, are for the oscillator condenser. The group of four in the center near the top are for the General Radio

the brass sheet which is to go behind it and drill the hole in the lower left corner and the hole in the lower right corner very carefully, watching to see that panel and sheet do not slip out of exact alignment. Do this drilling on a flat wooden surface and the brass will drill out cleanly without breaking out or tearing.

Having put in these holes, slip a round head machine screw through each and put a hex nut on the back, drawing them up tight to hold the panel and sheet tightly together and flat. You can now go ahead with the rest of the holes with confidence that all will coincide, in Bakelite and brass, when through. Drill all holes through first with a 9/64 or 5/32-inch drill and then put through the larger holes called for by the condenser shafts, the potentiometer shaft and the switch.

condenser group with any drill up to 9/16 and ream out to that size. This will give clearance of the shield around the three mounting posts of the left condenser. It might be stated at this point that, if readers wish the drilling templates in blue print form and full size, they will be sent on receipt of 40c, sent to Dept. 5 of Radio Digest, 510 N. Dearborn St., Chicago, Ill.

Figure 3 gives the dimensions on holes contained in the sub base and its shield. These are both 29 3/4 inches long but, referring to the right end of figure 3, you will note that the sub base is but 7 inches wide while the brass sheet placed under it is 9 3/4 inches wide, with their rear edges coinciding. Two sizes of holes are shown scattered over this layout, without indication as to size. The smaller are 9/64 (Continued on page 28)

Figure 4

the space between the bottom turn of the plate coil and the lower end of the tube, drill a hole for a 6-32 machine screw to

potentiometer. Below this group is a single larger hole for the toggle switch. When the full size drilling template

STEINITE LABORATORIES, 161 Radio Bldg., ATCHISON, KANSAS

The Reader's View

Why WJZ Programs Were Out—and In

You will be pleased to note the Radio Corporation of America's reply to my recent request with reference to listing programs from WJZ in Radio Digest:

"Your letter complaining that the programs of Station WJZ were not published in the Radio Digest at hand, and I think a brief explanation of the situation would clarify matters considerably.

"The Radio Digest requires programs three weeks in advance in order to have them published in advance in that periodical. In the past we have not felt that we could issue programs three weeks in advance that were accurate and preferred not to have our programs published unless they were absolutely correct. With the coming of high power for WJZ, our programs are being booked further in advance than ever before. Therefore, at the present time, it is possible for us to supply the Radio Digest with programs three weeks in advance that are practically correct. You will find our programs now in the Radio Digest and think that henceforth they will appear in that publication with regularity.—The Radio Corporation of America."

This information will be gratefully received by the readers of your magazine, particularly in view of the far reaching territory of this new superstation.—R. H. W., Winona, Minn.

Attention: T. H. of Okemah

T. H. of Okemah, Okla., asks, "Whad'ya mean Just?" If he will go to the public library and look up "just, adv." in Webster's International dictionary, he will find, in addition to definitions he mentioned, "now, or a moment ago." Why abuse the announcers? I like to have them tell the numbers just rendered and by whom.

He further states: "Any moron ought to be able to recognize a piece of music after it has been broadcast 100 or 150 times." Of course we are not all morons and perhaps that is why a great many of us do enjoy announcing of numbers and cannot see things from his standpoint.—L.M.R., Sterling, Ill.

Announce Call Twice

Let me add to your many timely remarks on improved announcing, a suggestion that I feel would add greatly to the enjoyment of the vast multitude of listeners.

In addition to announcing frequently, give station letters at start and AGAIN at the end of each announcement. Many announcers start with the call letters and all the letters may not be understood. If given again at the end, we have another chance.

All stations desire above all else wide publicity and the good will of the listeners. Above method, practiced consistently, will greatly help them to achieve that goal.—W.E.D., Philadelphia, Pa.

Place for Jazz

Answering E.I.S., Butler, Pa.: I heartily agree with him regarding jazz. Let's have it all put on about 510 or 520 kilocycles. But why condemn one of the most beautiful toned instruments because some so-called musicians can evidently do nothing with the saxophone except shatter the listener's nerves and eardrums with jazz? Has E.I.S. ever tuned in on KOA or KFOA? He can hear some real music from saxophones at these stations.

Now I would suggest that you put jazz where E.I.S. asks but also include with it (Continued on page 30)

Here and There with the Radio Clubs

An educational committee has been appointed by the Spokane Radio Listener's association to direct the work of giving Radio set owners a better understanding of how to operate their sets most efficiently and recognize sources of interference. A Radio survey to cover the entire city of Spokane has been announced and a questionnaire was published in the Spokane Chronicle. The information gathered will be used in the campaign against interference being carried on by the association and the Washington Power company.

The program committee of the Butte, Montana, Radio club has interest and enthusiasm in the meetings at a high pitch due to the schedule of unusually interesting speakers arranged. At one of the most recent meetings, the speaker was H. W. Manning, of the Mountain States Telephone and Telegraph company, who included in his talk a discussion of the use

of vacuum tubes in long distance telephone work. The members then inspected the entire local telephone exchange from batteries to switchboards.

Eastern clubs, attention! Send in your news. Tell us what you are doing.

A Radio club is being formed in Portsmouth, Ohio, to be known as the Scioto Radio club. Its object is "to improve the condition of Radio reception in the city of Portsmouth and vicinity and clear the air of avoidable causes of interference to Radio listeners." Copies of the by-laws, constitution, application blank and membership cards used by other clubs are desired by Frank R. Sodaro, Box 341, Portsmouth, Ohio.

The city of Cheney, Washington, announces a Radio club with full arrangements completed for a place to meet, officers, instructors and speakers. James S.

Lane, of the Normal school faculty is chief of instructors; Leon Swank is president.

The Grand Rapids Radio Listeners' league now has over 700 members! A drive is on for a total of 3,000. That's ambition when there are only 7,000 set owners in the city. The way applications are pouring in, it surely looks as if this drive would be successful. The live-wire club even has its service expert in the person of Ewald A. Stein, who runs down interference for the members. Locating four such cases in one week, he cleared the air for nearly twenty per cent of the membership. He finds it possible to average about two calls a night, but when each "cure" clears the air for a score of others, this is plenty. The league can be reached at P. O. Box 558, Grand Rapids, Michigan.

Up in Victoria, B. C., everyone has to have a receiving license, so when the Victoria Radio club wanted to send out a questionnaire they had a 100 per cent list. The card which was sent to every set (Continued on page 30)

No More "B" Batteries on Your Radio

At last, a practical reliable "B" battery eliminator for your radio. Does away with "B" batteries; no charging; no replacing. Always 100% efficiency in "B" current. The most revolutionary development in radio.

Genuine Fansteel Balkite "B" Eliminator Sent for Only

\$1.00 Down

U.S. PAT. MAY 27, 1924

The Balkite "B" is connected to your radio just like "B" batteries and attached to an ordinary electric light socket. Replaces "B" batteries entirely and furnishes "B" current direct from regular house lighting current. Always gives current equal to four new and fresh 22½ Volt dry "B" batteries. For sets of five tubes or less. Simplifies radio receiving. More convenient, more economical and more efficient than dry or wet "B" batteries. Operates storage battery or dry cell tubes and gives tubes longer life. Entirely noiseless. Creates no disturbance in reception. Has no bulbs, nothing to break, wear out, replace or get out of order. Requires no change in your set, no extras to buy. Operates from 110-120 AC, 60 cycle current. Measures 8 3-16 inches by 8 inches by 3¼ inches. Current costs only 1-20 of a cent per hour.

\$5.00 a Month, if satisfied after trial

Only \$1.00 with the coupon below brings the Balkite "B" to your home on trial. Try it out thoroughly before you pay another penny. See how it improves reception. See how much more convenient than using batteries. Judge for yourself how it will save you money and make your radio set more enjoyable. Then, if not satisfied, send it back at our expense and we'll refund your \$1.00 plus all transportation charges. If you decide to keep the Balkite "B," start paying only \$5.00 a month until you have paid the total price of only \$35.00. That's the price others ask for spot cash. We give you the lowest cash price on easy monthly payments you will never feel.

Send Coupon

Don't miss this opportunity to get the genuine Balkite "B" at the rock-bottom cash price on easy monthly payments. Send coupon now while this offer lasts. Order by No. Y-8578A, \$1.00 with coupon; \$5.00 a month; total price \$35.00.

Gets Everything But Noise!

Read this convincing letter from a man who has "listened and marveled":

"Omaha, Nebraska, February 10, 1926.

Kane Antennae Co., Gentlemen:

I received 2BD, Aberdeen, Scotland, on a "Kane Antennae," during the recent International Tests. Reception was officially verified by Radio Broadcast Magazine who conducted the tests. I built the Antennae a year ago from one of your blue prints. It has more than met expectations in the elimination of outside electrical interference, as well as in increased volume and distance. GUY H. CRAMER."

Improves Reception 60%

Entirely eliminates all power noises such as leaky transformers, generators, motor hums, DeCo Plants, etc. Cuts static and regeneration howls and squeals in two. Dr. Gehrig of Oakland, Cal., says it improves his reception fully 60 percent. Do away forever with disagreeable noises.

\$1.00 Brings BLUE PRINT Complete Working Drawings

and full instructions for erecting this wonderful Antennae. Just send \$1.00 (a check will do. Stamps not accepted). A limited number available. Send TODAY.

WITH THE RADIO CLUBS

(Continued from page 29)
owner is reproduced here with and the information this brought it has been of inestimable value in clearing the ether of noises. With this card was a letter:
"The Victoria Radio club has been requested by the Dominion government to undertake a campaign to lessen interference in this district. The club invites your cooperation and requests you to supply data as to interference experienced by yourself in the past few days. By filling in and returning the enclosed stamped post card as early as possible you will greatly aid this work."

Radio clubs! Insist on every member reading the series of articles now appearing in Radio Digest on the subject of blooping and man-made static. It is the largest collection of authoritative data on the subject yet published. Practical application of all points brought up can be discussed at meetings for the benefit of all.

The Reader's View

(Continued from page 29)

all those screeching sopranos and all singers of operatic stuff in a foreign tongue, and put "breezy announcing, Ford fiddling, infant prodigy stuff and the rest of the high-class RURAL entertainment" where the majority can get at it.—J.W.McC., Bovey, Minn.

Sit Down, T. H. Okemah!

In the Radio Digest of February 27 under title of "Whad'yamean Just?" T. H. Okemah of Oklahoma criticizes broadcast-

CLASSIFIED ADVERTISEMENTS

Classified advertisements in Radio Digest produce results. Have you a receiving set to sell? Do you want to buy a Radio? A classified advertisement in this column will sell your set.

Rates are twenty cents a word for each insertion, five per cent discount for four insertions, ten per cent for thirteen insertions, fifteen per cent for twenty-six insertions, twenty per cent for fifty-two insertions. Name and address to be included at above rate. Cash should accompany order. Minimum of ten words. Objectionable and misleading advertisements not accepted. Forms close three weeks prior to date of publication, which is Saturday.

BLUE PRINTS

Super-Het, Ryan's Simplest Possible 7-Tube Set. Complete instructions, actual size template. How to make a loop. All for 50 cents. Book Dept., Radio Digest, 510 North Dearborn Street, Chicago.

MISCELLANEOUS

Photos of Your Favorite Radio Stars. Ten cents and coupon appearing on another page of this issue will entitle you to one of the photos from Radio Digest gallery of stars. Radio Digest, 510 North Dearborn Street, Chicago.

TELEGRAPHY

Telegraphy—Both Morse and Wireless taught thoroughly. Big salaries. Wonderful opportunities. Expenses low; chance to earn part. School established fifty years. Catalog free. Dodge's Institute, Sixth St., Valparaiso, Ind.

ing stations for announcing the names of familiar melodies. Objection is also made to the use of the word "just" in announcements such as: "You have just heard, 'Let Me Call You Sweetheart,'" etc.

These criticisms of Okemah's are hardly worthy of consideration, but in behalf of listeners in general and particularly for Okemah's information I wish to say that I also consulted the dictionary (Webster's New Ideal). I found as one definition of the word "just": "Now, or but a moment

ago." Therefore Okemah's objection is over-ruled and there is no reason why announcers should not use the word "just," just as they have been doing.

So far as it being necessary to announce the name of a song that is familiar to nearly every one, such as, "Let Me Call You Sweetheart," Okemah should realize that broadcasting stations are not being operated for his or her sole benefit. He or she may be quite familiar with all the popular songs but it should be remembered that there are thousands of people throughout the United States alone who are hearing many of the songs for the first time. Okemah may not survive the shock when I say that only a few days ago I heard, "Let Me Call You Sweetheart" for the first time.—A.J.P., Cement City, Michigan.

BODINE TWIN-EIGHT R.F. COIL

A remarkable new radio frequency transformer that combines a very limited magnetic field with tremendous amplification. Very sharp tuning. For r e a satisfaction use TWIN-EIGHTS. Price \$3.00 each, \$9.00 per set of 3 matched coils.

At your dealer or sent postpaid upon receipt of check or money order. Wiring diagrams free.

BODINE FOLDING LOOP AERIAL

Wonderfully efficient. Large enough to give good signal pick-up, but folds to fit in small box. Beautifully finished in mahogany and satin silver. The best loop at any price. Standard loop \$8.50. Equipped with 5 point tap switch \$10.00. Write for folder.

BODINE ELECTRIC CO. 2260 W. Ohio St., Chicago, Ill.

Yale GROUND HOG DOUBLES POWER AND DISTANCE

Marvelous newly-invented ground gives 100% improved reception. Doubles power and distance. Stops leakage. Reduces static. Stops fangling even in mid-summer. Results never before equalled, users say. Satisfaction Guaranteed.

Proven absolutely essential to clear, powerful distance reception. Draws and holds moisture indefinitely. Highly sensitive to radio energy. SEND NO MONEY—To introduce, we offer to those who act at once, regular \$5.00 size for only \$2.00. Send name today and pay \$2.00 plus 17c postage on delivery. Or send only \$2.00 with order and save postage. FREE—Full description of Ground Hog and big money making agent's offer on request—write today. Yale Specialty Supply Co. 1805 Grand Ave., Kansas City, Mo.

Nightingale 6-tube Set with Integral Loud Speaker \$75

A wonderful, sharp tuning set of beautiful tone, made complete in our own factory. Five tube assembly suffices for most stations, but volume can be tripled by using 6 tube terminal. No wasteful neutralizing condensers but perfect balance of parts. See Nightingale dealer or write to THE GUTHRIE CO., GRAFTON, OHIO. Makers of the famous Songbird Line.

BASE NOTES FULLY AMPLIFIED!

There is no variation in amplification over the entire range of musical frequencies with Thordarson Autoformers. No note is too low—no note is too high to be fully amplified by the Autoformer.

THORDARSON Autoformer

Trade-Mark Registered

All Frequency Amplifier

An Entirely New Instrument—Not "just another transformer"

As the world's oldest and largest exclusive makers of transformers, we have led for years in broadening their amplifying range. In the Autoformer we have finally developed an all-frequency amplifier—a new instrument capable of fully amplifying all notes audible to the human ear. Thus the deepest notes of the grand organ, bass viol, tuba, English horn, etc., at last are brought out as clearly as the highest treble. Improved long distance reception and better volume control are further advantages.

Write for Autoformer Bulletin

Autoformer amplification is for those who seek the finest reproduction of programs to be had. May be used with any set in place of regular audio transformer hook-up. Full directions, with diagrams, supplied with each instrument. Autoformers are \$5 each. Sold by leading dealers THORDARSON ELECTRIC MFG. CO. CHICAGO

CHALLENGE!

ONE DOLLAR will be paid to the Radio fan submitting the most errors in any one station's listing in this directory. Letters must reach Radio Digest office not later than one week from date of issue corrected. Readers are not limited to correcting one station, but such corrections must be certified by the stations themselves, and NOT by comparison to other so-called accurate broadcasting directors and lists. Readers also must live in same state or province as stations corrected are located. Station verifications must accompany corrections.

That's just how sure Radio Digest is that this broadcasting station directory is correct! To make the challenge fair for everyone, broadcasting stations and their employes are barred from this offer. Why? Because the broadcasters are the source of all the data given herein. They are (or should be) interested enough to answer the inquiry sent them every time data on their station appears. This inquiry contains a proof of their last listing and must either be corrected or O'K'd as correct and

returned to the Digest. Nevertheless, sometimes the stations are careless and mistakes are made. But Radio Digest is so sure of the exactness of this directory that this challenge is made unconditionally.

With reference to the directory: It appears in six parts, serially continuously; the first four parts are station data listings, arranged alphabetically; the fifth part is a state, city index of stations; the sixth part is a wave length index. The information contained in each station data listing is given in the following order: Call letters, city, state, wave length used, watts antenna input, owner's name, announcer's name, slogan used if any, name of listener in "club," schedule of operating hours, and kind of time used, as "Central," "Mountain," etc.

Six successive issues of Radio Digest will give one the most complete and accurate list of broadcasting stations obtainable. This service is original with this publication, and has been maintained from the start. Right of reproduction without permission of any or all of the data contained herein is denied.

Frykman. Fri, 8:30 pm. Sun, 12:30 pm, service for shut-ins (Swedish); 9:30, service (English). Central.

Your Home— Deserves This Radio

Compact—Fits any Corner— A Beautiful Piece of Furniture

of genuine five-ply mahogany with built-in loud speaker of great volume and superb tone and spacious compartments for all batteries and other accessories—not a single wire being visible.

MODEL 6-F-1

New and Improved
**FRESHMAN
MASTERPIECE**

The Worlds Greatest
Radio Value

Freshman's latest sensation has a real appeal to the women of the home. It is compact and comparatively small, giving it preference over clumsy consoles. Contains an especially large tone chamber, made by the manufacturer of the world's foremost phonograph.

When not used as a radio, it can be entirely closed. The top is stationary and provides an attractive resting place for vases and other ornaments, so essential to the women of the house.

**The Radio Receiver Women
Have Been Waiting For**
